**Recollections of the Past** George Sydney Ford,1910      *Recovered Memories* Graham M. Davies,Tim Dalgleish,2003-01-10 The phenomenon of recovered memories has excited much controversy in recent years amongst professionals with extreme positions being held either all such memories are by definition false or any such claim is an attempt to deny the victims of abuse their rights to confront their abusers In this refreshing new approach to the problem Graham Davies and Tim Dalgleish have assembled leading figures from both sides of the debate to provide a balanced overview of empirical evidence as well as evidence from clinical practice *Recovered Memories* Seeking the middle ground unlike most other writing on the topic eschews extreme positions It provides clinicians with findings from the latest research to enhance their understanding of memory and presents pure researchers with a range of experiences encountered in clinical practice for which they presently have few explanations Topics include the impact on family and community members the latest findings on implanted memories and discussion of clinical guidelines for therapeutic practice to avoid potential influence on memory Having weighed the evidence a framework is offered in which true and false recovered memories are seen as the inevitable compliment of true and false continuous memories This important new collection should not be missed by anyone with an interest in memory whether engaged in a clinical legal child protection family welfare or experimental research capacity It is the most authoritative and comprehensive review of the evidence on both sides available to date

*Myths and Memories of the Black Death* Ben Dodds,2021-12-11 This book explores modern representations of the Black Death a medieval pandemic The concept of cultural memory is used to examine the ways in which journalists writers of fiction scholars and others referred to described and explained the Black Death from around 1800 onwards The distant medieval past was often used to make sense of aspects of the present from the cholera pandemics of the nineteenth century to the climate crisis of the early twenty first century A series of overlapping myths related to the Black Death emerged based only in part on historical evidence Cultural memory circulates in a variety of media from the scholarly article to the video game and online video clip and the connections and differences between mediated representations of the Black Death are considered The Black Death is one of the most well known aspects of the medieval world and this study of its associated memories and myths reveals the depth and complexity of interactions between the distant and recent past      **Recollections**

**of the Past** Abner Chase,1846      **False and Distorted Memories** Robert A. Nash,James Ost,2016-10-04 Our memories shape how we think about the past how we plan for the future and how we think about ourselves Yet our memories are also constantly being reinvented we often remember our experiences differently from how they truly happened and can even remember experiences that never happened at all *False and Distorted Memories* provides an overview of recent and ongoing developments in the science of false memory World leading researchers unpick questions about flawed recollections discussing issues as varied as the reliability of highly emotional memories why we sometimes begin to remember fictional

experiences that we have deliberately fabricated and what happens when we stop believing our memories Each chapter demonstrates how memory science has furthered our understanding of these important questions by exploring theoretical ideas and psychological research methods that underpin their investigations Edited by Robert Nash and James Ost this volume offers an international and up to date perspective on false and distorted memories The volume also draws attention to the broad range of real life contexts in which such distortions might arise and their potential consequences False and Distorted Memories illustrates the ease with which memory can be contaminated and the power of the resulting memory errors providing an integral text for researchers and students interested in the psychology of memory **Memories of**

**Asaph** Karl N. Jacobson, 2017-06-15 Although the Psalms of Asaph Pss 50 73 83 contain a concentration of historical referents unparalleled in the Psalter they have rarely attracted sustained historical interest Karl N Jacobson identifies these psalms as containing cultic historiography historical narratives written for recitation in worship and explores them through mnemohistory attending to how the past is remembered and to the rhetorical function of recitation in the cultic setting Jacobson describes mnemohistory at the intersection of memory and history explores the singularity of the rhetorical and formal aspects of remembrance in the Asaph material and discusses residual mnemohistory material that is not intentionally called to remembrance Jacobson shows that Asaph remembers the past as a movement from henotheism to a more orthodox form of Yahwism as the core memory that informs a new historical situation for worship participants By describing the way Asaph remembers Jacobson highlights symbolic and individualized elements of the psalms mnemohistorical work that earlier formal critical approaches failed to recognize *Dictionary of Anonymous and Pseudonymous English Literature: Q-S* Samuel Halkett, John Laing, 1929 Recollection in the Republics Imogen Peck, 2021 Recollection in the Republics provides the first comprehensive study of the ways Britain's Civil Wars were remembered in the decade between the regicide and the restoration Remembering Conquest Omar Valerio-Jiménez, 2024-04-30 This book analyzes the ways collective memories of the US Mexico War have shaped Mexican Americans civil rights struggles over several generations As the first Latinx people incorporated into the nation Mexican Americans were offered US citizenship by the Treaty of Guadalupe Hidalgo which ended the war Because the 1790 Naturalization Act declared whites solely eligible for citizenship the treaty pronounced Mexican Americans to be legally white While their incorporation as citizens appeared as progress towards racial justice and the electorate's diversification their second class citizenship demonstrated a retrenchment in racial progress Over several generations civil rights activists summoned conquest memories to link Mexican Americans poverty electoral disenfranchisement low educational attainment and health disparities to structural and institutional inequalities resulting from racial retrenchments Activists also recalled the treaty's citizenship guarantees to push for property rights protection from vigilante attacks and educational reform Omar Valerio Jim nez addresses the politics of memory by exploring how succeeding generations reinforced or modified earlier memories of conquest according to their contemporary social and

political contexts The book also examines collective memories in the US and Mexico to illustrate transnational influences on Mexican Americans and to demonstrate how community and national memories can be used strategically to advance political agendas

