medicine Plinio Prioreschi, 1996 *Knowledge and Culture in the Early Dutch Republic* Klaas Berkel, Albert Clement, Arjan Dixhoorn, 2025-10-01 The Dutch Republic around 1600 was a laboratory of the Scientific Revolution of the seventeenth century Here conditions were favourable for the development of new ways of knowing nature and the natural philosopher Isaac Beeckman who was born in Middelburg in 1588 was a seminal figure in this context He laid the groundwork for the strictly mechanical philosophy that is at the heart of the new science Descartes and others could build on what they learned directly or indirectly from Beeckman As previous studies have mainly dealt with the scientific content of Beeckman's thinking this volume also explores the wider social scientific and cultural context of his work Beeckman was both a craftsman and a scholar and fruitfully combined artisanal ways of knowing with international scholarly traditions Beeckman's extensive private notebook offers a unique perspective on the cultures of knowledge that emerged in this crucial period in intellectual history Heraclides of Pontus Elizabeth Pender, 2017-07-28 Heraclides of Pontus hailed from the shores of the Black Sea He studied with Aristotle in Plato's Academy and became a respected member of that school During Plato's third trip to Sicily Heraclides served as head of the Academy and was almost elected its head on the death of Speusippus Heraclides' interests were diverse He wrote on the movements of the planets and the basic matter of the universe He adopted a materialistic theory of soul which he considered immortal and subject to reincarnation He discussed pleasure and like Aristotle he commented on the Homeric poems In addition he concerned himself with religion music and medical issues None of Heraclides' works have survived intact but in antiquity his dialogues were much admired and often pillaged for sententiae and the like The contributions presented here comment on Heraclides' life and thought They include *La Tradizione Papirologica di Eraclide Pontico* by Tiziano Dorandi *Heraclides Intellectual Context* by Jorgen Mejer and *Heraclides of Pontus and the Philosophical Dialogue* by Matthew Fox There is also discussion of Heraclides' understanding of pleasure and of the human soul *Heraclides on Pleasure* by Eckart Schuttrumpf and *Heraclides on the Soul and Its Ancient Readers* by Inna Kupreeva In addition there are essays that address Heraclides' physics and astronomical theories *Unjointed Masses A Note on Heraclides Physical Theory* by Robert W Sharples *Heliocentrism in or out of Heraclides* by Paul T Keyser *The Reception of Heraclides Theory of the Rotation of the Earth from Posidonius to Simplicius Texts Contexts and Continuities* by Robert B Todd and Alan C Bowen and *Heraclides of Pontus on the Motions of Venus and Mercury* by Alan C Bowen and Robert B Todd Finally there are essays that view Heraclides from the stand point of ancient medicine literary criticism and musical theory *Heraclides on Diseases and on the Woman Who Did Not Breathe* by **Medicine and Markets in the Graeco-Roman World and**

Beyond Rebecca Flemming, Laurence Totelin, 2020-01-01 For almost half a century Vivian Nutton has been a leading figure in the study of ancient and less ancient medicine. The field itself has been revolutionised over that time. In this volume distinguished colleagues and former students develop in his honour key themes of his ground breaking scholarship. Spanning from the Bronze Age to the Digital Age involving the cult of Artemis and the corpuscular theories of Asclepiades of Bithynia, the medicinal uses of beavers and the cost of health care and wet nursing, case histories, remedy exchange and the medical repercussions of political assassination, this book has at its centre the pluralism and diversity of the ancient medical marketplace. The lively interplay between choice and competition, unity and division, communication and debate so notable in Vivian Nutton's foundational vision of the world of classical medicine is richly examined across these pages. Livia Anthony A. Barrett, 2020-08-11 The author of *Rome Is Burning* separates fact from fiction as he examines the life of an ancient Roman figure made famous in the TV miniseries *I Claudius*. Livia, wife of the first Roman emperor Caesar Augustus and mother of the second Tiberius, wielded extraordinary power at the center of Roman politics. In this biography of Livia, the first in English, Anthony Barrett sets aside the portrait of a cunning and sinister schemer to reveal Livia as a complex figure whose enduring political influence helped shape Roman government long after her death. An excellent biography of Livia as appealing to the general reader as it is satisfying to the scholar. Colin M. Wells, Trinity University, San Antonio. In reading Anthony Barrett's biography of Livia, I not only learned about this remarkable woman but also gained a meaningful appreciation of life and society in her time. Howard Alper, President, The Royal Society of Canada. First rate. Mary Beard, *Times Literary Supplement*.

The Oxford Handbook of Science and Medicine in the Classical World Paul Keyser, with John Scarborough, 2018-06-26 This handbook synthesizes what is known and debated about science in the classical world of ancient Greece and Rome, also touching briefly on Egypt, Mesopotamia, India, and China. Each of its many essays provides a synthesis and synopsis of the concepts and models of one of the ancient natural sciences. **Bathing in Public in the Roman World** Garrett G.

Fagan, 2002 An uninhibited glance into the extensive baths of Rome. Peripatetic Philosophy in Context Francesco Verde, 2022-05-09 This book deals with some Aristotelian philosophers of the Hellenistic Age, ranging from Theophrastus of Eresus to Cratippus of Pergamum. The problem of knowledge, the question of time, and the doctrine of the soul are investigated by comparing these Peripatetic views with Aristotle's philosophy and, above all, by setting their doctrines within the broader framework of post-Aristotelian and Hellenistic philosophies: the Old Academy, Epicureanism, and Stoicism.

Tools and the Organism Colin Webster, 2023-11-24 Medicine is itself a type of technology involving therapeutic tools and substances, and so one way to write the history of medicine is as the application of different technologies to the human body. In *Tools and the Organism*, Colin Webster argues that over the course of antiquity, notions shifted about what type of object a body is, what substances constitute its essential nature, and how its parts interact. By following these changes and taking the question of technology into the heart of Greek and Roman medicine, Webster reveals how the body was first conceptualized.

as an organism a functional object whose inner parts were tools organa that each completed certain vital tasks Webster's approach provides both an overarching survey of the ways that technologies impacted notions of corporeality and corporeal behaviors and at the same time stays attentive to the specific material details of ancient tools and how they informed assumptions about somatic structures substances and inner processes For example by turning to developments in water delivery technologies and pneumatic tools we see how these changing material realities altered theories of the vascular system and respiration across Classical antiquity Tools and the Organism makes the compelling case for why telling the history of ancient Greco Roman medical theories from the Hippocratics to Galen should pay close attention to the question of technology Selling points Tour de force survey of ancient medicine First book to demonstrate how the body got its organs and what this has to do with ancient technologies For anyone interested in ancient culture science medicine and technology
