Sacreds Of The World:

Sacred Language, Sacred World Joshua D. Broggi, 2015-12-17 Heidegger and Gadamer are typically read by different theologians Heidegger tends to be read by philosophical theologians examining his contribution to matters of doubt existential finitude and atheism Gadamer tends to be read by those with an interest in interpreting the Bible especially by those with more confessional or epistemically optimistic sensibilities In both cases Heidegger and Gadamer have well established associations with specific theological positions Joshua Broggi challenges this arrangement by re reading the primary texts as theological resources he defends an alternative theological appropriation of their philosophical work through a close engagement with portions of their argument What emerges from Broggi s examination is an account of the unity of tradition reason and scriptural language This account goes beyond claims of their relatedness which are uncontroversial and advances the stronger argument that they name the very same thing Although initially counterintuitive the central task set by both Heidegger and Gadamer is the investigation of that one phenomenon This argument challenges the pervasive image in which Christians rely on tradition to reason about the meaning of scripture It puts into question the injunction that theologians should balance the resources of scripture tradition and reason Broggi offers an account of Christian life as more fundamental than certain entities which are distilled out of it namely scripture tradition and reason

represent Berry's best work covering such issues as human beings' modern alienation from nature and the possibilities of future regenerative forms of religious experience. Asking that we create a new story of the universe and the emergence of the Earth within it, Berry resituates the human spirit within a sacred totality. **Understanding New Religious Movements**

John A. Saliba, 2004-09-08. Discussions of any religion can easily raise passions. But arguments tend to become even more heated when the religion under discussion is characterized as new. Divisions around the study of new religious movements (NRMs) or cults or nontraditional or alternative or emergent religions are so acute that there is even controversy over what to call them. John Saliba strives to bring balance to these discussions by offering perspectives on new religions from different academic perspectives: history, psychology, sociology, law, theology, and counseling. This approach provides rich descriptions of a broad range of movements while demonstrating how the differing aims of the disciplines can create much of the controversy around NRMs. The new second edition has been updated and revised throughout and includes a new foreword by noted historian of religion J. Gordon Melton. For classes in religion or the social sciences or for interested individuals,

Understanding New Religious Movements offers the most objective introduction possible. Sacred Books of the East
Epiphanius Wilson, 1899. *Seeking the Sacred with Psychoactive Substances*. J. Harold Ellens, 2014-10-28. Can drugs be used intelligently and responsibly to expand human consciousness and heighten spirituality? This two-volume work presents objective scientific information and personal stories aiming to answer the question. The first of its kind, this intriguing two-volume set objectively reports on and assesses this modern psycho-social movement in world culture: the constructive medical use of entheogens and related mind-altering substances. Covering the use of substances such as ayahuasca, cannabis, LSD, peyote, and psilocybin, the work seeks to illuminate the topic in a scholarly and scientific fashion so as to lift the typical division between those who are supporters of research and exploration of entheogens and those who are strongly opposed to any such experimentation altogether. The volumes address the history and use of mind-altering drugs in medical research and religious practice in the endeavor to expand and heighten spirituality and the sense of the divine, providing unbiased coverage of the relevant arguments and controversies regarding the subject matter. Chapters include examinations of how psychoactive agents are used to achieve altered states in Judaism, Christianity, Islam, and Buddhism, as well as in the rituals of shamanism and other less widely known faiths. This highly readable work will appeal to everyone from high school students to seasoned professors in both the secular world and in devoted church groups and religious colleges. Space, Place and Religious Landscapes
Darrelyn Gunzburg, Bernadette Brady, 2020-10-01. Exploring sacred mountains around the world, this book examines whether bonding and reverence to a mountain is intrinsic to the mountain constructed by people or a mutual encounter. Chapters explore mountains in England, Scotland, Wales, Italy, Ireland, the Himalaya, Japan, Greece, USA, Asia, and South America and embrace the union of sky, landscape, and people to examine the religious dynamics between human and non-human entities. This book takes as its starting point the fact that mountains physically mediate between land and sky and

act as metaphors for bridges from one realm to another recognising that mountains are relational and that landscapes form personal and group cosmologies The book fuses ideas of space place and material religion with cultural environmentalism and takes an interconnected approach to material religio landscapes In this way it fills the gap between lived religious traditions personal reflection phenomenology historical context environmental philosophy myths and performativity In defining material religion as active engagement with mountain forming and humanshaping landscapes the research and ideas presented here provide theories that are widely applicable to other forms of material religion *Multicultural and Religious Perspectives on Protecting the Environment, the Biosphere, and Biodiversity* Joseph Tham, John Lunistroth, Sameer Advani, 2025-09-30 This thought provoking volume unites bioethics experts from seven major world religions Buddhism Christianity Confucianism Daoism Hinduism Islam and Judaism alongside secular thinkers to explore environmental protection through the lens of the UNESCO Declaration on Bioethics and Human Rights It foregrounds the power of diverse perspectives in addressing one of humanity's most pressing challenges the ecological crisis The contributions provide rich and distinct religious and cultural viewpoints as they confront the anthropological ethical and social dimensions of this crisis Showcasing dialogue where traditions and philosophies collide they offer unique insights into global bioethics and human rights that should inspire new ways of thinking and foster meaningful collaboration in the fight for our planet's future The book is valuable reading for researchers scholars and students in bioethics environmental ethics religious studies and beyond