**Theories of Social Remembering** Barbara Misztal, 2003-07-16 brilliant an impressive tour de force Network Why does collective memory matter How is social memory generated maintained and reproduced How do we explain changes in the content and role of collective memory Through a synthesis of old and new theories of social remembering this book provides the first comprehensive overview of the sociology of memory This rapidly expanding field explores how representations of the past are generated maintained and reproduced through texts images sites rituals and experiences The main aim of the book is to show to what extent the investigation of memory challenges sociological understandings of the formation of social identities and conflicts It illustrates the new status of memory in contemporary societies by examining the complex relationships between memory and commemoration memory and identity memory and trauma and memory and justice The book consists of six chapters with the first three devoted to conceptualising the process of remembering by analyzing memory s function status and history as well as by locating the study of memory in a broader field of social science The second part of the book directly explores and discusses theories and studies of social remembering After a short conclusion which argues that study of collective memory is an important part of any examination of contemporary society the glossary offers a concise and up to date overview of the development of relevant theoretical concepts The result is an essential text for undergraduate courses in social theory the sociology of memory and a wider audience in cultural studies history and politics

**On Autobiographical Memory** Anita Kasabova, 2009-05-27 The aim of this book is to provide an account of autobiographical memory the memory of episodes in the subject s autobiography and to answer the following questions what happens when we remember something Why do we remember some things rather than others The main assumptions in this book are that autobiographical memory is an active structure of a representational nature and that autobiographical memory is a construct of the imagination enabled by a semantic principle the ground consequence relation Anita Kasabova reconstructs the epistemological accounts of memory by the Prague philosopher and mathematician Bernard Bolzano and the Prague physiologist Ewald Hering as well as the phenomenological accounts by Edmund Husserl and Roman Ingarden and discusses various accounts put forward within analytic philosophy She examines the trace theory and its relation to the phenomenology of autobiographical memory and the different temporal perspectives that characterize this form of memory Kasabova formulates a philosophical explication of how autobiographical memory works dealing with issues such as what are the defining features of autobiographical memory how is it structured and how does it function what is a recollection and what are the necessary and for the most part sufficient conditions for a recollection to occur Kasabova argues that such conditions are a sense of self and a sense of connectedness of the self that is semantic rather than causal the subject s sense of ownership of past experiences and the capacity of imagination for mental time travel and thinking

about past episodes you have to be able to produce representations not bound to the current situation. It is argued that access to the subject's personal past cannot occur otherwise than by construction in imagination. In order to reproduce a past experience in the present, imagination is necessary for representing a past episode as if it were present. Other necessary conditions for autobiographical memory are time awareness, a continuous temporal reference frame, a successive temporal order, and the capacity to refer back to previous positions in time. Finally, semantic relations of part-whole and ground-consequence are crucial for explaining autobiographical memory. It is argued that the part-whole relation is the principle of the memory trace and that the grounding relation coordinates the subject's perspective on past episodes in recollective statements. Kasabova argues that autobiographical memory is basically semantic as it is grounded by and constructed through a sense-making relation expressed by the explanatory conjunct because we recall certain experiences or actions rather than other because we are sensitive to the reasons for having experienced it. The new book by Anita Kasabova fills a gap between traditional philosophical armchair speculations about memory and contemporary cognitive theories which have grown out of extensive experimental research. The book's main idea that autobiographical memory is not a mere recollection but rather an active reconstruction of our past memories is not an entirely new one. Anita Kasabova, however, provides a new take on this idea by revealing that the theories of Bolzano, Hering, and Husserl not only bear historical significance but properly reconstructed they might be viewed as an important contribution to the contemporary interdisciplinary studies of memory. An appreciable achievement of the book is the chosen conceptual framework; it makes the idiosyncratic language of Bolzano and Husserl accessible to contemporary cognitive scientists as well as making the recent cognitive theories understandable for the traditional philosophical scholars. Even if this were the only achievement of Anita Kasabova, and it is not, it would represent her monograph as a book of a great merit for a large community of memory scholars. Assoc. Prof. Lilia Gurova, Department of Cognitive Science and Psychology, New Bulgarian University.

