

Michael B. Sabom *Recollections of DEATH: A Medical Investigation*

Empirical studies of near-death phenomena have been published from the viewpoint of several disciplines: philosophy (Moody, 1971); parapsychology (Osis and Haraldsson, 1977); transpersonal psychology (King, 1980); and psychiatry (Greyson and Stevenson, 1980; Noyes, 1979). In this book, Michael Sabom, a cardiologist and professor of medicine at Emory University in Georgia, brings an almost exclusively medical perspective to bear on the study of near-death experiences. Although another cardiologist, Maurice Rawlings, has previously published on this subject (Rawlings, 1971), his book, while not without interest, is more of a sermon than a scientific document.

In contrast, *Recollections of Death* is a sober and objective investigation of near-death phenomena. While readable for the layperson, the thrust of the book is toward arousing the medical community from its dogmatic slumber. Sabom urges that "caution should be exercised in accepting scientific belief as scientific fact."

Sabom himself was moved to question his scientific dogmas by Moody's *Life After Life* and, with Sarah Koenigs, a psychiatric social worker, set out to investigate Moody's claims. 116 persons formed the basis of the study; 10 of these encountered their crisis event in conjunction with general anesthesia during surgery. Of the remaining 106 cases, 71 were obtained prospectively; 43 percent of these reported a near-death experience (NDE). Sabom concludes from this that NDEs are a "conscious" event among those who survive near-death incidents. On the whole, Sabom's findings are consistent with those of previous researchers.

Recollections Of DEATH

A MEDICAL INVESTIGATION

Striking new clinical evidence on the nature and meaning of the near-death experience, presented by a noted cardiologist and professor of medicine

MICHAEL B. SABOM, M.D.
