## **Ostrich Eye:**

**Ostrich Legs** Alicia Kozameh, 2013 Partially autobiographical this translation of the Spanish *Patas de Avestruz* is a masterpiece of introspective linguistically innovative fiction about the relationship between two sisters one severely handicapped the other gifted yet overlooked Mariana is four years older than her sister Alcira but Mariana is seriously disabled and slowly dying Conveying the experience of a physically messy process this account points out the flaws in adult society through the point of view of its child protagonist At its core the novel is about the abuse of power and its consequences whether that abuse is by a government a parent or a child

**Ostrich** Edgar Williams, 2013-06-01 Ostriches may not be able to fly but they loom large in the bird kingdom They are the world's tallest and heaviest living birds and they lay the largest eggs With their long legs ostriches are also fleet of foot running up to 43 miles per hour and formidable fighters an ostrich kick can kill But since the beginning of history these extraordinary and outlandish birds have also been exploited by humans for their eggs meat skin and feathers In *Ostrich* Edgar Williams provides a singular comprehensive insight into the natural history behavior and habitat of this monumental bird Williams describes how the demand for ostrich feathers was so great during the Victorian era that vast fortunes were made from ostrich farming particularly in South Africa and the United States After fashions changed following World War I farmers lost their fortunes but the now domesticated ostrich found a new purpose today ostrich farmers produce plumes and leather for luxury markets as well as meat for grocery stores In addition to telling its Williams reveals how the ostrich has been featured in culture from its representations in cave paintings medieval manuscripts and the Bayeux tapestry to its use in advertising and cartoons Featuring many striking illustrations *Ostrich* will interest nature lovers artists and fashionistas alike

[Zebras and Ostriches](#) Kevin Cunningham, 2016-08-01 The Better Together series presents an introductory look at some of nature's most exciting cooperative pairs *Zebras and Ostriches* explores the close mutualistic relationship between the two animals Sidebars encourage readers to engage in the material by asking deeper questions or conducting individual research Full color photos a glossary and a listing of additional resources all enhance the learning experience

Martin, 2017-03-30 Birds are renowned for their exceptional vision and the way that this enables them to survive and navigate the world in such a unique way However it is now recognised that avian behaviour is guided by information drawn from many different senses which are then used in integrated and complementary ways to answer the many different sensory challenges posed by specific environments and particular tasks Understanding how sensory information is used by birds has important applications in conservation such as providing vital insights into why birds are prone to collisions with structures like power lines and wind turbines and why so many diving birds become entrapped in nets A sensory ecology approach

suggests how these problems can be mitigated The Sensory Ecology of Birds ranges widely across species environments and behaviours to present a synthesis that challenges previous assumptions about the information that controls the behaviour of birds A bird may use a wide range and combination of sensory information that comes from sight hearing smell mechanoreception taste and magnetoreception It may also include specific refinements of senses such as echolocation and remote touch from the bill The book recognises that there are many complex and subtle trade offs and complementarities of information between different types of sensory information This accessible text will be of interest to a wide ornithological readership from undergraduates to researchers as well as a broader audience of behavioural ecologists and evolutionary biologists

**The Visual System in Vertebrates** F. Crescitelli, 2013-12-11 The vertebrate eye has been and continues to be an object of interest and of inquiry for biologists physicists chemists psychologists and others Quite apart from its important role in the development of ophthalmology and related medical disciplines the vertebrate eye is an exemplar of the ingenuity of living systems in adapting to the diverse and changing environments in which vertebrates have evolved The wonder is not so much that the visual system like other body systems has been able to adapt in this way but rather that these adaptations have taken such a variety of forms In a previous volume in this series VII I Eakin expressed admiration for the diversity of invertebrate photoreceptors A comparable situation exists for the vertebrate eye as a whole and one object of this volume is to present to the reader the nature of this diversity One result of this diversification of ocular structures and properties is that the experimental biologist has available a number of systems for study that are unique or especially favorable for the investigation of particular questions in visual science or neurobiology This volume includes some examples of progress made by the use of such specially selected vertebrate systems It is our hope that this comparative approach will continue to reveal new and useful preparations for the examination of important questions

**X-Venture The Terrible Terror Raptor**, 2020-09-23 With orders from the Professor the X Venture Xplorers find themselves in New Zealand Investigating reports of dodos But an attack by something much larger and much much more alive places them in the middle of some fowl business Even with assistance the X Venture Xplorers are finding harder and harder not to turn chicken How will the team escape their avian adversary Is there a reason for its rampage Fly on in and read further

