Lost in the Chaos R. J. Snell, 2023-12-18 A world lacking transcendence is a world lacking hope a world locked in the despair of utter immanence Humans cannot long endure despair and so they contrive false substitutes for hope But these always disappoint This book first explores the despair that follows from radical immanence then the manifold false and flailing attempts to provide hope and then finally

hope in its fullness It is a troubling tale of malaise and feverish attempts to conjure alternatives especially through political rationalism humanitarianism and faux enchantment But after looking despair full in the face Lost in the Chaos also offers us a dynamic ontology a cognitional theory and the virtue of hope itself Yes ours is in many ways a hopeless age but in the end this hopelessness is a call to renewed hope which has never truly been lost **Lost in Wonders** Pasquale De

The origin of the cosmos Antonio Pinto Renedo,2022-01-04 First of all I would like to emphasize that the objective of this book is not to study the universe in a classical or materialistic way but rather to explain all its most important aspects but analyzed from a philosophical or metaphysical point of view It is true that it represents a bold description of the cosmos but this is better than simply denying all soul in matter as materialistic scientists do when they claim that the origin of all material phenomenon without consciousness is another material phenomenon without consciousness of itself It is surprising that there are so many universities and physics specialists at present yet very few wonder what the real reason for their

behavior is or if they are aware of what they are doing But materialistic scientists who deny the soul to people or matter always evasively answer that question saying that if matter and its particles react to the stimuli they receive it is because of other smaller particles but they always try to avoid it The true answer because if matter reacts and acts in this way it is simply because it is alive even if it is in a different way from what biologists call life because it is life even if it is mineral and not organic I would also like this book to serve to find a common point of understanding between the most spiritualistic ancient philosophy and the modern materialistic mentality that helps to understand the part of reason that each one has because it is so unscientific to deny the existence of the spirit or the life of matter as insisting on saying that ancient legends and superstitions are absolute truths The problem of contemporary society is that it lacks moral leadership which causes social anarchy this is due to the fact that religious organizations refuse to adapt to the times for fear that these changes will make them lose their power because if they accept changes in their fundamental ideas that would show that they are not infallible as they would have us believe This is arrogant behavior because they do not want to accept that many of the things in the world are outside of what they believe or understand simply because when their religions were founded they were not yet known This attitude causes a separation between science and religion that can only be redirected through moral renewal In reality spiritualism begins where materialism ends therefore scientists will never be able to understand the intimate reality of matter if they do not accept to analyze it from a spiritual point of view It must be borne in mind that a society that only relies on the material aspects of life but despises the spiritual ones is like a farmer who tries to make plants grow only with soil but without water it is evident that in this way it will fail With this book I have tried to answer in a single book the main philosophical questions that throughout history have confused humanity I have also tried to use clear and direct language so that readers do not have too many difficulties in understand its content I hope you find it useful

The Pursuit of Happiness and the American Regime Elizabeth Amato,2018-02-28 The Declaration of Independence claims that

individuals need liberty to pursue happiness but provides little guidance on the what of happiness Happiness studies and liberal theory are incomplete guides Happiness studies offer insights into what makes people happy but happiness policy risks becoming doctrinaire Liberal theory is better on personal liberty but weak on the what of happiness My argument is that American novelists are surer guides on the pursuit of happiness Treated as political thinkers my book offers a close reading of four American novelists Tom Wolfe Walker Percy Edith Wharton and Nathaniel Hawthorne and their critique of the pursuit of happiness With a critical and friendly eye they present the shortcomings of pursuing happiness in a liberal nation but also present alternatives and correctives possible in America Our novelists point us toward each other in friendship as our greatest resource to guide us towards happiness

A New Copernican Turn Doru Costache, Geraint F.

Lewis,2024-07-17 This short book discusses the latest in terms of cosmology s knowns and unknowns and sets out to ascertain the potential of Orthodox Christian theology for accommodating the current scientific view of the universe It also

addresses one of cosmology's unknowns: the destiny of the self in the vastness of space, a topic that has caused angst since the dawn of modern science. The book examines accordingly the signs of a New Copernican Turn within contemporary culture favouring the self and its meaningful encounters with the infinite universe at the forefront of which being the quest for a physics that views something akin to the self as undergirding reality, not as an inconsequential byproduct of natural phenomena. The book further shows that theological, spiritual and religious forms of nature contemplation and wonder facilitate the self's creative intersection with the universe. It amounts to an exercise in science engaged Orthodox theology that takes contemporary cosmology as a starting point. The intended audience of this book is scholars and researchers of science and religion, religious studies, philosophers and theologians.
