Fixing the carnage on our roadways requires a change in mindset and a dramatic transformation of transportation This goes for traffic engineers in particular because they are still the ones in charge of our streets In *Killed by a Traffic Engineer* civil engineering professor Wes Marshall shines a spotlight on how little science there is behind the way that our streets are

engineered which leaves safety as an afterthought While traffic engineers are not trying to cause deliberate harm to anyone he explains they are guilty of creating a transportation system whose designs remain largely based on plausible but unproven conjecture Killed by a Traffic Engineer is ultimately hopeful about what is possible once we shift our thinking and demand streets engineered for the safety of people both outside and inside of cars It will make you look at your city and streets and traffic engineers in a new light and inspire you to take action