**National Geographic Little Kids First Big Book of How** Jill Esbaum, 2016-03-08 This charming reference book answers questions kids ask every day taking a closer look at the things that surround them and how they work from cars to vacuum cleaners storms to seasons animal bodies to humans More than 100 colorful photos are paired with age appropriate text featuring answers to questions like How do chameleons change color How do refrigerators stay cold How do tornadoes form How do submarines stay underwater How does food get to the grocery store and How does my body heal This book helps parents share fascinating accurate answers and inspires kids to be curious ask questions and explore the world around them Games and parent tips encourage interactivity and extend the experience of the book beyond its pages

**Bird Brains and Behavior** Georg F.

Striedter, Andrew N. Iwaniuk, 2025-08-19 From two avian neurobiologists a captivating deep dive into the mechanisms that control avian behavior The last few decades have produced extensive research on the neural mechanisms of avian behavior Bird Brains and Behavior marries the enthusiasm of bird enthusiasts for the what how and why of avian behavior with the scientific literature on avian biology offering the newest research in an accessible manner Georg Striedter and Andrew Iwaniuk focus on a wide variety of behaviors ranging from daily and seasonal rhythms to complex cognition Importantly avian behavior and mechanisms are placed in the context of evolutionary history stressing that many are unique to birds and often found in only a subset of species

**Vertebrate Biology** Donald W. Linzey, 2012-02-13 Arranged logically to follow the typical course format Vertebrate Biology leaves students with a full understanding of the unique structure function and living patterns of the subphylum that includes our own species

*A Mind's Eye View* Marie Thompson, 2019-05-24 A Mind's Eye View shares a mixed bag of life experiences that has brought joy and an appreciation of the marvels of the natural world to author Marie Thompson She has an eye for detail that takes the mundane to a level of unexpected enlightenment her encounters with nature and people reflect her wonder when she looks upon a spider a homeless man or considers her own DNA In this book Marie's essays poetry and short stories express sensitivity to aspects of life that bring insight and humor

Bird Sense Tim Birkhead, 2013-01-17 What is it like to be a swift flying at over one hundred kilometres an hour Or a kiwi plodding flightlessly among the humid undergrowth in the pitch dark of a New Zealand night And what is going on inside the head of a nightingale as it sings and how does its brain improvise Bird Sense addresses questions like these and many more by describing the senses of birds that enable them to interpret their environment and to interact with each other Our affinity for birds is often said to be the result of shared senses vision and hearing but how exactly do their senses compare with our own And what about a bird's sense of taste or smell or touch or the ability to detect the earth's magnetic field Or the extraordinary ability of desert birds to detect rain hundreds of kilometres away how do they do it Bird Sense is based on a conviction that we have consistently underestimated what goes on in a bird's head Our understanding of bird behaviour is simultaneously informed and constrained by the way we watch and study them By drawing attention to the way these frameworks both facilitate and inhibit discovery it identifies ways we can escape from them to seek new horizons in bird behaviour There has never been a popular book about the senses of birds No one has previously looked at how birds interpret the world or the way the behaviour of birds is shaped by their senses A lifetime spent studying birds has provided Tim Birkhead with a wealth of observation and an understanding of birds and their behaviour that is firmly grounded in science

*Resistance and Coexistence In Some of Leila Abuolela's Fictional Works* Doaa Mohamed Anwer Deep, 2020-08-25 This book examines three fictional works by the writer Laila Abu Al Ela including two novels The Translator and The Generosity of the Enemies and the other is a short story the Ostrich The research proposes the hypothesis that the selected fictional works present a balanced map of human relations through a perspective that calls for coexistence between cultures of multiple

racism and origins and does not contradict the concept of resistance to a dominant mono Western culture This thesis is divided into an introduction three chapters and a conclusion In the introduction a simplified presentation of some of the theories influencing the writing of literature such as the theory of the clash of civilizations by Samuel Huntington the clash of cultures by Mehdi El Mandjara and the difference between them are presented The introduction refers to some examples of individuals and groups recorded in history in which cultural difference has exposed them to religious and racial discrimination The conflict in the second half of the twentieth century also led to the redrawing of the cultural conflict which cast its shadow over the literature industry thus contributing to the emergence of new types of literature Such as what is called the literature of resistance and the literature of immigrants The introduction briefly discusses the possibility of finding alternatives to accommodate the differences that resulted from the sharp polarizations especially in societies that witnessed the largest rate of immigration to them and the role of Lily Abul Ela literary works in this field
