Boswell Irma S. Lustig, 2021-11-21 These eleven original essays by well known eighteenth century scholars five of them editors of James Boswell s journal or letters commemorate the bicentenary of

Boswell's death on May 19 1795 The volume illuminates both the life and the work of one of the most important literary figures of the age and contributes significantly to the scholarship on this rich period In the introduction Irma S Lustig sets the tone for the volume She reveals that the essays examining Boswell as Citizen of the World are deliberately paired with those that analyze his artistic skills to emphasize that Boswell's sophistication as a writer is inseparable from his cosmopolitanism The essays in Part I focus on the relationship of the Enlightenment at home and abroad to Boswell's personal development Marlies K Danziger restores to significant life the continental philosophers and theologians Boswell consulted in his search for religious certainty Peter Perreten examines Boswell's enraptured study of Italian antiquity and his responses to the European landscape Richard B Sher and Perreten document the personal and aesthetic influence of Henry Home Lord Kames Scottish jurist and leading Enlightenment figure on Boswell Michael Fry discusses Boswell's relationship with Henry Dundas political manager for Scotland and Thomas Crawford examines Boswell's long standing interest in the volatile political issues of the period including the French Revolution through his correspondence with William Johnson Temple In evaluation Boswell's performance as Laird of Auchinleck John Strawhorn documents his efforts to improve the estate by use of new agricultural methods The essays in Part II study aspects of Boswell's artistry in *Life of Johnson* the magnum opus that set a standard for biography Carey McIntosh examines Boswell's use of rhetoric and William P Yarrow offers a close scrutiny of metaphor Isobel Grundy invokes Virginia Woolf in demonstrating Boswell's acceptance of uncertainty as a biographer John B Radner reveals Boswell's self assertive strategies in his visit with Johnson at Ashbourne in September 1777 and finally Lustig examines as a subplot of the biography Johnson's patient efforts to win the friendship of Margaret Montgomerie Boswell An appendix by Hitoshi Suwabe serves scholars by providing the most exact account to date of Boswell's meetings with Johnson

Community of the College of Justice John Finlay, 2014-08-26 Drawing on Court of Session records uncovered by John Finlay this study investigates the important role of College members in the cultural and economic flowering of Scotland and argues that a single Law institution had a marked influence on the Scottish *Scottish Society, 1707-1830* Christopher A. Whatley, 2000 This book challenges conventional wisdom and provides new insights into Scottish social and economic history Christopher A Whatley argues that the Union of 1707 was vital for Scottish success but in ways which have hitherto been overlooked He proposes that the central place of Jacobitism in the historiography of the period should be revised Comprehensive in its coverage the book is based not only on an exhaustive reading of secondary material but also incorporates a wealth of new evidence from previously little used or unused primary sources

The Cambridge History of Eighteenth-century Philosophy Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted

The Language of Mineralogy Matthew D. Eddy, 2016-12-05 Classification is an important part of science yet the

specific methods used to construct Enlightenment systems of natural history have proven to be the *black and white* of studies of eighteenth century culture One reason that systematic classification has received so little attention is that natural history was an extremely diverse subject which appealed to a wide range of practitioners including wealthy patrons professionals and educators In order to show how the classification practices of a defined institutional setting enabled naturalists to create systems of natural history this book focuses on developments at Edinburgh's medical school one of Europe's leading medical programs In particular it concentrates on one of Scotland's most influential Enlightenment naturalists Rev Dr John Walker the professor of natural history at the school from 1779 to 1803 Walker was a traveller cleric author and advisor to extremely powerful aristocratic and government patrons as well as teacher to hundreds of students some of whom would go on to become influential industrialists scientists physicians and politicians This book explains how Walker used his networks of patrons and early training in chemistry to become an eighteenth century naturalist Walker's mineralogy was based firmly in chemistry an approach common in Edinburgh's medical school but a connection that has been generally overlooked in the history of British geology By explicitly connecting eighteenth century geology to the chemistry being taught in medical settings this book offers a dynamic new interpretation of the nascent earth sciences as they were practiced in Enlightenment Britain Because of Walker's influence on his many students the book also provides a unique insight into how many of Britain's leading Regency and Victorian intellectuals were taught to think about the composition and structure of the material world

Money in the Western Legal Tradition David Fox, Wolfgang Ernst, 2016-01-28 Monetary law is essential to the functioning of private transactions and international dealings by the state nearly every legal transaction has a monetary aspect Money in the Western Legal Tradition presents the first comprehensive analysis of Western monetary law covering the civil law and Anglo American common law legal systems from the High Middle Ages up to the middle of the 20th century Weaving a detailed tapestry of the changing concepts of money and private transactions throughout the ages the contributors investigate the special contribution made by legal scholars and practitioners to our understanding of money and the laws that govern it Divided in five parts the book begins with the coin currency of the Middle Ages moving through the invention of nominalism in the early modern period to cashless payment and the rise of the banking system and paper money then charting the progression to fiat money in the modern era Each part commences with an overview of the monetary environment for the historical period written by an economic historian or numismatist These are followed by chapters describing the legal doctrines of each period in civil and common law Each section contains examples of contemporary litigation or statute law which engages with the distinctive issues affecting the monetary law of the period This interdisciplinary approach reveals the distinctive conception of money prevalent in each period which either facilitated or hampered the implementation of economic policy and the operation of private transactions
