Marie Cartier

Sacred Profane:

The Sacred and the Profane Mircea Eliade, 1959 Famed historian of religion Mircea Eliade observes that even moderns who proclaim themselves residents of a completely profane world are still unconsciously nourished by the memory of the sacred Eliade traces manifestations of the sacred from primitive to modern times in terms of space time nature and the cosmos In doing so he shows how the total human experience of the religious man compares with that of the nonreligious This book serves as an excellent introduction to the history of religion but its perspective also encompasses philosophical anthropology phenomenology and psychology It will appeal to anyone seeking to discover the potential dimensions of human existence P 4 of cover

Culture and Power David Swartz, 1997 Pierre Bourdieu is one of the world's most important social theorists and is also one of the great empirical researchers in contemporary sociology However reading Bourdieu can be difficult for those not familiar with the French cultural context and until now a comprehensive introduction to Bourdieu's oeuvre has not been available David Swartz focuses on a central theme in Bourdieu's work the complex relationship between culture and power and explains that sociology for Bourdieu is a mode of political intervention Swartz clarifies Bourdieu's difficult concepts noting where they have been misinterpreted by critics and where they have fallen short in resolving important analytical issues The book also shows how Bourdieu has synthesized his theory of practices and symbolic power from Durkheim Marx and Weber and how his work was influenced by Sartre Levi Strauss and Althusser Culture and Power is the first book to offer both a sympathetic and critical examination of Bourdieu's work and it will be invaluable to social scientists as well as to a broader audience in the humanities

Discourse on Sacred and Profane Images Gabriele Paleotti, 2012 In the wake of the Counter Reformation Cardinal Gabriele Paleotti the archbishop of Bologna wrote a remarkable treatise on art during a time when the Church feared rampant abuse in the arts Translated into English here for the first time Paleotti's Discourse on Sacred and Profane Images argues that art should address a broad audience and explains the painter's responsibility to his spectators The Discourse is introduced by historian Paolo Prodi who explains how even if the archbishop did not succeed in reforming the arts Paleotti's treatise constituted one last synthesis of art as a reading of creation and salvation history and sacred art as a vehicle of devotion

Modernity and Subjectivity Harvie Ferguson, 2000 Few concepts have come to dominate the human sciences as much as modernity yet there is very little agreement over what the term actually means Every aspect of contemporary human reality modern society modern life modern times modern art modern science modern music the modern world has been cited as a part of modernity's distinctive and all embracing presence But what is the exact nature of the reality to which the term modern refers Has not such a promiscuous ill defined concept come to obscure and confuse rather than clarify a genuine understanding of our experience Harvie Ferguson proposes a new view of modernity arguing that although it may variously be associated with the Renaissance the European discovery of the New World the Reformation the Industrial Revolution and many other significant ruptures with primitive or premodern society modernity fails as an idea if it only defines itself against what it replaced Instead he writes modernity finds its clearest definition through an exploration of subjectivity For the modern world there is no higher authority than experience No longer is the human world subordinate to a divine reality beyond the capacity of its own senses This idea finds its greatest expression in the philosophy of doubt originated by Descartes Doubt seemed the radical starting point from which to found a wholly modern philosophy that makes the distinction between subject and object but those who came after Descartes soon reached the limits of self discovery and became trapped in deepening levels of despair This despair in turn found expression in the concepts of self and other and eventually in a dialectic of ego and world which distinguishes and links together the most important social cultural and psychological aspects of modernity Moving beyond these dualities of subject and object mind and body ego and world and replacing them with the triad of body soul and spirit Ferguson redraws the map of contemporary experience finding links with the premodern world that modernity's self founding concealed

The City at Its Limits Daniella Gandolfo, 2009-08-01 In 1996 against the backdrop of Alberto Fujimori's increasingly corrupt national politics an older woman in Lima Peru part of a group of women street sweepers protesting the privatization of the city's cleaning services stripped to the waist in full view of the crowd that surrounded her Lima had just launched a campaign to revitalize its historic districts and this shockingly transgressive act was just one of a series of events that challenged the norms of order cleanliness and beauty that the

renewal effort promoted *The City at Its Limits* employs a novel and fluid interweaving of essays and field diary entries as Daniella Gandolfo analyzes the ramifications of this act within the city's conflicted history and across its class divisions. She builds on the work of Georges Bataille to explore the relation between taboo and transgression while Peruvian novelist and anthropologist Jos Mar a Arguedas's writings inspire her to reflect on her return to her native city in movingly intimate detail. With its multiple perspectives, personal, sociological, historical, and theoretical, *The City at Its Limits* is a pioneering work on the cutting edge of ethnography.

Louis Dumont and Hierarchical Opposition Robert Parkin, 2009-03 The work of Louis Dumont, who died in 1998, on India and modern individualism represented certain theoretical advances on the earlier structuralism of Claude Lévi Strauss. One such advance is Dumont's idea of hierarchical opposition, which he proposed as a truer representation of indigenous ideologies than Lévi Strauss's binary opposition. In this book, the author argues that, although structuralism is often thought to have gone out of fashion, Dumont's greater concern with praxis and agency makes his own version of structuralism more contemporary. The work of his followers and fellow travelers, as well as his own, indicates that hierarchical opposition is capable of taking structuralism in new and more realistic directions, reminding us that it has never been the preserve of Lévi Strauss alone.

Teaching Durkheim Terry F. Godlove, 2005 Emile Durkheim's work on religion occupies a central place in religious studies classrooms today. This volume is designed as a resource for teachers, offering practical advice about productive ways to approach central texts and difficult pedagogical issues.

Baby, You are My Religion Marie Cartier, 2014-09-11 *Baby You Are My Religion* argues that American butch/femme bar culture of the mid-20th Century should be interpreted as a sacred space for its community. Before Stonewall, when homosexuals were still deemed mentally ill, these bars were the only place where many could have any community at all. *Baby You are My Religion* explores this community as a site of a lived corporeal theology and political space. It reveals that religious institutions such as the Metropolitan Community Church were founded in such bars; that traditional and non-traditional religious activities took place there; and that religious ceremonies such as marriage were often conducted within the bars by staff. *Baby You are My Religion* examines how these bars became not only ecclesiastical sites but also provided the fertile ground for the birth of the struggle for gay and lesbian civil rights before Stonewall.