**Tourism and Memories of Home** Sabine Marschall, 2017-02-03. This book investigates home and homeland as destinations of touristic journeys and adds to recent scholarly interest in the intersection between tourism and migration. It covers the temporary visits and journeys in search of home and homelands by migrants, displaced people, exiles, and diasporic communities in a wide range of different geographical and historical contexts. Personal and collective forms of memory are shown to play a key role in the motivation for and experience of such journeys. The volume contributes to the investigation of the tourism-memory nexus as it conceptualizes memory as underpinning touristic mobility, experience, and performativity. Based on ethnographic case studies and other types of qualitative empirical research, the chapters of this book foreground individual touristic experiences, emotions, memories, perceptions, the search for identity, and a sense of belonging. The book will be of interest to students and researchers in the fields of tourism, heritage, anthropology, identity studies, memory studies, and migration/diaspora studies.

**Svensk-Engelsk ordbok** Oscar Edmund Wenström, Walter Ernest Harlock, 1912      **Japan's Contested War Memories**

Philip A. Seaton, 2007-03-12 *Japan's Contested War Memories* is an important and significant book that explores the struggles within contemporary Japanese society to come to terms with Second World War history. Focusing particularly on 1972 onwards, the period starts with the normalization of relations with China and the return of Okinawa to Japan in 1972 and ends with the sixtieth anniversary commemorations. Analyzing the variety of ways in which the Japanese people narrate, contest and interpret the past, the book is also a major critique of the way the subject has been treated in much of the English language. Philip Seaton concludes that war history in Japan today is more divisive and widely argued over than in any of the other major Second World War combatant nations. Providing a sharp contrast to the many orthodox statements about Japanese ignorance, amnesia and denial about the war, this is an engaging and illuminating study that will appeal to scholars and students of Japanese history, politics, cultural studies, society and memory theory. **Politics of Time** Leszek Koczanowicz, 2008-08-01 What has really happened in Poland since the election of 2005? After such spectacular events as the practice of lustration and the questioning of solidarity with the European Union, one has to ask what is the nature of this newly emerging society. As with many of the recent developments in former communist countries that seem to be mysterious and irrational, the situation and ensuing problems are complex and the answers neither trivial nor easy. This book by the distinguished Polish philosopher addresses these complexities through the role of the communist past in post-communist Poland. It describes the events that led to the collapse of the Solidarity program and the growing influence of the nationalistic and religious parties in the government. The author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to Poland but also to other formerly communist countries. *Interpreting Cassirer* Simon Truwant, 2021-04 This rich collection of essays addresses all the key aspects of Cassirer's multi-faceted philosophical thought. *Simultaneity and Delay* Jay Lampert, 2012-02-09 Through original speculations on the surprisingly complementary concepts of simultaneity and delay and new interpretations of the great philosophers of time, this book proposes an innovative theory of staggered time. In the early 20th Century, Bergson and Husserl, following Einstein, made Simultaneity what it means for events to occur at the same time a central motif in philosophy. In the late 20th Century, Derrida and Deleuze instead emphasized Delay: events staggered over distant times. This struggle between convergent and staggered time also plays out in 20th Century aesthetics, especially music, politics and the sciences. Despite their importance in the history of philosophy, this is the first book to comprehensively examine the concepts of simultaneity and delay. By putting simultaneity and delay into a dialectical relation, this book argues that time in general is organized by elastic rhythms. Lampert's concepts describe the time structures of such diverse phenomena as atonal music, political decision making, neuronal delays, leaps of memory and the boredom of waiting and simultaneities and delays in everyday experience and behaviour. Moving in the USSR Pekka Hakamies, 2005-06-30 This book deals with 20th century resettlements in the western areas of the former USSR, in particular the territory of Karelia that was ceded by Finland in the

WWII Podolia in the Ukraine and the North West periphery of Russia in the Kola peninsula Finns from Karelia emigrated to Finland most of the Jews of Podolia were exterminated by Nazi Germany but the survivors later emigrated to Israel and the sparsely populated territory beyond the Polar circle received the Soviet conquerors of nature which they began to exploit The empty areas were usually settled by planned state recruitment of relocated Soviet citizens but in some cases also by spontaneous movement Thus a Ukrainian took over a Jewish house a Chuvash kolkhoz was dispersed along Finnish khutor houses and youth in the town of Apatity began to prefer their home town in relation to the cities of Russia Everywhere the settlers met new and strange surroundings and they had to construct places and meanings for themselves in their new home and restructure their local identity in relation to their places of origin and current abodes They also had to create images of the former inhabitants and explanations for various strange details they perceived around themselves All articles within this volume are based on extensive field or archive work This research project was funded by the Academy of Finland Rough Notes ,1878 A journal devoted to insurance and the industries **Recollections, 1844-1909** Henry Clay McDougal,1911
