Lost Steps 1st Edition:

Entangled Edens Candace Slater, 2002 The skill with which Slater combines various levels and modalities of narrative utilizing her personal experience as a colorful unifying thread is truly remarkable Antonio Candido author of *Antonio Candido On Literature and Society* Howard S Becker editor A very important book that quite gracefully elegantly and persuasively moves beyond the usual myth and history format to put at its center stories about the Amazon and the people who tell them Entangled Edens persuasively argues that the Amazon can only be grasped understood and come to terms with through its myths and stories It addresses a very real failing of modern environmentalism which for all its virtues tends to dehumanize and metaphorically depopulate when it does not villainize populations that do share its concerns or share them in very different ways Instead of forcing us to choose between land and people Slater uses the stories and the people who tell them to rethink human relations with nature and each other Richard White author of *The Organic Machine The Remaking of the Columbia River* Elegant erudite profoundly serious Entangled Edens is a source of inspiration and knowledge for the reader interested in the Amazon Without the cultural tradition and the life experience of Amazonia's people any analysis of the Amazon risks becoming inconsequential or opportunistic This is one of the powerful messages of this important reflection on the Amazon whose greatest riches are ultimately its people Candace Slater has written a book that will last Milton Hatoum author of *The Tree of the Seventh Heaven* 1994 and *The Brothers* 2002 [The Publishers' Circular and Booksellers' Record](#)

Heywood, 2022-01-11 The intention of this book is to demonstrate that curriculum design is a profoundly philosophical exercise that stems from perceptions of the mission of higher education Since the curriculum is the formal mechanism through which intended aims are achieved philosophy has a profound role to play in the determination of aims It is argued that the curriculum is far more than a list of subjects and syllabi or that it is the addition and subtraction of items from a syllabus or whether this subject should be added and that subject taken away This book explores how curricular aims and objectives are developed by re-examining the curriculum of higher education and how it is structured in the light of its increasing costs rapidly changing technology and the utilitarian philosophy that currently governs the direction of higher education It is concluded that higher education should be a preparation for and continuing support for life and work a consequence of which is that it has to equip graduates with skill in independent learning and its planning and reflective practice A transdisciplinary curriculum with technology at its core is deduced that serves the four realities of the person the job technology and society *Sophocles: The Trachiniae (1st ed. 1892)* Sophocles, Richard Claverhouse Jebb, 1908
