*Information Theory* , **Perspectives on the Ideas of Gregory Bateson, Ecological Intelligence, and Educational Reforms** C. A. Bowers, 2011 It is widely acknowledged that Gregory Bateson s ideas have been influential in a number of fields Unfortunately the importance of his ideas for understanding why public schools and universities continue to perpetuate ecologically unsustainable ways of thinking has not been adequately recognized Given the deepening ecological and economic crises this book is particularly timely as it clarifies how Bateson s five key ideas when taken as a whole provides the conceptual framework for introducing educational reforms that address both problems That is he explains why educators unconsciously continue to perpetuate the deep cultural assumptions that were constituted before there was an awareness of environmental limits and how the emphasis on a possessive form of individualism and endless material progress undermines traditions of self reliance within the world s diversity of communities His contributions to making substantive educational reforms include 1 Rethinking social justice issues in ways that take account of how the ecological crisis impacts the most vulnerable people 2 How to make the transition to exercising ecological intelligence in the areas of democratic decision making and moral values 3 Clarifying how computer mediated learning perpetuates abstract thinking and the deep cultural

assumptions that are at the cultural roots of the ecological and economic crises The chapter on pedagogical and curricular decisions that foster ecological intelligence provides practical suggestions for how public school teachers and university professors can begin to make the transition to an ethnically diverse and ecologically sustainable future Comments about the book We need an ecological consciousness which in Gregory Bateson s words is aware of the patterns that connect Chet Bowers leads us into that unmapped territory with a compass which helps Wes Jackson President The Land Institute author of Consulting the Genius of Place and Rooted in the Land Essays on Community and Place Chet Bowers philosophical reflections on Bateson s thought and its implications for education are thought provoking challenging and very inspiring Fritjof Capra author of The Web of Life and The Hidden Connections *neuro-linguistic programming: Liberating Parents* Keith Gilbert,2009-12-12 Considered by many to be the most thought provoking and exciting book ever written for parents Liberating Parents shows you how to recognise and free yourself from limitations in your thinking that you have been encouraged to accept throughout your life You can only give what you have When you are free you will relate to children through that freedom For more information you can visit my website at [www neurolinguisticparents com](http://www.neurolinguisticparents.com) If you want to discuss any aspects of the book please join us at the Liberating Parents facebook group at [www facebook com group php gid 29761887925](http://www.facebook.com/group.php/gid/29761887925) Epistemology and the Predicates of Education Thomas Peterson,2019-07-10 Exploring the predicates of education from theoretical practical and historical perspectives this book revalorizes the central role of the humanities in the ethical and aesthetic formation of the individual This book considers timely questions of process and epistemology in today s academy It examines the subject of learning as it arises in the individual is defined by educators and is conceived by society at large In attempting to formulate a lingua franca for contemporary pedagogy the book highlights the concrete activities of educators and students and the qualities that emerge in the educational process By synthesizing the writings of educational theorists working in different fields philosophy psychology anthropology and more Epistemology and the Predicates of Education highlights the transformational nature of knowledge and its capacity to invigorate the student through the practice of self inquiry The analytical and focused research offered in Epistemology and the Predicates of Education will be of interest to researchers academics and postgraduate students in the fields of philosophy of education and higher education The Oxford Handbook of Process Philosophy and Organization Studies Jenny Helin,Tor Hernes,Daniel Hjorth,Robin Holt,2014-05-15 Process approaches to organization studies focus on flow activities and evolution understanding organizations and organizing as processes in the making They stand in contrast to positivist approaches that see organizations and phenomena as fixed static and measurable Process approaches draw on a range of ideas and philosophies The Handbook examines 34 philosophers and social theorists both those commonly linked to process thinking such as Whitehead Bergson and James and those that are not as often addressed from a process perspective such as Dilthey and Tarde Each chapter addresses the background and context of this thinker their work with a focus on the processual elements
