Commerce Before Capitalism in Europe, 1300-1600 Martha C. Howell, 2010-04-12 Later generations have sometimes found such actions perplexing often dismissing them as evidence that business people of the late medieval and early modern worlds did not fully understand market rules **Migration and Mental Health** Marjory Harper, 2016-06-17 The relationship between migration and mental health is controversial contested and pertinent In a highly mobile world where voluntary and enforced movements of population are increasing and likely to continue to grow that relationship needs to be better understood yet the terminology is often vague and the issues are wide ranging Getting to grips with them requires tools drawn from different disciplines and professions Such a multidisciplinary approach is central to this book Six historical studies are integrated with chapters by a theologian geographer anthropologist social worker and psychiatrist to produce an evaluation that addresses key concepts and methodologies and reflects practical involvement as well as academic scholarship Ranging from the mid nineteenth century to the present the book explores the causes of mental breakdown among migrants the psychological changes stemming from their struggles with challenging life circumstances and changes in medical political and public attitudes and responses in different eras and locations **The Conscience of the Autobiographer** J. Barbour, 1992-08-25 This book argues that the writing of autobiography raises crucial issues of conscience as an author tries to know assess and represent character Individual chapters explore such issues as the nature of truthfulness characterization the virtues shame and the religious dimensions of conscience Literary Character Elizabeth Fowler, 2018-07-05 Chaucer introduces the characters of the Knight and the Prioress in the General Prologue to *The Canterbury Tales* Beginning with these familiar figures Elizabeth Fowler develops a new method of analyzing literary character She argues that words generate human figures in our reading minds by reference to paradigmatic cultural models of the person These models such as the pilgrim the conqueror the maid the narrator originate in a variety of cultural spheres A concept Fowler terms the social person is the key to understanding both the literary details of specific characterizations and their indebtedness to history and culture Drawing on central texts of medieval and early modern England Fowler demonstrates that literary characters are created by assembling social persons from throughout culture Her perspective allows her to offer strikingly original readings of works by Chaucer Langland Skelton and Spenser and to reformulate and resolve several classic interpretive problems In so doing she reframes accepted notions of the process and the consequences of reading Developing insights from law theology economic thought and political philosophy Fowler's book replaces the traditional view of characters as autonomous individuals with an interpretive approach in which each character is seen as a battle of many archetypes According to Fowler the social person provides the template that enables authors to portray and readers to

recognize the highly complex human figures that literature requires *Grace, Talent, and Merit* Anthony J. La Vopa, 2002-06-27 Poor students experienced a kind of upward mobility that was not uncommon in old regime Europe They were also objects of controversy and as such they reveal the many dimensions of the issue of opening careers to talent At stake were socially and politically sensitive questions about the relative importance of nature and nurture of natural talent and birth in realizing human potential about the proper reconciliation of collective imperatives and individual freedom of hierarchical stability and progress about how national systems of education should be structured about the kind and degree of upward mobility the society and the culture needed and could tolerate This 1988 book shows how a cluster of familiar eighteenth century ideas about grace talent and merit shaped a formative social experience for men whose importance is still celebrated today as well as for members of the educated elite who were and have remained obscure **Encyclopedia of Renaissance Philosophy** Marco Sgarbi, 2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650 Self and City in the Thought of Saint Augustine Ben Holland, 2019-07-30 Self and City in the Thought of Saint Augustine explores the analogy between the self and political society in the thought of St Augustine of Hippo This analogy is an important theme in the history of political thought Attempts have been made to understand the state by examining the soul since Plato the body as in medieval theories of the body politic and the person surviving to this day in such concepts as international legal personality This book aims to reinstate the Augustinian part of the story It argues that Augustine develops three analogies between self and city as a society ordered by love self love in the case of the Earthly City divided but improving love in the Pilgrim City and love of others and of God in the City of God It supplies thereby an overview of Augustine s intellectual system as it touches upon theology psychology and anthropology as well as politics and also provides a new interpretation of Augustine s important definition of the republic **Mapping the 'I'**, 2014-11-13 In Mapping the I Research on Self Narratives in Germany and Switzerland the contributors working with egodocuments autobiographies diaries family chronicles and related texts discuss various approaches to early modern concepts of the person and of personhood the place of individuality within this context genre and practices of writing The volume documents the cooperation between the Berlin and Basel self narrative research groups during its first phase 2000 2007 Next to addressing crucial methodological issues it also demonstrates the richness of egodocuments as historical sources in contributions concentrating for example on the body and illness on food as well as on the early modern economy group cultures and autobiographical considerations of one s own suicide Contributors include Andreas B hr Fabian Br ndle Lorenz Heiligensetzer Angela Heimen Gabriele Jancke Gudrun

