China's Belt And Road Initiatives And Its Neighboring

Diplomacy Jie Zhang, 2016-12-15 This book studies China's Belt and Road Initiatives and the country's neighboring diplomacy

The Belt and Road Initiatives proposed by Chinese President Xi Jinping in 2013 consist of two main components: the land-based Silk Road Economic Belt and the ocean-going Maritime Silk Road. China has implemented the initiatives by establishing the Asian Infrastructure Investment Bank and the Silk Road Fund. This book focuses on analysis of the initiatives and the responses from the major powers neighboring countries and regions. The book consists of four parts: the Overview, The Belt and Road Initiatives and Big Powers, The Belt and Road Initiative and Regions, and The Belt and Road Initiative and Hot Issues. The Overview explicates the strategic orientations, connotations, and approaches of implementation of the initiatives from a theoretical perspective. The second part analyzes the Asia-Pacific strategies of four great powers: namely, the United States, Russia, Japan, and India, their relations with China, and responses to the initiative. The third part discusses the Belt and Road Initiatives and four regions: namely, Northeast Asia, Southeast Asia, South Asia, and Central Asia. It evaluates their attitudes and responses towards the Belt and Road Initiatives, strategic docking, and major challenges in this regard. The fourth part touches upon the initiatives and current hot issues, including non-traditional security, the South China Sea dispute, and venture analysis on investment environment renovation.

Conquering the North John Man, 2025-05-01 A panoramic history

of the roots of China and Mongolia's historic rivalry and why it matters now. A beguiling blend of history and intimate narrative and a delight to read. Colin Thubron, author of *Shadow of the Silk Road*. The Great Wall of China stretching from the arid rises of Gansu province to the cold waters of the Bohai Sea remains an enduring symbol of Chinese might. And yet for all its grandeur, the Wall also marks a vulnerability, an ever-present reminder of old battlelines and never-ending tension with China's northern neighbours. Travelling by sacred mountains and along forgotten trade routes, John Man journeys through China and Mongolia tracing the contours of their uneasy shared histories. From the tumult of the Warring States Period to the present day, Man weaves a thrilling tale of battling warlords, imperial power plays, Soviet interference, and contemporary political manoeuvring. Looking to the future of the region, *Conquering the North* canvasses the still fractious interplay of two rival cultures and the continuing struggle for Mongolian sovereignty as China continues to edge north.

The Rise of China and the China-Russia Strategic Partnership Lei Yu, 2025-02-08 This book argues that China's quest for a strategic partnership with Russia reveals the country's desire to create a geopolitical environment in favour of their country's re-emergence as a great power at the systemic global level. The partnership, with its no limit, is expected to help China counterbalance its perceived US containment and reshape the US-dominated world order. By intensifying Sino-Russian economic and energy cooperation and trade in the framework of the partnership, China attempts to gain entry to Russia's

markets and particularly its energy resources to sustain its economic growth that is viewed by Deng Xiaoping as the basis underlying China's hard power and particularly its military capabilities. By intensifying their military collaboration, China seeks to gain entry to Russia's military weaponry and technology for the modernization of the People's Liberation Army (PLA) and work together with Russia to contain their perceived US unilateralism, hegemonism, and interventionism. The Chinese foreign policy elites increasingly view US unilateralism and hegemonism as detrimental to China's core interests, e.g., its territorial integrity and national rejuvenation. This sheds light on why the Chinese foreign policy elites conceive the China-Russia partnership as vital for China's peaceful development, commonly known as peaceful rise overseas and the ballast stone for global peace and strategic stability. This book will be of interest to sinologists and scholars of China's foreign policy.

Mongolia Between China and Russia: an Historical Overview Sharad Kumar Soni, 2000. Historical overview of Mongolia relations with Russia and China.

