### **The Modernisation of Russia, 1676-1825** Simon

Dixon, 1999-07-29 This is the first book to place Russia's long eighteenth century squarely in its European context. The conceptual framework is set out in an opening critique of modernisation which while rejecting its linear implications maintains its focus on the relationship between government, economy and society. Following a chronological introduction, a series of thematic chapters covering topics such as finance and taxation, society, government and politics, culture, ideology and economy emphasise the ways in which Russia's international ambitions as an emerging great power provoked administrative and fiscal reforms with wide-ranging and often unanticipated social consequences. This thematic analysis allows Simon Dixon to demonstrate that the more the tsars tried to modernise their state, the more backward their empire became. A chronology and critical bibliography are also provided to allow students to discover more about this colourful period of Russian history.

*Pious Traders in Medicine* Renate Wilson, 2010-11 This book tells the story of two generations of Pietist ministers sent from Halle in Brandenburg Prussia during the eighteenth century to the German communities of North America. In conjunction with their clerical office, these ministers provided medical services using pharmaceuticals and medical texts brought with them from Europe. Their practice is an example of how different medical markets and medical cultures evolved in North America. At the heart of the story is the Francke Orphanage, a famous religious and philanthropic foundation started in Halle in 1696. Pharmaceuticals from Halle were manufactured and sold throughout Europe as part of a commercial enterprise designed to support Francke's charitable goals. Halle's reputation for consistent product quality and safety soon spread to North America where men and women became actively engaged in providing medical care to Lutheran and Reformed congregations along the east coast, mainly the backcountry of Pennsylvania, New Jersey, Maryland and Virginia. The story continues to about 1810 when Halle's North American clergy had become independent from the motherhouse and American medical practice and education began to follow its own course. Wilson draws upon a large array of correspondence, trading ledgers and daybooks in European and American archives. Through these records, she enables us to see firsthand the experience of men and women as both patients and practitioners. The result is a rare glimpse into the world of German medicine and the pharmaceutical trade in eighteenth-century North America.

### **Proceedings, American Philosophical Society (vol. 149, no. 3, 2005) ,      The Soviet Pharmaceutical Business During the First Two Decades (1917-1937)** Mary

Schaeffer Conroy, 2006 Putting privately owned Russian pharmacies and pharmaceutical factories under state control in 1918, 1919 did not improve the output and the distribution of soaps, disinfectants, hormones, vitamins and medicines. Newly available archival records show that managers appointed by the Soviet government to run sequestered factories employed business methods common to market economies to make the Soviet pharmaceutical sector profitable and productive. However, an inefficient macroeconomy and interference in day-to-day policy making in the core industry by exogenous officials, frequent reorganization, limits on imports and excessive exports hindered production, this plus inefficient distribution

shorted consumers Inadequate amounts of pharmaceuticals undoubtedly contributed to high mortality during the civil war 1917 1921 collectivization and industrialization 1927 1938 and World War II 1939 1945      *Moderniser of Russia* K.

*and Scholars* Gregory Afinogenov,2020-04-14 A Financial Times Best Book of the Year The untold story of how Russian espionage in imperial China shaped the emergence of the Russian Empire as a global power From the seventeenth to the nineteenth century the Russian Empire made concerted efforts to collect information about China It bribed Chinese porcelain makers to give up trade secrets sent Buddhist monks to Mongolia on intelligence gathering missions and trained students at its Orthodox mission in Beijing to spy on their hosts From diplomatic offices to guard posts on the Chinese frontier Russians were producing knowledge everywhere not only at elite institutions like the Academy of Sciences in St Petersburg But that information was secret not destined for wide circulation Gregory Afinogenov distinguishes between the kinds of knowledge Russia sought over the years and argues that they changed with the shifting aims of the state and its perceived place in the world In the seventeenth century Russian bureaucrats were focused on China and the forbidding Siberian frontier They relied more on spies including Jesuit scholars stationed in China In the early nineteenth century the geopolitical challenge shifted to Europe rivalry with Britain drove the Russians to stake their prestige on public facing intellectual work and knowledge of the East was embedded in the academy None of these institutional configurations was especially effective in delivering strategic or commercial advantages But various knowledge regimes did have their consequences Knowledge filtered through Russian espionage and publication found its way to Europe informing the encounter between China and Western empires Based on extensive archival research in Russia and beyond *Spies and Scholars* breaks down long accepted assumptions about the connection between knowledge regimes and imperial power and excavates an intellectual legacy largely neglected by historians      **Erasmus Darwin's Gardens** Paul A. Elliott,2021 This first full study of Erasmus Darwin's

gardening horticulture and agriculture shows he was as keen a nature enthusiast as his grandson Charles and demonstrates the ways in which his landscape experiences transformed his understanding of nature Famous as the author of the *Botanic Garden* 1791 and grandfather of Charles Darwin 1809 1882 Erasmus Darwin 1731 1802 was a larger than life enlightenment natural philosopher scientist and writer who practised as a doctor across the English Midlands for nearly half a century A practical gardener and horticulturist Darwin created a botanic garden near Lichfield which galvanised his poetry and kept other gardens an orchard and small farm in Derby Informed by his medical practice and botanical studies Darwin saw many parallels between animals plants and humans which aroused hostility during the years of revolution warfare and reaction but helped him to write *Zoonomia* 1794 96 and *Phytologia* 1800 his major studies of medicine agriculture and gardening

Captivated by the changing landscapes and environments of town and country and supported by social networks such as those in Lichfield and Derby Darwin avidly exchanged ideas about plants animals and their diseases with family patients friends such as the poet Anna Seward 1742 1809 farmers fellow doctors huntsmen and even the local mole catcher The is the first full study of Erasmus Darwin s gardening horticulture and agriculture It shows him as keen a nature enthusiast as his contemporary Rev Gilbert White of Selbourne 1720 1793 or his grandson Charles fascinated with everything from swarming insects and warring bees to domestic birds and dogs pigs and livestock on his farm to fungi growing from horse dung in Derby tan yards Ranging over his observations of plant physiology and anatomy to the use of plant bandages in his orchard and electrical machines to hasten seed germination to explosive studies of vegetable brains nerves and sensations the book demonstrates the ways in which Erasmus Darwin s landscape and garden experiences transformed his understanding of nature They provided him with insights into medicine and the environmental causes of diseases the classification of plants and animals chemistry evolution potential new medicines and foodstuffs and the ecological interdependency of the natural economy Like the amorous vegetables of the Loves of the Plants 1789 which fascinated scandalised and titillated late Georgian society the many living creatures of Darwin s gardens and farm encountered in this book were for him real dynamic interacting and evolving beings who helped inspire and re affirm his progressive social and political outlook

*Charles Whitworth* Janet M. Hartley, 2017-07-05 This book examines the rise of Russia and her triumph against Sweden in the Great Northern War 1700 21 Rather than being a straight narrative history the events are looked at through the writings of Charles Whitworth the first British Ambassador to Russia and British minister in The Hague Berlin Ratisbon and Cambrai Drawing on a wide variety of manuscript sources Janet Hartley has produced a compelling account both of Whitworth and the momentous events taking place in Europe at the beginning of the eighteenth century
