XTREME MODELLING 5 EN , M3 Medium Tank vs Panzer III Gordon L. Rottman,2013-02-20 This was a duel between the stalwart of the Wehrmacht armored divisions the Panzerkampfwagen III and the American s as yet untested M3 Grant In reality both would prove unequal to the task as they floundered amidst the rugged hills and ravines of the Tunisian landscape This book charts the design and development of these two disparate rivals their vastly different armament and armor as well as their tactical concepts Analysing the strengths and weaknesses of these two opponents this book explores the successes and failures of the Grant and Panzer III as they clashed at the critical battles of North Africa Moreover it is an insight into the lives of the tank crews themselves as they struggled with the twin horrors of tank warfare and the fight for survival amidst some of the most inhospitable terrain on earth **Sd. models of the Pzkw IV tank and the units that operated this deservedly famous armored vehicle during the savage defensive battles against the Soviet army on the Eastern Front in the last months of the war. A key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeller needs to recreate an accurate representation of these historic tanks. The Pz Kw IV Ausf H and Pz Kw IV Ausf J tanks were produced in the largest numbers in the range known as *Sonderkraftfahrzeug 161* in German terminology. 7 000 vehicles. This means that significant quantities of these vehicles were delivered to units from late Spring 1943 in case of the Ausf H and from Summer 1944 as far as the Ausf J is concerned. They fought on every front of the war. In addition to the Germans as will be described in this book, other Axis forces also used both types of these tanks. Panzer IV Thomas Anderson, 2021-01-21. This highly illustrated title details the history of the Panzer IV throughout World War II where it saw service on the front line from Poland in 1939 through to the very last days of the Third Reich in Berlin in 1945. The Panzer IV programme was started in 1934, forming alongside the Panzer IIs and IIIs the *schnellen Truppen*, the force that was to become the *Panzerwaffe*. At first German planners envisioned the tank in a secondary role, but during the invasions of The Low Countries and France it took on a more central role. When the *Panzerwaffe* turned east to attack the Soviet Union, the Panzer IV initially fared poorly against the better armed T-34. However, upgrades to its gun and armour protection saw it perform far better, not only against Soviet armour but also against British and American tanks in North Africa and Italy. In 1944 it was slowly replaced by the Panzer V Panther, but the dire strategic situation meant that it bore the brunt of the Allied D-Day invasion and its aftermath, and it remained in service until the end of the war. Fully illustrated throughout with contemporary photographs, this fascinating study from German armour expert Thomas Anderson tells the complete story of Germany's most widely produced tank of World War II from its design and development to its many upgrades and variants. **Panzer IV, 1939-1945** Paul Thomas, 2017-11-30. With comprehensive captions and text, this superb book tells the story of the production of the Panzer IV to the key battles in Poland, France, North Africa, Italy, Russia, and North West Europe. Initially the Panzer IV was designed as an infantry support tank, but soon proved to be so diverse and effective that it earned a unique tactical role on the battlefield. The book shows how the Panzer IV evolved and describes how the Germans carefully utilized all available reserves and resources into building numerous variants that went into production and saw action on the battlefield. It depicts how these formidable tanks were adapted and up-gunned to face the ever-increasing enemy threat. Between 1936 and 1945, over 8 000 Panzer IVs were

built For most of the war this tank was a match for its opponents heavy tanks and quickly and effectively demonstrated its superiority on the battlefield The Panzer IV was the only German tank to remain in production during the war Its chassis was converted into more models than any other Panzers that entered service As well as the various prototype projects and command tanks observation vehicles ammunition carriers recovery vehicles amphibious armored ferry vehicles that saw service the book will show a multiple of converted anti tank propelled vehicles **Wehrmahcti soomusmasinad** Mati Õun,2002