China, Russia and Central Asian Infrastructure Peter Krasnopolsky, 2022-08-17. This book evaluates Central Asian regionalism by analyzing the impact of Russia and China on physical infrastructure in the region. The narrative builds a picture of the nature of the two powers' influence on the development of regional connectivity in Central Asia. The study covers the 30-year period since the dissolution of the Soviet Union, with a focus on the last decade preceding the global pandemic. Qualitative research methods, i.e., documentary analysis, media analysis, and elite interviews, are implemented to explore how activities of Russia and China impact regional cooperation among Central Asian states. Multiple case studies of projects in the networked sectors of infrastructure, i.e., transportation, energy, and telecommunications, are used to build the argument and demonstrate the ways in which Russia's and China's engagement influence regional connectivity. The book is of interest to the scholars who study international relations in Eurasia, major power relations, Sino-Russian relations, China's foreign policy, international institutions in Asia, multilateralism, and regionalism. The empirical depth of the book attracts attention of area studies scholars who focus on Central Asia, Central Eurasia, and any of the five Central Asian states. Additionally, the scholars who analyze the roles of hard infrastructure find the book particularly important. The in-depth cases on multilateral financial institutions and regional networks, particularly energy, transportation, and telecommunication, are of great value to those interested in these respective sectors.

Russia, Mongolia, China John Frederick Baddeley, 2007. China Joseph W. Esherick, C.X. George Wei, 2013-12-17. The Qing dynasty was China's last, and it created an empire of unprecedented size and prosperity. However, in 1911, the empire collapsed within a few short months, and China embarked on a revolutionary course that lasted through most of the twentieth century. The 1911 Revolution ended two millennia of imperial rule and established the Republic of China, but dissatisfaction with the early republic fuelled further revolutionary movements, each intended to be more thoroughgoing than the last, from the National Revolution of the 1920s to the Communist Revolution and finally the Cultural Revolution. On the centenary of the 1911 Revolution, Chinese scholars debated the causes and significance of the empire's

collapse and this book presents twelve of the most important contributions Rather than focusing on Sun Yat sen s relatively weak and divided revolutionary movement as much previous scholarship has these studies examine the internal dynamics of political and socio economic change in China The chapters reveal how reforms in education army organization and constitutional rule created new social forces and political movements that undermined dynastic legitimacy within China and on its frontiers Through detailed analyses using new archival memoir diary and newspaper sources the authors cast new light on the sudden collapse of an empire that many thought was at last embarked on a road to reform and national rejuvenation China How the Empire Fell will be of huge interest to students and scholars of modern Chinese history as well as those of contemporary China

China's Global Rebalancing and the New Silk Road B. R. Deepak,2018-01-10 This collaborative volume discusses the One Belt One Road or the New Silk Road initiative of Chinese President Xi Jinping from the perspectives of the Belt and Road countries This initiative has been viewed as a re globalization drive by China in the backdrop of financial crisis of the West and the latter s increasingly protectionist tendencies of late Rather than rebalancing towards a certain region this is supposed to be China s global rebalancing aimed at inclusiveness and a win win partnership The initiative has raised hopes as well as suspicions about China s goals and intentions that is whether this is in sync with China s foreign policy goals such as multipolarity no hegemonic aspirations and common security or if this is an antidote to the U S foreign policy goals in the region and China s ambition to realizing its long term vision for Asian regional and global order In this volume a galaxy of eminent academics from India China Pakistan Uzbekistan Germany and Southeast Asia have critically analysed every aspect of this mammoth project including the six major economic corridors identified by China for policy coordination infrastructure connectivity unimpeded trade monetary circulation and people to people exchanges The authors have interpreted China s peripheral regional as well as global diplomacy both over land and sea This topical volume is of interest to scholars and students of Asian studies China studies Asian history development studies international relations and international trade

