## **Sacred Architecture:**

Water and Sacred Architecture Anat Geva, 2023-05-25 This edited book examines architectural representations that tie water as a physical and symbolic property with the sacred. The discussion centers on two levels of this relationship: how water influenced the sacredness of buildings across history and different religions, and how sacred architecture expressed the spiritual meaning of water. The volume deliberately offers original material on various unique contextual and design aspects of water and sacred architecture rather than an attempt to produce a historic chronological analysis on the topic or focusing on a specific geographical region. As such, this unique volume adds a new dimension to the study of sacred architecture. The book's chapters are compiled by a stellar group of scholars and practitioners from the US, Canada, Europe, Asia, and Africa. It addresses major aspects of water in religious buildings such as rituals, pilgrimage, water as a cultural material, and place-making. Hydro systems, modern practices, environmental considerations, the contribution of water to transforming secular into sacred, and future digital/cyber context of water and sacredness. All chapters are based on original archival studies, historical documents, and field visits to the sites and buildings. These examinations show water as an expression of architectural design, its materiality, and its spiritual values. The book will be of interest to architects, historians, environmentalists, archaeologists, religious scholars, and preservationists.

Symbols and Language in Sacred Christian Architecture Radu Dragan, Augustin Ioan, 1996 This volume addresses questions regarding contemporary interpretation of the language of sacred and religious buildings. While inspired by Heidegger's hermeneutic approach as well as by Chomsky's view on language and Eliade's archetypes and symbols, its interpretive hypothesis appropriates the Orthodox Christian perspective on church architecture. The second half of the book is a close reading of the Bible pertaining to questions on architecture and is presented both historically and symbolically. The purpose of the interpretation is to trace back the possible grounds for a primitive hut of the sacred space, the never-existing first Christian church. In an environment striving for a renewed ecumenical unity, such a hermeneutical approach on sensitive issues such as sacred religious architecture pursued by two architectural scholars from Eastern Europe's Romania is meant to propose a fresh overview of a timeless question.

**Sacred Buildings** Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume, space, and form. Sacred architecture is far less determined than other building tasks by functional requirements, norms, and standards. As a rule, it is free to unfold as pure architecture. Thus, in design terms, this building task offers enormous freedoms to the architect. At the same time, however, the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions. In a systematic section, this volume introduces the design, technical, and planning fundamentals of building churches, synagogues, and mosques. In its project section, it also presents about seventy realized structures from the last three decades. Drawing upon his in-depth knowledge of the subject and his many years of publishing experience, the author offers a valuable analysis.

Modern Architecture and the Sacred Ross Anderson,Maximilian Sternberg,2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment

period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

*Modernism and American Mid-20th Century Sacred Architecture*  
Anat Geva,2018-10-08 Mid 20th century sacred architecture in America sought to bridge modernism with religion by abstracting cultural and faith traditions and pushing the envelope in the design of houses of worship Modern architects embraced the challenges of creating sacred spaces that incorporated liturgical changes evolving congregations modern architecture and innovations in building technology The book describes the unique context and design aspects of the departure from historicism and the renewal of heritage and traditions with ground breaking structural features deliberate optical effects and modern aesthetics The contributions from a pre eminent group of scholars and practitioners from the US Australia and Europe are based on original archival research historical documents and field visits to the buildings discussed Investigating how the authority of the divine was communicated through new forms of architectural design these examinations map the materiality of liturgical change and communal worship during the mid 20th century

**The Return of Sacred Architecture** Herbert Bangs,2006-11-14 An inspirational call for a return to the tenets of traditional architecture as a remedy for the dehumanizing standards of modern architecture Explains how modern architecture is emblematic of our current estrangement from the spiritual principles that shaped humanity s greatest civilizations Reveals how the ancient laws of sacred proportion and harmony can be restored The ugly buildings that characterize the modern landscape are inferior not only to the great cathedrals of medieval Europe and the temples of ancient Egypt and Greece but even to lesser buildings of the more recent past The great masterworks of our ancestors spoke to humanity s higher nature Architect Herbert Bangs reveals how today s dysfunctional buildings bring out the worst in humanity reinforcing that which is most base within us He shows how through the ancient laws of proportion and number architecture once expressed the harmonious relationship between man and the cosmos In early times the architect worked within a sacred and esoteric tradition of creating structures through which human beings could gain insight into the nature of the divine reality Today that tradition has been abandoned in favor of narrowly defined utilitarian principles of efficiency and economy In *The Return of Sacred Architecture* Bangs provides the key to freeing architecture from the crude functionality of the twentieth century the architects of the modern human landscape must find the deep felt connection to the cosmos that guided the inner lives of those who built the temples of the past The form of their buildings will then reflect the sacred patterns of geometry and proportion and bring forth

greater harmony in the world      The Sacred Architecture of Byzantium Nicholas N. Patricios, 2014-04-24 The churches of the Byzantine era were built to represent heaven on earth Architecture art and liturgy were intertwined in them to a degree that has never been replicated elsewhere and the symbolism of this relationship had deep and profound meanings Sacred buildings and their spiritual art underpinned the Eastern liturgical rites which in turn influenced architectural design and the decoration which accompanied it Nicholas N Patricios here offers a comprehensive survey from the age of Constantine to the fall of Constantinople of the nexus between buildings worship and art His identification of seven distinct Byzantine church types based on a close analysis of 370 church building plans will have considerable appeal to Byzantinists lay and scholarly Beyond categorizing and describing the churches themselves which are richly illustrated with photographs plans and diagrams the author interprets the sacred liturgy that took place within these holy buildings tracing the development of the worship in conjunction with architectural advances made up to the 15th century Focusing on buildings located in twenty two different locations this sumptuous book is an essential guide to individual features such as the synthronon templon and ambo and also to the wider significance of Byzantine art and architecture      Sacred Architecture in a Secular Age Marie Clausén, 2016-02-26 Having won more than one recent poll as Britain's best loved building the appeal of Durham Cathedral appears abiding which begs the question whether an iconic sacred building can retain meaning and affective pertinence for contemporary secular visitors Using the example of Durham Cathedral this book sets out to explore wherein the appeal of historic churches lies today and considers questions of how and why their preservation into a post Christian era should be secured By including feedback from visitors to the cathedral and the author's own very personal account of the cathedral in the form of an ekphrasis this work seeks to privilege an interpretation of architecture that is based on the individual experience rather than on more conventional narratives of architecture history and cultural heritage policy Recognising the implication of our choice of narrative on the perceived value of historic churches is crucial when deliberating their future role This book puts forth a compelling case for historical sacred architecture suggesting that its loss through imperceptive conservation practices as much as through neglect or demolition would diminish us all secularists atheists and agnostics included      The Sacred In-Between: The Mediating Roles of Architecture Thomas Barrie, 2013-09-13 The sacred place was and still is an intermediate zone created in the belief that it has the ability to co join the religious aspirants to their gods An essential means of understanding this sacred architecture is through the recognition of its role as an in between place Establishing the contexts approaches and understandings of architecture through the lens of the mediating roles often performed by sacred architecture this book offers the reader an extraordinary insight into the forces behind these extraordinary buildings Written by a well known expert in the field the book draws on a unique range of cases reflecting on these inspiring places their continuing ontological significance and the lessons they can offer today Fascinating reading for anyone interested in sacred architecture      **Sacred Architecture, Its Rise, Progress, and Present State** Richard
