Computer Chess Compendium D. LEVY, 2013-06-29 For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could find My files are now quite large and a considerable amount of time effort and expense has been required to build up this collection I have often thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work Unless one has access to a good reference library the task is almost impossible I therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject Such a selection is naturally somewhat subjective and I hope that I will not offend authors whose works have been excluded In particular I have decided to exclude any material which has appeared in the Journal of the International Computer Chess Association ICCA or in its precursor the ICCA Newsletter The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources For further information on ICCA membership and publications the reader is invited to contact Professor H 1 van den Herik or Dr Jonathan Schaeffer University of Limburg Computing Science Department Department of Computer Science University of Alberta 6200 MD Maastricht Edmonton Netherlands Alberta Canada T6G 2H1 My Double Life 2 Nicholas

Hartog, Clare E. Wilde, 2023-10-04 Travel and pilgrimage have become central research topics in recent years Some archaeologists and historians have applied globalization theories to ancient intercultural connections Classicists have rediscovered travel as a literary topic in Greek and Roman writing Scholars of early Judaism Christianity and Islam have been rethinking long familiar pilgrimage practices in new interdisciplinary contexts This volume contributes to this

flourishing field of study in two ways First the focus of its contributions is on experiences of travel Our main question is How did travelers in the ancient world experience and make sense of their journeys real or imaginary and of the places they visited Second by treating Jewish Christian and Islamic experiences together this volume develops a longue dur e perspective on the ways in which travel experiences across these three traditions resembled each other By focusing on experiences of travel we hope to foster interaction between the study of ancient travel in the humanities and that of broader human experience in the social sciences