The Braconid and Ichneumonid Parasitoid Wasps Donald L. J. Quicke,2014-12-01 The Ichneumonoidea is a vast and important superfamily of parasitic wasps with some 60 000 described species and estimated numbers far higher especially for small bodied tropical taxa The superfamily comprises two cosmopolitan families Braconidae and Ichneumonidae that have largely attracted separate groups of researchers and this to a considerable extent has meant that understanding of their adaptive features has often been considered in isolation This

book considers both families highlighting similarities and differences in their adaptations The classification of the whole of the Ichneumonidea along with most other insect orders has been plagued by typology whereby undue importance has been attributed to particular characters in defining groups Typology is a common disease of traditional taxonomy such that until recently quite a lot of taxa have been associated with the wrong higher clades The sheer size of the group and until the last 30 or so years lack of accessible identification materials has been a further impediment to research on all but a handful of lab rat species usually cultured initially because of their potential in biological control New evidence largely in the form of molecular data have shown that many morphological behavioural physiological and anatomical characters associated with basic life history features specifically whether wasps are ecto or endoparasitic or idiobiont or koinobiont can be grossly misleading in terms of the phylogeny they suggest This book shows how with better supported phylogenetic hypotheses entomologists can understand far more about the ways natural selection is acting upon them This new book also focuses on this superfamily with which the author has great familiarity and provides a detailed coverage of each subfamily emphasising anatomy taxonomy and systematics biology as well as pointing out the importance and research potential of each group Fossil taxa are included and it also has sections on biogeography global species richness culturing and rearing and preparing specimens for taxonomic study The book highlights areas where research might be particularly rewarding and suggests systems groups that need investigation The author provides a large compendium of references to original research on each group This book is an essential workmate for all postgraduates and researchers working on ichneumonoid or other parasitic wasps worldwide It will stand as a reference book for a good number of years and while rapid advances in various fields such as genomics and host physiological interactions will lead to new information as an overall synthesis of the current state it will stay relevant for a long time

Economic Development of China and Japan C.D. Cowan, 2013-10-15 First published in 2005 Some of the most important of the world's problems today concern affairs in Asia and the relations between Asia and the West To deal adequately with these problems it is necessary not only to master their more obvious elements as they present themselves today but to go to their historical roots In particular it is necessary to study the economic history of modern Asian society In London the School of Oriental and African Studies with the generous assistance of the Ford Foundation began in 1959 a research programme on the economic history of East and South East Asia As part of this programme an international study group composed of scholars from America Europe and Asia was held at the School in July 1961 This volume contains a selection of the papers presented to the study group

Frontier Encounters Franck Billé, Grégory Delaplace, Caroline Humphrey, 2012-08-01 China and Russia are rising economic and political powers that share thousands of miles of border Despite their proximity their interactions with each other and with their third neighbour Mongolia are rarely discussed Although the three countries share a boundary their traditions languages and worldviews are remarkably different Frontier Encounters presents a wide range of views on how the borders between these unique countries

are enacted produced and crossed It sheds light on global uncertainties China s search for energy resources and the employment of its huge population Russia s fear of Chinese migration and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources Bringing together anthropologists sociologists and economists this timely collection of essays offers new perspectives on an area that is currently of enormous economic strategic and geo political relevance

The Making of Eurasia Moritz Pieper, 2021-09-09 The Making of Eurasia investigates the multi layered spectrum of China and Russia s Eurasian policies towards each other ranging from competition to cooperation as well as the role of regional actors in between The book examines the impact of and responses to the dynamic Sino Russian interaction in the wake of China s Belt and Road initiative focusing on the selected case studies of Kazakhstan Mongolia and Uzbekistan but also on inter regional implications across the Eurasian space With China s imprint on inter regional politics and ambition to make a distinctive Chinese contribution to globalization and Russia s vision of a Greater Eurasia in which Moscow stakes out a place for itself as an indispensable power other regional actors adopt policies that respond to and co shape the resulting centrifugal forces Meanwhile power shifts are underway on a global plane as the normative divide between Russia and the West has widened and as the Sino American rivalry is intensifying The book therefore also sheds light on the effects of Eurasian power shifts on global governance in a context where global leadership is contested and in which the US and Europe are re defining their relationship not only towards a self confident China but also towards each other As such this study will provide valuable insight for students and scholars of Eurasian Asia Studies Foreign Policy Analysis and International Relations at large
