Wilkinson, 2001-01-01 Henry Moore 1898-1986 is arguably one of the most famous and beloved sculptors of the twentieth century yet in recent decades his work has fallen out of favor in the world of contemporary art criticism This handsome book examines this intriguing contradiction and seeks to reassess Moore's crucial contribution to art of the last century Looking at Moore's early engagements with primitivism his 1930s dialogue with abstraction and surrealism and his postwar interest in large scale public sculpture the authors show how the sculptor helped to define some of the most significant aspects of modernism The authors also contextualize within the polemics of early modernism Moore's emphasis on direct carving instead of modeling and the necessary balance between abstraction and what he called the psychological human element Moore's early sculpture largely unfamiliar to the general public is given particular attention enabling the reader to explore the evolution of thematic and formal elements in his work and his ongoing response to different materials Photographs some by Moore himself of over 120 works including plasters maquettes carvings bronzes and drawings are featured many of which are previously unpublished **The American Journal of Philately**, 1896 *Benezit Dictionary of British Graphic Artists and Illustrators* Stephen Bury, 2012-06-21 This dictionary consists of over 3000 entries on a range of British artists from medieval manuscript illuminators to contemporary cartoonists Its core is comprised of the entries focusing on British graphic artists and illustrators from the 2006 *Benezit Dictionary of Artists* with an additional 90 revised and 60 new articles *Hearings* United States. art's encounter with the broader world and in particular with the West. Offering more than a simple charting of influences, it uncovers a pattern of richly mutual interchange between Chinese art and its others. Arguing that we cannot fully understand modern Chinese art without taking this expanded global context into account, it attempts to break down barriers between areas of art history which have hitherto largely been treated within separate and often nationally conceived frames. Aware that issues of cultural difference need to be addressed by art historians as much as by artists, it represents a pioneering attempt to produce art historical writing which is truly global in approach. David Clarke is Professor in the Department of Fine Arts, University of Hong Kong. *Art Matters* Pamela Gordon, 2023-10-13 *Art Matters* enables students to experience art actively and meaningfully, weaving together innovative pedagogy and compelling stories about a wide assortment of artworks and artists to show students that art is everywhere, art is vibrant, and art matters. Joseph Csáky Edith Balas, 1998 Joseph Csáky 1888-1971, a neglected pioneer of early Modernism, was a native of Hungary who became a dedicated member of the Parisian avant-garde. He took part in the 1912 Salon d'Or Exhibition, considered by many to mark the high point of the Cubist movement. He was an intimate friend of such innovative giants as Picasso and Braque, yet he spent the last 30 years of his life in obscurity, was virtually destitute at his death. This ground-breaking study includes a detailed discussion of his career, over 100 illus. of his major sculpture, a translation of the artist's autobiography that provides a wealth of new info about the early Parisian avant-garde. The Imagery of the Athenian Symposium Kathryn Topper, 2012-11-12 This book explores what it meant to be a Greek community and how Athenians thought about past and present. **Sculpture and the Garden** Patrick Eyres, 2017-07-05 Although the integration of sculpture in gardens is part of a long tradition dating back at least to antiquity, the sculptures themselves are often overlooked both in the history of art and in the history of the garden. This collection of essays considers the changing relationship between sculpture and gardens over the last three centuries, focusing on four British archetypes: the Georgian landscape garden, the Victorian urban park, the outdoor spaces of twentieth-century modernism, and the late twentieth-century sculpture park. Through a series of case studies exploring the contemporaneous audiences of gardens, the book uncovers the social, political, and gendered messages revealed by sculpture's placement and suggests that the garden can itself be read as a sculptural landscape. The Evolution of Human Language Wolfgang Wildgen, 2004-01-01 Wolfgang Wildgen presents three perspectives on the evolution of language as a key element in the evolution of mankind in terms of the development of human symbol use. 1. He approaches this question by constructing possible scenarios in which mechanisms necessary for symbolic behavior could have developed on the basis of the state of the art in evolutionary anthropology and genetics. 2. Non-linguistic symbolic behavior, such as cave art, is investigated as an important clue to the developmental background to the origin of language. Creativity and innovation and a population's ability to integrate individual experiments are considered with regard to historical examples of symbolic creativity in the visual arts and natural sciences. 3. Probable linguistic fossils of such linguistic innovations are examined. The results of this study allow

for new proposals for a protolanguage and for a theory of language within a broader philosophical and semiotic framework and raises interesting questions as to human consciousness universal grammar and linguistic methodology Series B **A**
