The Russian Ecclesiastical Mission in Peking During the Eighteenth Century Eric D. Widmer, Bic Widmer, 1976 **The Russian General Staff and Asia, 1860-1917** Alex Marshall, 2006-11-22 This new book examines the role of the Tsarist General Staff in studying and administering Russia's Asian borderlands. It considers the nature of the Imperial Russian state, the institutional characteristics of the General Staff and Russia's relationship with Asia. During the nineteenth century, Russia was an important player in the so-called Great Game in central Asia. Between 1800 and 1917, officers of the Russian General Staff travelled extensively through Turkey, central Asia and the Far East, gathering intelligence that assisted in the formation of future war plans. It goes on to consider tactics of imperial expansion and the role of military intelligence and war planning with respect to important regions including the Caucasus, central Asia and the Far East. In the light of detailed archival research, it investigates objectively questions such as the possibility of Russia seizing the Bosphorus Straits and the probability of an expedition to India. Overall, this book provides a comprehensive account of the Russian General Staff, its role in Asia and of Russian military planning with respect to a region that remains highly strategically significant today.

Ambitious innovations characterized the work in traditional and new foreign mission fields, but the most radical changes occurred in the institutionalization of what contemporaries referred to as the home base of the mission movement. Valentin Rabe focuses on the recruitment of personnel, fundraising, administration.

A Financial Times Best Book of the Year The untold story of how Russian espionage in imperial China shaped the emergence of the Russian Empire as a global power From the seventeenth to the nineteenth century the Russian Empire made concerted efforts to collect information about China It bribed Chinese porcelain makers to give up trade secrets sent Buddhist monks to Mongolia on intelligence gathering missions and trained students at its Orthodox mission in Beijing to spy on their hosts From diplomatic offices to guard posts on the Chinese frontier Russians were producing knowledge everywhere not only at elite institutions like the Academy of Sciences in St Petersburg But that information was secret not destined for wide circulation Gregory Afinogenov distinguishes between the kinds of knowledge Russia sought over the years and argues that they changed with the shifting aims of the state and its perceived place in the world In the seventeenth century Russian bureaucrats were focused on China and the forbidding Siberian frontier They relied more on spies including Jesuit scholars stationed in China In the early nineteenth century the geopolitical challenge shifted to Europe rivalry with Britain drove the Russians to stake their prestige on public facing intellectual work and knowledge of the East was embedded in the academy None of these institutional configurations was especially effective in delivering strategic or commercial advantages But various knowledge regimes did have their consequences Knowledge filtered through Russian espionage and publication found its way to Europe informing the encounter between China and Western empires Based on extensive archival research in Russia and beyond *Spies and Scholars* breaks down long accepted assumptions about the connection between knowledge regimes and imperial power and excavates an intellectual legacy largely neglected by historians      *Red at Heart* Elizabeth McGuire, 2018 From a debut author an intimate multigenerational narrative of the Russian and Chinese revolutions through the eyes of the Chinese youth who traveled to the Soviet Union and the fate of their blended offspring      *Science In China, 1600-1900: Essays* By Benjamin A Elman Benjamin A Elman, 2015-05-07 Distinguished historian Benjamin A Elman's collective volume on the history of science in imperial China brings together over 30 years of historical literature on the subject With updates to the literature and new material including transcripts of podcasts and translated interview articles *Science in China* takes the reader on a journey starting in the early 17th century with the missionary efforts of the Jesuits in China and ending with the Protestant missions in the 19th century These two milestone encounters brought Western sciences to local Chinese scholars with great success in shaping modern Chinese science Elman studies the interaction between Western and Chinese sciences through philological research and evidence and treats the two encounters not as separate events but as a continuum of creative exchange of scientific knowledge and discourse      *Christianity in China* Xiaoxin Wu, 2015-07-17 Now revised and updated to incorporate numerous new materials this is the major source for researching American Christian activity in China especially that of missions and missionaries It provides a thorough introduction and

guide to primary and secondary sources on Christian enterprises and individuals in China that are preserved in hundreds of libraries archives historical societies headquarters of religious orders and other repositories in the United States It includes data from the beginnings of Christianity in China in the early eighth century through 1952 when American missionary activity in China virtually ceased For this new edition the institutional base has shifted from the Princeton Theological Seminary Protestant to the Ricci Institute for Chinese Western Cultural Relations at the University of San Francisco Jesuit reflecting the ecumenical nature of this monumental undertaking     The Sichuan Frontier and Tibet Yingcong Dai,2011-07-01 During China s last dynasty the Qing 1644 1911 the empire s remote bleak and politically insignificant Southwest rose to become a strategically vital area This study of the imperial government s handling of the southwestern frontier illuminates issues of considerable importance in Chinese history and foreign relations Sichuan s rise as a key strategic area in relation to the complicated struggle between the Zunghar Mongols and China over Tibet Sichuan s neighbor to the west and consequent developments in governance and taxation of the area Through analysis of government documents gazetteers and private accounts Yingcong Dai explores the intersections of political and social history arguing that imperial strategy toward the southwestern frontier was pivotal in changing Sichuan s socioeconomic landscape Government policies resulted in light taxation immigration into Sichuan and a military market for local products thus altering Sichuan but ironically contributing toward the eventual demise of the Qing Dai s detailed objective analysis of China s historical relationship with Tibet will be useful for readers seeking to understand debates concerning Tibet s sovereignty Tibetan theocratic government and the political dimension of the system of incarnate Tibetan lamas of which the Dalai Lama is one
