Congress. House. Committee on the Judiciary. Subcommittee on the Constitution, 2003 *Corporate Crime Under Attack* Francis T. Cullen, Gray Cavender, William J. Maakestad, Michael L. Benson, 2014-09-25 In exploring the criminalization of corporations this book uses the landmark Ford Pinto case as a centerpiece for exploring corporate violence and the long effort to bring such harm within the reach of the criminal law Corporations that illegally endanger human life now must negotiate the surveillance of government regulators and risk civil suits from injured parties seeking financial compensation They also may be charged with criminal offenses and their officials sent to prison Laws of the State of Illinois Enacted by the ... General Assembly at the Extra Session ... Illinois, 1975 Broken Code Don Levin, 2007-07-25 One Man Two Codes The dilemma the moral code of his church and community in conflict with the Canon of Ethics of his profession Doug Long is a husband father of seven an attorney at law and respected elder in his church where he serves as an advisor in the youth program enjoying popularity with the youth and their parents while counting many friends among his burgeoning clientele After many years of scraping by financially he accepts the challenge from a friend and fellow attorney to begin defending clients charged with Driving Under the Influence DUI With this addition to his practice he realizes financial rewards beyond his wildest dreams but with a potentially devastating price of its own on a fateful night that the two codes by which he has lived his life come crashing into conflict with one another For no matter what choice he makes he will be guilty of at least one BROKEN CODE **Attempts** Gideon Yaffe, 2012-11-29 Gideon Yaffe presents a ground breaking work which demonstrates the importance of philosophy of action for the law Many people are serving sentences not for completing crimes but for trying to So the law governing attempted crimes is of practical as well as theoretical importance Questions arising in the adjudication of attempts intersect with questions in the

philosophy of action such as what intention a person must have if any and what a person must do if anything to be trying to act Yaffe offers solutions to the difficult problems courts face in the adjudication of attempted crimes He argues that the problems courts face admit of principled solution through reflection either on what it is to try to do something or on what evidence is required for someone to be shown to have tried to do something or on what sentence for an attempt is fair given the close relation between attempts and completions The book argues that to try to do something is to be committed by one's intention to each of the components of success and to be guided by those commitments Recognizing the implications of this simple and plausible position helps us to identify principled grounds on which the courts ought to distinguish between defendants charged with attempted crimes

**Fair Opportunity and Responsibility** David Owen Brink,2021 *Fair Opportunity and Responsibility* lies at the intersection of moral psychology and criminal jurisprudence and analyzes responsibility and its relations to desert culpability excuse blame and punishment It links responsibility with the reactive attitudes but makes the justification of the reactive attitudes depend on a prior and independent conception of responsibility Responsibility and excuse are inversely related an agent is responsible for misconduct if and only if it is not excused As a result we can study responsibility by understanding excuses We excuse misconduct when an agent's capacities

or opportunities are significantly impaired because these capacities and opportunities are essential if agents are to have a fair opportunity to avoid wrongdoing This conception of excuse tells us that responsibility itself consists in agents having suitable cognitive and volitional capacities normative competence and a fair opportunity to exercise these capacities free from undue interference situational control Because our reactive attitudes and practices presuppose the fair opportunity conception of responsibility this supports a predominantly retributive conception of blame and punishment that treats culpable wrongdoing as the desert basis of blame and punishment We can then apply the fair opportunity framework to assessing responsibility and excuse in circumstances of structural injustice situational influences in ordinary circumstances and in wartime insanity and psychopathy immaturity addiction and crimes of passion Though fair opportunity has important implications for each issue treating them together allows us to explore common themes and appreciate the need to take partial responsibility and excuse seriously in our practices of blame and punishment District of Columbia Code, 1961 Ed District of Columbia,1961 *District of Columbia Code, Annotated* District of Columbia,1961 *Criminal Law Theory* Stephen Shute,A. P. Simester,2002 Concentrating upon those doctrines that make up the general part of the criminal law this collection of essays by leading American and British legal experts sheds theoretical light on key issues of contemporary relevance **District of Columbia Code, Annotated: Title 18-Decedents' estates and their distribution to Title 44-Railroads and their carriers** District of Columbia,1961 **Official Reports of the Supreme Court** United States. Supreme Court,1980 **Unborn Victims of Violence Act of 2001** United States. Congress. House. Committee on the Judiciary. Subcommittee on the Constitution,2001 **The Neurotransmitter Revolution** Roger D. Masters,Michael T. McGuire,1994 Extraordinary advances in neurochemistry are both transforming our understanding of human nature and creating an urgent problem Much is now known about the ways that neurotransmitters influence normal social behavior mental illness and deviance What are these discoveries about the workings of the human brain How can they best be integrated into our legal system These explosive issues are best understood by focusing on a single neurotransmitter like serotonin which is associated with such diverse behaviors as dominance and leadership seasonal depression suicide alcoholism impulsive homicide and arson This book brings together revised papers from a conference on this theme organized by the Gruter Institute for Law and Behavioral Research supplemented with articles by leading scholars who did not attend Contributors include psychiatrists neurologists social scientists and legal scholars The Neurotransmitter Revolution presents a unique survey of the scientific and legal implications of research on the way serotonin combines with other factors to shape human behavior The findings are quite different from what might have been expected even a decade ago The neurochemistry of behavior is not the same thing as genetic determinism On the contrary the activity of serotonin varies from one individual to another for many reasons including the individual s life experience social status personality and diet And there are a number of major neurotransmitter systems each of which interacts with the other Behavior culture and

the social environment can influence neurochemistry along with inheritance Nature and nurture interact and these interactions can be understood from a vigorously scientific point of view The fact that our actions are heavily influenced by neurotransmitters like serotonin is bound to be disquieting A sophisticated understanding of law and human social behavior will be needed if our society is to respond adequately to these rapid advances in our knowledge This book is an essential step in that direction providing the first comprehensive survey of the biochemical social and legal considerations arising from research on the behavioral effects of serotonin and related neurotransmitters
