Owning the Genome David B. Resnik, 2004-03-29 A clear introductory overview of the issues surrounding gene patenting
Owning the Genome David B. Resnik, 2012-02-01 DNA patenting has emerged as a hot topic in science policy and bioethics as private companies and government agencies spend billions of dollars on genetic research and development in a race to identify sequence and analyze DNA from human animal and plant species David B Resnik's *Owning the Genome* explores the ethical social philosophical theological and policy issues surrounding DNA patenting and develops a comprehensive approach to the topic Resnik considers arguments for and against DNA patenting and concludes that only a patent on a whole human genome would be inherently immoral while the morality of other DNA patents depends on their consequences for science medicine agriculture industry and society He also stresses the importance of government regulations and policies in order to minimize the harmful effects of patenting while promoting the beneficial ones **The**

Microbial Resolution Gloria Chan-Sook Kim, 2024-06-18 An interdisciplinary study charting the war against microbial futures leads to a new theory of contemporary vision and visibility In 1989 a group of U S government scientists met to discuss some surprising findings new diseases were appearing around the world and viruses that they thought long vanquished were resurfacing Their appearance heralded a future perpetually threatened by unforeseeable biological risks sparking a new concept of disease the emerging microbe With the Cold War nearing its end American scientists and security

experts turned to confront this new enemy redirecting national security against its risky horizons In order to be fought emerging microbes first needed to be made perceptible but how could something immaterial unknowable and ever mutating be coaxed into visibility knowability and operability Microbial Resolution charts the U S led war on the emerging microbe to show how their uncertain futures were transformed into objects of global science and security Moving beyond familiar accounts that link scientific knowledge production to optical practices of visualizing the invisible Gloria Chan Sook Kim develops a theory of microbial resolution to analyze the complex problematic that arises when dealing with these entities what can be seen when there is nothing to see Through a syncretic analysis of data mining animal tracking technologies media networks computer modeled futures and global ecologies and infrastructures she shows how a visual impasse the impossibility of seeing microbial futures forms the basis for new modes of perceiving knowing and governing in the present Timely and thought provoking Microbial Resolution opens up the rich paradoxes irreconcilabilities and failures inherent in this project and demonstrates how these tensions profoundly animate twenty first century epistemologies aesthetics affects and ecologies Biotechnology and Genetics in Fisheries and Aquaculture Boston Pickett,2019-07-01

Law in Transition Ruth Buchanan,Peer Zumbansen,2014-12-01 Law has become the vehicle by which countries in the developing world including post conflict states or states undergoing constitutional transformation must steer the course of social and economic legal and political change Legal mechanisms in particular the instruments as well as concepts of human rights play an increasingly central role in the discourses and practices of both development and transitional justice These developments can be seen as part of a tendency towards convergence within the wider set of discourses and practices in global governance While this process of convergence of formerly distinct normative and conceptual fields of theory and

practice has been both celebrated and critiqued at the level of theory the present collection provides through a series of studies drawn from a variety of contexts in which human rights advocacy and transitional justice initiatives are colliding with development projects programmes and objectives a more nuanced and critical account of contemporary developments The book includes essays by many of the leading experts writing at the intersection of development rights and transitional justice studies Notwithstanding the theoretical and practical challenges presented by the complex interaction of these fields the premise of the book is that it is only through engagement and dialogue among hitherto distinct fields of scholarship and practice that a better understanding of the institutional and normative issues arising in contemporary law and development and transitional justice contexts will be possible The book is designed for research and teaching at both undergraduate and graduate levels

ENDORSEMENTS An extraordinary collection of essays that illuminate the nature of law in today's fragmented and uneven globalized world by situating the stakes of law in the intersection between the fields of human rights development and transitional justice Unusual for its breadth and the quality of scholarly contributions from many who are top scholars in their fields this volume is one of the first that attempts to weave the three specialized fields and succeeds brilliantly For anyone working in the fields of development studies human rights or transitional justice this volume is a wake up call to abandon their preconceived ideas and frames and aim for a conceptual and programmatic restart Professor Balakrishnan Rajagopal Ford International Associate Professor of Law and Development Massachusetts Institute of Technology This superb collection of essays explores the challenges possibilities and limits faced by scholars and practitioners seeking to imagine forms of law that can respond to social transformation Drawing together cutting edge work across the three dynamic fields of law and development transitional justice and international human rights law this volume powerfully demonstrates that in light of the changes demanded of legal research education and practice in a globalizing world all law is law in transition Anne Orford Michael D Kirby Chair of International Law and Australian Research Council Future Fellow University of Melbourne A terrific volume Leading scholars of human rights development policy and transitional justice look back and into the future What has worked Where have these projects gone astray or conflicted with one another Law will only contribute forcefully to justice development and peaceful sustainable change if the lessons learned here give rise to a new practical wisdom We all hope law can do better the essays collected here begin to show us how David Kennedy Manley O Hudson Professor of Law Director Institute for Global Law and Policy Harvard Law School

Biotech Innovations and Fundamental Rights Roberto Bin, Sara Lorenzon, Nicola Lucchi, 2012-05-13 Biotechnology is a recognized research area that has increasingly advanced into new technologies and modern practices raising several legal ethical and regulatory issues The revolutionary speed of biotech innovations has had a significant impact on the protection of the rights of the individual Fundamental rights provide a framework within which the justification of limitations and restrictions to biotechnology innovations and research results have to be assessed The legal regulation of scientific research and scientific

investigations impact more and more directly on the freedom of research and therapies as well as on the broad diffusion of knowledge Closely related is also the debated question of the technological manipulation of life and the boundary of scientific knowledge with regard to the topical question of genetic invention patents and their side effects on access to scientific information and health care opportunities Drawing on expertise from different disciplines the volume comprises invited papers and plenary presentations given at the conference entitled Biotech Innovations Fundamental Rights that took place on January 20 21 2011 at the Department of Juridical Sciences of the University of Ferrara Each contribution covers a different aspect of the legal and scientific issues involved in regulation of biotechnology In particular the focus of attention has been given to genetic research genetic data freedom of scientific research in genetics and biotech patents

Justice in Genetics

Louise Bernier, 2010-01-01 Providing new insight into the ideas surrounding one of the longest running and hotly debated governmental issues the global access to healthcare challenge Louise Bernier develops an original theoretical framework that builds upon cosmopolitan liberal theory This groundbreaking analysis offers a useful justification for engaging in a global and more equitable redistribution of health related resources The author examines if and how this theory of distribution translates into positive law and analyzes the barriers to legal compliance and global distributive justice in health Other topics analyzed in this book include intellectual property and international human rights and the extent to which the philosophy and structure of each of these normative systems furthers the goal of distributing benefits equitably and globally the use of strong and original normative landmarks to justify relying on a cosmopolitan approach to global justice based on health needs and the social political economic and legal obstacles and opportunities resulting from the commercialization of the quickly evolving field of genetics Ultimately the book exemplifies the groundwork needed to initiate policy discussions and to eventually undertake concrete changes to achieve international redistribution of the resources emerging from genetics As such it will be of great value to students and scholars interested in health law human rights and intellectual property
