abstract imagination labels and stories However when it does not also seek and contain 4 leg knowledge it results not only in our desensitization but in the separation of our thinking from the regenerative powers of Earth s natural systems within and around us This profound loss produces the many destructive side effects of our artificial world that we can not readily solve Four leg versus 5 leg discord creates an entrenched conflict in our psyche between how we think and how nature works This is a point source of the stress and contamination our society produces in the integrity of people and the environment It generates our many disorders and troubles that are seldom found in nature It is important to recognize is that by financially and socially rewarding us for getting good grades or for making the grade by using nature isolated 5 leg thinking our socialization habitually bonds conditions programs or ad The Nature Principle Richard Louv,2012-04-24 For many of us thinking about the future conjures up images of Cormac McCarthy s The Road a post apocalyptic dystopia stripped of nature Richard Louv author of the landmark bestseller Last Child in the Woods urges us to change our vision of the future suggesting that if we reconceive environmentalism and sustainability they will evolve into a larger movement that will touch every part of society This New Nature Movement taps into the restorative powers of the natural world to boost mental acuity and creativity promote health and wellness build smarter and more sustainable businesses communities and economies and ultimately strengthen human bonds Supported by groundbreaking research anecdotal evidence and compelling personal stories Louv offers renewed optimism while challenging us to rethink the way we live Ecotherapy Linda Buzzell,Craig Chalquist,2010-07-01 In the 14 years since Sierra Club Books published Theodore Roszak Mary E Gomes and Allen D Kanner s groundbreaking anthology Ecopsychology Restoring the Earth Healing the Mind the editors of this new volume have often been asked Where can I find out more about the psyche world connection How can I do hands on work in this area Ecotherapy was compiled to answer these and other urgent questions Ecotherapy or applied ecopsychology encompasses a broad range of nature based methods of psychological healing grounded in the crucial fact that people are inseparable from the rest of nature and nurtured by healthy interaction with the Earth Leaders in the field including Robert Greenway and Mary Watkins contribute essays that take into account the latest scientific understandings and the deepest indigenous wisdom Other key thinkers from Bill McKibben to Richard Louv to Joanna Macy explore the links among ecotherapy spiritual development and restoring community As mental health professionals find themselves challenged to provide hard evidence that their practices actually work and as costs for traditional modes of psychotherapy rise rapidly out of sight this book offers practitioners and interested lay readers alike a spectrum of safe effective alternative approaches backed by a growing body of research **Woman Spirit Awakening in Nature** Nancy Barrett Chickerneo, Ph.D.,2012-01-09 Dare to Take Ownership of the Wildness and Wonder of Your Truest Self Nature is there for you waiting to reflect your deepest self back to you and to teach you the Creator s wisdom A step into nature s embrace is always a step into a richer fuller life The door is wide open come on out from Beginning This book is your invitation to experience the life energizing process of reclaiming your spiritual
