and women he has met through his work as a rabbi and a law enforcement chaplain with those of biblical figures such as Cain David and Bathsheba Samson Tamar and several of the prophets As in his last book *God at the Edge* Goldstein explores the shadow side of the human condition His accounts are often disturbing but his insights are always inspiring What he brings us is a message of particular relevance today namely that a journey through the wilderness be it emotional existential or geographical is a transformative and strengthening process even though it may not seem so at the time In chronicling the stories of survivors who have traveled through perilous and at times unexplored territory Goldstein not only shows us how to face the challenges of being human he also delivers a promise of meaning direction and hope in our lives **Primer One:**

This riveting account of medical detective work traces the story of kuru a fatal brain disease and the pioneering scientists who spent decades searching for its cause and cure Winner William H Welch Medal American Association for the History of Medicine Winner Ludwik Fleck Prize Society for Social Studies of Science Winner General History Award New South Wales Premier's History Awards When whites first encountered the Fore people in the isolated highlands of colonial New Guinea

during the 1940s and 1950s they found a people in the grip of a bizarre epidemic. Women and children succumbed to muscle weakness, uncontrollable tremors, and lack of coordination until death inevitably supervened. Facing extinction, the Fore attributed their unique and terrifying affliction to a particularly malign form of sorcery. In *The Collectors of Lost Souls*, Warwick Anderson tells the story of the resilience of the Fore through this devastating plague, their transformation into modern people, and their compelling attraction for a throng of eccentric and adventurous scientists and anthropologists. Battling competing scientists and the colonial authorities, the brilliant and troubled American doctor D. Carleton Gajdusek determined that the cause of the epidemic kuru was a new and mysterious agent of infection, which he called a slow virus, now called a prion. Anthropologists and epidemiologists soon realized that the Fore practice of eating their loved ones after death had spread the slow virus. Though the Fore were never convinced, Gajdusek received the Nobel Prize for his discovery. Now revised and updated, the book includes an extensive new afterword that situates its impact within the fields of science and technology studies and the history of science. Additionally, the author now reflects on his long engagement with the scientists and the people afflicted, describing what has happened to them since the end of kuru. This astonishing story links first contact encounters in New Guinea with laboratory experiments in Bethesda, Maryland; sorcery with science; cannibalism with compassion; and slow viruses with infectious proteins, reshaping our understanding of what it means to do science.
