Sabkha Ecosystems M. Ajmal Khan, Benno Böer, Münir Öztürk, Thabit Zahran Al Abdessalaam, Miguel Clüsener-Godt, Bilquees Gul, 2014-05-26 Sustainable development is the key for the survival in 21st century The natural resources are finite and cannot be used with impunity because we are the custodian of these resources and have responsibility to pass these to the next generation This monumental task requires several major commitments and most important of them is to arrest population explosion which has already reached seven billion Natural resources like air to breath food to eat and water to drink and fossil fuel to maintain this life style are being overexploited Unrestrained consuming culture will accelerate undesired situation This

situation will have more dire consequences in resource limited ecosystems like dry lands Given the severe scarcity of water ever increasing population and soil salinization out of the box solutions for the provision of food and clean energy is required to spare meager fresh water resources for conventional agriculture This volume contains a number of articles dealing with halophyte ecology bio geography ecophysiology hyper saline soils biofuels biosaline agriculture biosaline landscaping climate change mitigation and biodiversity It also contains the communication of innovative ideas such as the research into floating mangroves seagrass terraces as well as a World Halophyte Garden containing all known salt tolerant plant species It is hoped that the information provided will not only advance vegetation science but that it will truly generate more interdisciplinarity networking awareness and inspire farmers and agricultural and landscaping stakeholders to seriously engage in halophyte cash crop production in coastal hyper saline areas

Blue Carbon Mangrove Ecosystems Miguel Clüsener-Godt, Hiroyuki Matsuda, Benno Böer, Ronald A. Loughland, 2024-10-14 Blue carbon ecosystems are of tremendous value toward the utilization of high salinity water such as seawater as well as hyper saline soils and salt tolerant biota for the production of biomass for food feed fiber fuel other economic purposes and carbon sequestration In order to achieve the 17 SDGs the scientific research into blue carbon

ecosystems is an absolutely important element Moreover monitoring is needed as well as the conservation of the remaining blue carbon ecosystems and the restoration of lost habitat The book will provide comprehensive scientific documentation inspiring the way forward on how to utilize saline resources in the best interest of humanity It will try to foster the academic research and networking for land users politicians development banks innovative farmers investors energy producers and carbon off setters The papers presented in this book emanate from a conference held at the Yokohama National University Japan in January 2023

Ecophysiology, Abiotic Stress Responses and Utilization of Halophytes Mirza Hasanuzzaman,Kamrun Nahar,Münir Öztürk,2019-04-12 Halophytes are those plant species that can tolerate high salt concentrations There are diversified species

of halophytes suited for growth in various saline regions around the world e.g coastal saline soil soils of mangrove forests wetlands marshlands lands of arid and semiarid regions and agricultural fields These plants can be grown in soil and water containing high salt concentrations and unsuitable for conventional crops and can be good sources of food fuel fodder fiber essential oils and medicine Moreover halophytes can be exploited as significant and major plant species for the desalination and restoration of saline soils as well as phytoremediation This book highlights recent advances in exploring the unique features of halophytes and their potential uses in our changing environment Halophyte Plant Diversity and Public Health Münir Öztürk, Volkan Altay, Moona Nazish, Mushtaq Ahmad, Muhammad Zafar, 2023-03-01 Salinity is one of the acute problems causing enormous yield loss in many regions of the world This phenomenon is particularly pronounced in arid and semiarid regions Halophytes can remove salt from various types of problematic soils due to their unique morphological physiological and anatomical adaptations to these environments Halophytes are also used for the treatment of certain diseases but scientific documentation in terms of current phytotherapeutic applications is deficient in this unique group of plants Different ethnic groups around the world use medicinal halophytes according to their own beliefs and ancestor s experiences However their knowledge about the use of salt tolerant medicinal plants is usually confined to their own community There is thus a knowledge gap on halophytes which should be bridged and preserved This book provides a comprehensive account on the distribution of halophytes their ethnobotanical and medicinal aspects economic importance and chemical constituents along with scientific description The book therefore serves as a valuable resource for professionals and researchers working in the fields of plant stress biology and ethnobotanical aspects *Biorefinery* Juan-Rodrigo Bastidas-Oyanedel, Jens Ejbye Schmidt, 2019-04-15 This book discusses the biorefinery of biomass feedstocks In depth chapters highlight the scientific and technical aspects and present a techno economic analysis of such systems By using a TEA approach the authors present feasible pathways for the conversion of biomass both residual biomass energy crops and algae biomass showing the different possibilities for the production of biochemical materials biofuels and fertilizers The concepts presented in this book will link companies investors and governments by providing a framework that will help reduce pollutants and create a biomass related economy that incorporates the newest developments and technologies in the area **Global Biodiversity** T. Pullaiah, 2018-12-07 This is the first volume in the new multi volume set Global Biodiversity Each volume in this series aims to provide insightful information on the biodiversity of selected nations in particular regions The volumes summarize the available data on both wild and cultivated plants wild and domesticated animals and microbes of the different nations Global Biodiversity Volume 1 Selected Countries in Asia focuses on selected countries of Asia providing an abundance of biodiversity information on Afghanistan Bangladesh India Indonesia Iran Iraq Japan Lebanon Malaysia Mongolia Myanmar Nepal and Vietnam The first chapter in the volume provides an informative overview of what is biodiversity along with biogeographic classifications It provides explanations of biodiversity patterns and species number

biodiversity conservation protection and international commitments and cooperation biodiversity threats and drivers of change such as human population growth climate change land use change and the economics of biodiversity as well

Biosaline Agriculture and High Salinity Tolerance Chedly Abdelly,Münir Öztürk,Muhammad Ashraf,Claude Grignon,2008-04-18 A major worldwide threat to agricultural productivity is undoubtedly due to environments with stressful factors including drought salinity and extreme temperatures Based on contributions presented at the International Conference on Biosaline Agriculture and High Salinity Tolerance held in Gammarth Tunisia November 2006 this book reviews the current state of knowledge in biosaline agriculture and high salinity tolerance in plants *Halophytes and Climate Change* Mirza Hasanuzzaman,Sergey Shabala,Masayuki Fujita,2019-02-14 This book contains current knowledge and the most recent developments in the field of halophyte biology ecology and potential uses Halophytes are characterized as plants that can survive and complete their life cycle in highly saline environments This book explores the adaptive mechanisms and special features of halophytes that allow them to grow in environments that are unsuitable for conventional crops and considers their role as a source of food fuel fodder fiber essential oils and medicines Halophytes and Climate Change includes coverage of Special morphological anatomical and physiological features of halophytes Ion accumulation patterns and homeostasis in halophytes Potential use of halophytes in the remediation of saline soil Growth and physiological response and tolerance to toxicity and drought Mangrove ecology physiology and adaptation Written by a team of international authors and presented in full color this book is an essential resource for researchers in the fields of plant physiology ecology soil science environmental science botany and agriculture
