Reconstructing Architecture for the Twenty-first Century Anthony Jackson, 1995-01-01 Jackson exposes the inadequacies of old conceptions of architecture as embodying metaphysical properties and of architects as the sole keepers of this esoteric knowledge He challenges architects to acknowledge and celebrate building as an expression of the ideals and values of the broader based classless communities to which they now belong ***Reconstructing Architecture for the Twenty-first Century*** Anthony Jackson, 1995 *Software Technologies* Hans-Georg Fill, Francisco José Domínguez Mayo, Marten van Sinderen, Leszek A. Architecture RePerformed: The Politics of Reconstruction Tino Mager, 2016-03-09 First emerging at the beginning of the twentieth century architectural reconstruction has increasingly become an instrument to visually revive a long bygone past This book deals with the phenomenon of meticulous reconstruction in architecture It argues that the politics of reconstruction go far beyond aesthetic considerations Taking architecture as a major source of history and regional identity the impact of large scale reconstruction is deeply intertwined with political and social factors Furthermore memories and associations correlated with lost buildings of a bygone era are heavily influenced by their re appearance something which often contradicts historical events Reconstruction has become an established way of building and dealing with the past yet so far there is no comprehensive scientific study on it By bringing together eight case studies from Eastern Europe France Spain China Japan Israel and Brazil it provides valuable insights into this topic The chapters analyse the political background of the reconstructions and identify the protagonists In doing so this volume adds to our understanding of the impact of reconstruction to memory and oblivion as well as the critical power of reconstruction regarding contemporary architecture and urbanism

Recoding Architecture Pedagogy Nathaniel Coleman, 2025-03-25 Disabled by chasing curricular criteria required for accreditation and professional registration architecture schools are mostly compliance and reproduction machines serving the building industry As a corrective Recoding Architecture Pedagogy Insurgency and Invention asserts disciplinary knowledge over professional skills as the proper aim and focus of architecture education The insurgent pedagogy introduced subverts architecture and its teaching s capture by capitalism s dominant modes of production and consumption to reveal unexpected tactics for enlarging possibilities Grounded in architecture histories and theories philosophy and anarchism s emphasis on use and dissensus combined with PUNK s DIY ethos design studio emphasis on technicity is upended to reveal the subversive aim of intensifying tensions between doomed desires for artistic autonomy and intrinsic burdens of use constituting architecture as a discipline instead of seeking resolution some neutral middle ground or escape into banal practice or paper palaces By concentrating on what architecture education suppresses tensions disavows its capture within the building industry or affirms commercial practice over disciplinary knowledge Recoding Architecture Pedagogy Insurgency and Invention cracks open horizons of possibility by showing how intensifying agonistic relationships between the myriad binaries that characterize architecture and its teaching is generative in ways conciliatory synthesis cathartic resolution and uncritical affirmation are not

Queering Architecture Marko Jobst, Naomi Stead, 2023-01-26 Featuring contributions from a range of significant voices in the field this volume renews the conversation around what it means to speak of the queer in the context of architecture and offers a fresh take on the methodological and epistemological challenges this poses to the discipline of

architectural theory Architecture as a discipline a profession and an applied practice is always subordinate to its own conceptual framework which is one of orderliness It refers to buildings but also to infrastructures of thought and knowledge to conventions and taxonomies to structures of governance hierarchies of power and systems of administration How then can one look at queering architectural discourse when the very term queer celebrated for its elusive nature resists and attacks such order Divided into four subsections the essays in this anthology each pursue a distinct line of inquiry methods practices spaces and pedagogies in order to help particularize the proposed queering of architecture They demonstrate the paradoxical nature of the endeavour from a diverse range of perspectives from questions of mapping queer theory in architecture to issues of queer architectural archives or lack thereof to non Western challenges to the very term queer and the queering of basic assumptions across affiliated disciplines Queering Architecture not only provides a bold challenge to the normative methods employed in architectural discourse but also addresses how establishing queer methodologies is a paradox in itself

Women, Practice, Architecture Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of Architectural Theory Review

The Role of Architects in Informal Settlements Nastaran Sedehi, Seyed Hossein Iradj

Moeini,2024-10-17 With over one billion people worldwide living in informal settlements and enduring substandard housing conditions these areas present one of the greatest urban challenges of our time The existence of informal settlements is deeply intertwined with global issues such as climate change war induced displacement and colonialism As sustainability becomes a central focus in various disciplines including architecture the path to sustainable urban development lies in addressing the problems of informal settlements Architecture s relevance to this discourse is paradoxically highlighted by its perceived irrelevance Informal settlements are often overlooked as legitimate sites for architectural practice This neglect stems from two assumptions first architecture s traditional dependence on power and capital isolating the marginalised who rarely have the chance to receive architectural services and second architecture s perceived incapability to address urban scale infrastructural problems and thereby its reduction to aesthetic creativity and form making This book challenges architecture s focus on the centre and its lack of ambition for creating a pervasive impact on cities Instead it highlights the profession s potential to serve the common good and address urban scale infrastructural issues and proposes the effective engagement of architects in informal settlements Drawing on Henri Lefebvre s dichotomy of margin versus centre in urban spaces informal settlements are interpreted as spaces on the city s periphery created by the marginalised with limited access to power capital and authority By revisiting interrelated concepts such as the production of space the right to the city social architecture and spatial agency within the context of informal settlements the book claims a space for architectural practice in these areas It incorporates discussions on insurgent citizenship and critiques of the self help approach contextualising its arguments with architectural intervention precedents from around the world The book concludes with a brief manifesto on practising architecture in informal settlements The book aspires to inspire architecture students practitioners and researchers to explore the profession s potential in social problem solving and to push the boundaries of practice towards inclusiveness for all urban inhabitants

Woods, 2023-04-28 This is the first in depth study of how the architectural profession emerged in early American history Mary Woods dispels the prevailing notion that the profession developed under the leadership of men formally schooled in architecture as an art during the late nineteenth century Instead she cites several instances in the early 1800s of craftsmen builders who shifted their identity to that of professional architects While struggling to survive as designers and supervisors of construction projects these men organized professional societies and worked for architectural education appropriate compensation and accreditation In such leading architectural practitioners as

Unplanned Visitors Olivier Vallerand, 2022-03-30 Sexuality and gender have long been influential in understanding the construction of domestic space its meanings often revealing a binary division of private and public female and male By reconstructing the foundation of queer critiques of space and by analyzing the representation of domesticity in contemporary art and architecture Unplanned Visitors shows the blurring of private and public that can occur in any domestic space and explores the potential of queer theory for understanding and designing the built environment Olivier Vallerand investigates how queer critiques building on pioneering feminist work question the relation between identity and architecture and highlight normative constructs underlying domestic spaces He draws out a genealogy of queer space in theoretical discourse in architecture studying projects by Mark Robbins Joel Sanders J Mayer H Elmgreen Dragset Andr s Jaque and MYCKET among others These works blur the traditional borders between architecture and art to emphasize the tensions between private and public and their impact on assumptions about domestic space and family structure The challenges in moving from experimental installations to built environments suggest how designers must acknowledge and respond to the social contexts that shape architecture rethinking how domestic spaces can be designed to allow everyone to better manage the expression of their self identification through their living environments Unplanned Visitors poses a challenge to traditional architectural theory and history but also suggests a renewed and more inclusive ethics whereby designers explicitly address social and political power structures The potential of a queer approach to architectural design history theory and education is precisely to enact a method that creates more inclusive buildings and safer neighbourhoods for everyone