Piller Sophie Ruppel Thomas M Safley Claudia Ulbrich Kaspar von Greyerz and Patricia Zihlmann M rki **Getting what You Want?** Robert Brecher,1997 Getting What You Want offers a critique of liberal morality and an analysis of its understanding of the individual as a wanting thing **Getting What You Want?** Bob Brecher,2012-10-12 Getting What You Want is the first book which calls for the collapse of liberal morality Bob Brecher claims that it is wrong to think that morality is simply rooted in what people want He explains that in our consumerist society we make the assumption that getting what people want is our natural goal and that this natural goal is a necessarily good one We see that whether it is a matter of pornography or getting married if people want it then that s that But is this really a good thing Getting What You Want offers a critique of liberal morality and an analysis of its understanding of the individual as a wanting thing Brecher boldly argues that the Anglo American liberalism cannot give an adequate account of moral reasoning and action nor any justification of moral principles or demands Ultimately Brecher shows us that the whole idea of liberal morality is not only incoherent but unattainable Worlds Between Leonore Davidoff,1995 Worlds Between presents a series of pioneering essays by Leonore Davidoff which together constitute nothing less than an urgent reappraisal of our understanding of the relationship between gender and history Among the topics discusses are the positions of servants and wives in Victorian and Edwardian England the relationship between home and community in English society the changing structure of housework the role of family relationships and the reflections on the role of the concepts of the public and the private developed through the work of feminist historians For over two decades Davidoff has been at the forefront of the reexamination of femininity and masculinity in history This volume which brings together her most important writings over this period as well as several unpublished essays will provide a necessary and important addition to the existing literature *The Origins of the Individualist Self* Michael Mascuch,2013-06-28 This book traces the emergence of the concept of self identity in modern Western culture as it was both reflected in and advanced by the development of autobiographical practice in early modern England It offers a fresh and illuminating appraisal of the nature of autobiographical narrative in general and of the early modern forms of biography diary and autobiography in particular The result is a significant and original contribution to the history of individualism Michael Mascuch argues that the definitive characteristic of individualist self identity is the personal capacity to produce a unified retrospective autobiographical narrative and he stresses that this capacity was first demonstrated in England during the last decade of the eighteenth century He examines the long term process of innovation in written discourse leading up to this event from the first use of blank almanacs and common place books by the pious in the late sixteenth century through the popular criminal biographies of the late seventeenth century to the printed for the author scandalous memoirs of the mid eighteenth century While offering a detailed account of a significant period in the rise of a modern literary genre Origins of the Individualist Self also addresses topics which are central in the fields of literary and cultural theory and social and cultural history Singular Texts/plural Authors Lisa S. Ede,Andrea A. Lunsford,1992 Why

write together the authors ask They answer that question here in the first book to combine theoretical and historical explorations with actual research on collaborative and group writing Lisa Ede and Andrea Lunsford challenge the assumption that writing is a solitary act That challenge is grounded in their own personal experience as long term collaborators and in their extensive research including a three stage study of collaborative writing supported by the Fund for the Improvement of Post Secondary Education The authors urge a fundamental change in our institutions to accommodate collaboration by radically resituating power in the classroom and by instituting rewards for collaborative work that equal rewards for single authored work They conclude with the injunction Today and in the twenty first century our data suggest writers must be able to work together They must in short be able to collaborate Feminist Thought Rosemarie Tong,Tina Fernandes

Two Minds chronicles a unique philosophical odyssey a developmental journey of coming to recognize the inadequacy of liberalism in the face of some egregious social problems such as racism while also appreciating its strengths A Personal Prologue describing the main intellectual influences on the author locates the origins of the journey and functions as a backdrop for its interpretation Fifteen chronologically organized essays divided into three parts identify significant positions of contrast between the two minds establishing the direction of the journey and indications of change Essays in Part I reflect early allegiance to liberalism and explore its core ideas as they should be interpreted to guide moral education Those in Part II express disaffection with that allegiance taking a distinctly critical stance toward liberalism Part III then consists of essays that represent attempts to come to terms with the becoming of two minds exemplified in the tension between the ideas about liberalism expressed in Parts I and II A Personal Preface also introduces each of the fifteen essays These Prefaces address questions such as why the problem of the essay was chosen why it was approached in a particular way and what place the essay assumes in the direction the author s journey takes
