Recognition Struggles and Social Movements Barbara Hobson, 2003-11-27 Offers historical comparative and cross national perspectives to the debates on the politics of recognition     *Recognition Struggles and Social Movements* Barbara Hobson, 2003-11-27 This study looks comparatively and cross nationally at the dynamic interplay between those fighting for a fairer division of economic resources and those struggling for recognition and respect of group differences The book addresses key debates on the political gender of multiculturalism and identity politics with original empirical research Written by prominent scholars across disciplinary and geographical borders it transcends social movement studies by confronting issues of power and governance authenticity and boundary making     Social Movements and the Struggles for Rights, Justice and Democracy in Paraguay Charmain Levy, Laureen Elgert, Valérie L'Heureux, 2023-04-28 Paraguay is an under examined but remarkably fascinating country where war dictatorship and elite capture have produced cycles of popular mobilization and repression Yet its social movements are less known to international audiences This book analyzes Paraguay's principal social movements since the transition to democracy and examines how in the context of a weak state authoritarian political elite and a deficient democratization process they contribute to progressive policy socio economic development and democracy Using critical perspectives in sociology anthropology geography and political science we bring together scholars activists and practitioners of social critique and community organizing They reflect on movements involving peasant indigenous and agrarian rights to land and livelihoods LGBTQ and feminist struggles labor union struggles and student demands for access to quality education and social development while exploring how the particularisms of Paraguay result in differences from other Latin American movements and how overarching regional tendencies may explain the similarities This volume is the first English language book on social movements in Paraguay As such it aims to provide a deeper understanding Paraguay's principal social movements since the transition to democracy This volume contributes to analyzing how social movements within the context of a weak state authoritarian political elite and a deficient democratization process contribute to progressive public policy socio economic development and democracy In addition this book focuses on how Paraguayan social movements are similar to or different from their Latin American counterparts how the particularism of Paraguay explains these variations and how overarching regional tendencies explain the similarities The contribution of this volume is twofold to provide new empirical examples in the study of Latin American social movements and their contribution to development and democracy as well as to validate or challenge social movement theories by employing empirical studies of Paraguayan social movements Each chapter delves into the background to a specific movement while closely analyzing the movement in the post Lugo era 2012-2021 Together the chapters in this book contribute to a better understanding of social movements in Paraguay and Latin America thus dialoguing with the existing literature and social movement theories and considering how such studies can further our understanding of social

movements in Paraguay and in Latin America in general Finally the study of different social movements within the Paraguayan context takes into consideration the links that each movement has forged with other such movements in Latin America including the contributions that Paraguayan social movements have made to regional networks

*Rethinking equality* Chris Armstrong, 2013-07-19 Although formally equal relations between citizens are actually characterised by many and varied forms of inequality. Do contemporary theories of equality provide an adequate response to the inequalities that afflict contemporary societies? And what is the connection between theories of equality and the contemporary politics of citizenship? Accessible and comprehensive, *Rethinking equality* provides a clear, critical, and very up-to-date account of the most important contemporary egalitarian theories. Unusually, it also relates these theories to contemporary political practice, assessing them in relation to the impact of neoliberalism on contemporary welfare states and the shift from social to active forms of citizenship. As well as representing a significant intervention within academic debates on equality and citizenship, this book represents essential reading for students of contemporary political theory.

*The Politics of Belonging in India* Daniel J. Rycroft, Sangeeta Dasgupta, 2011-03-29 Since the 1990s the Indigenous movement worldwide has become increasingly relevant to research in India, re-shaping the terms of engagement with Adivasi Indigenous tribal peoples and their pasts. This book responds to the growing need for an interdisciplinary re-assessment of Tribal studies in postcolonial India and defines a new agenda for Adivasi studies. It considers the existing conceptual and historical parameters of Tribal studies as a means of addressing new approaches to histories of de-colonization and patterns of identity formation that have become visible since national independence. Contributors address a number of important concerns, including the meaning of Indigenous studies in the context of globalised academic and political imaginaries and the possibilities and pitfalls of constructions of indigeneity as both a foundational and a relational concept. A series of short editorial essays provide theoretical clarity to issues of representation, resistance, agency, recognition, and marginality. The book is an essential read for students and scholars of Indian Sociology, Anthropology, History, Cultural Studies, and Indigenous studies.

policy framing      **Recognition, Conflict and the Problem of Global Ethical Community** Shannon Brincat, 2017-10-02 Recognition is a fundamental aspect of all social interactions between individuals groups local communities and sovereign states Recognition refers to those sociological processes whereby two or more entities such as states groups such as ethnic or cultural communities or individuals interact with one another and come to understand themselves and the other as mutually free individuals as social agents whose identities interests and outlooks are equally bound together Without the foundational act of recognition relations can become unequal and antagonistic leading to social pathologies denigration and even open conflict This volume brings together leading international scholars of recognition theory in world politics to discuss the potential for recognition to pacify relations between states groups and individuals and to develop recognition processes in the global community It examines the implications of recognition theory in helping to understand the problem of conflict and the possibilities for forging a form of global ethical community This book was published as a special issue of Global Discourse      **Human Rights and Social Movements** Neil Stammers, 2009-04-20 This book champions social movements as one of the most influential agents that shape our conceptions of human rights It argues that human rights cannot be understood outside of the context of social movement struggles It explains how much of the literature on human rights has systematically obscured this link consequently distorting our understandings of human rights Neil Stammers shows how human rights can be understood He suggests that what he calls the paradox of institutionalisation can only be addressed through a recognition of the importance of human rights arising out of grassroots activism and through processes of institutional democratisation      Mobilizing on the Extreme Right Manuela Caiani, Donatella della Porta, Claudius Wagemann, 2012-02-16 Mobilizing on the Extreme Right compares the extreme right in Italy Germany and the United States using concepts and methods developed in social movement studies While the political parties on the right are well studied this is the first volume to address in comparative perspective the social movement organizations on the extreme right

*Activist Citizenship in Southeast Europe* Adam Fagan, Indraneel Sircar, 2020-04-28 This volume explores recent episodes of progressive citizen led mobilisation that have spread across Southeast Europe over the past decade These protests have allowed citizens the opportunity to challenge prevailing notions of citizenship and provided the chance to redress what is perceived to be the unjust balance of power between elites and the masses Each contribution debunks the myth of inherently passive post socialist populations imitating West European forms of civil society activism Rather we gain a deeper sense of progressive and innovative forms of activist citizenship that display essentialist and particular forms of protest in combination with the antics of global protest networks Through richly detailed case study research the authors illustrate that whilst the catalysts for protest in Southeast Europe were invariably familiar the expanse of private ownership into urban public spaces the impact of austerity the pathology of such protests were undoubtedly indigenous in origin reflecting the particular post socialist post authoritarian trajectories of these societies The chapters in this book were originally published

as a special issue in Europe Asia Studies
