Agricultural Experiment Station, 1918 Far-from-equilibrium Dynamics Yasumasa Nishiura, 2002 When different scales exist in the spatial direction it produces non uniformity that is frequently characterized by identifiable patterns This monograph investigates the dynamics of spatio temporal patterns created by the coexistence of different scales Of particular concern is how the loss of uniformity requires the fixing of particular scales that cause the loss of the global picture of the system Singular perturbation theories are discussed as a way out of that dilemma Various methodologies for studying dissipative systems from the standpoint of separation and unification of scales are presented The interface dynamics caused by the difference of spatial scales is also given a prominent place in the discussion Translated from the 1999 Japanese work Hisenkei mondai 1 Patan keisei no suri Annotation copyrighted by Book News Inc Portland OR **Problem Solving in Endodontics** James L.
