 habitat and status Includes color distribution maps Shows where to observe each species in the wild *Invasion Biology and
 Ecological Theory* Herbert H. T. Prins,Iain J. Gordon,2014-01-23 Many conservationists argue that invasive species form one
 of the most important threats to ecosystems the world over often spreading quickly through their new environments and
 jeopardising the conservation of native species As such it is important that reliable predictions can be made regarding the
 effects of new species on particular habitats This book provides a critical appraisal of ecosystem theory using case studies of
 biological invasions in Australasia Each chapter is built around a set of eleven central hypotheses from community ecology
 which were mainly developed in North American or European contexts The authors examine the hypotheses in the light of
 evidence from their particular species testing their power in explaining the success or failure of invasion and accepting or
 rejecting each hypothesis as appropriate The conclusions have far reaching consequences for the utility of community
 ecology suggesting a rejection of its predictive powers and a positive reappraisal of natural history *Birds of New Guinea*

 Zimmerman *Where Song Began* Tim Low,2016-09-27 An authoritative and entertaining exploration of Australia s
 distinctive birds and their unheralded role in global evolution Renowned for its gallery of unusual mammals Australia is also
 a land of extraordinary birds But unlike the mammals the birds of Australia flew beyond the continent s boundaries and
 around the globe many millions of years ago This eye opening book tells the dynamic but little known story of how Australia
 provided the world with songbirds and parrots among other bird groups why Australian birds wield surprising ecological
 power how Australia became a major evolutionary center and why scientific biases have hindered recognition of these
 discoveries From violent swooping magpies to tool making cockatoos Australia s birds are strikingly different from birds of
 other lands often more intelligent and aggressive often larger and longer lived Tim Low a renowned biologist with a rare
