of Subways Brian J. Cudahy,2009-08-25 The transit historian and author of *Under the Sidewalks of New York* delivers a lively and authoritative history of New York City s fabled subway On the afternoon of October 27 1904 ordinary New Yorkers descended beneath the sidewalks for the first time to ride the electric powered trains of the newly inaugurated Interborough Rapid Transit System More than a century later the subway has expanded greatly weaving its way into the fabric of New York s unique and diverse urban life In *A Century of Subways* transit historian Brian J Cudahy offers a fascinating tribute to New York s storied and historic subway system from its earliest beginnings and many architectural achievements to the ways it helped shape today s modern metropolis Taking a fresh look at one of the marvels of the twentieth century Cudahy creates a vivid sense of this extraordinary system and the myriad ways the city was transformed once New Yorkers started riding below the ground **London Under** Peter Ackroyd,2011-11-01 In this vividly descriptive short study Peter Ackroyd tunnels

,1982 **London Underground , Reconstructing modernity** James Greenhalgh,2018-01-09 *Reconstructing modernity* assesses the character of approaches to rebuilding British cities during the decades after the Second World War It explores the strategies of spatial governance that sought to restructure society and looks at the cast of characters who shaped these processes It challenges traditional views of urban modernism and sheds new light on the importance of the immediate post war for the trajectory of planned urban renewal in twentieth century It examines plans and policies designed to produce and govern lived spaces shopping centers housing estates parks schools and homes and shows how and why they succeeded or failed It demonstrates how the material space of the city and how people used and experienced it was crucial in

understanding historical change in urban contexts The book is aimed at those interested in urban modernism the use of space in town planning the urban histories of post war Britain and of social housing Reconstruction Neal Shasore, Jessica Kelly, 2023-02-23 Commendation the Colvin Prize 2023 Society of Architectural Historians of Great Britain Reconstruction explores the impact of the First World War on the built environment examining the immediate and longer term aftermath of the Great War on the architecture of Britain and the British Empire during the interwar years While much attention has been paid by historians to post war architectural reconstruction after 1945 the earlier developments of the interwar period 1919 1939 have been comparatively overlooked This volume reveals how the architectural developments of this period not only provided important foundations for what happened after 1945 they are also of real significance in their own right Sixteen essays written by leading and emerging scholars bring together new and diverse approaches to the period a period of reconstruction fraught with the challenges of modernity and democratisation The collection considers the complex effects of reconstruction on design discourse practice and professionalism and deals with the full spectrum of architectural styles and approaches privileging neither Modernism nor traditional styles like the neo Georgian It brings to the fore social and political histories of the built environment and makes important postcolonial interventions into the architectural history of British Imperialism at home and in its far reaches in Cairo South Africa Australia and India *Ground Chemistry: Implications for Construction* A.B. Hawkins, 1997-01-01 Since the 1970s and 1980s there has been an increasing awareness of the importance of ground chemistry in construction Bringing together representatives of the various disciplines involved in ground chemistry the proceedings of this conference present case histories and research topics The Reconstruction of Space and Time Rich Ling, 2017-07-28 One of the most significant and obvious examples of how mobile communication influences our understanding of time and space is how we coordinate with one another Mobile communication enables us to call specific individuals not general places Regardless of location we are able to make contact with almost anyone almost anywhere This advancement has changed and continues to change human interaction Now instead of agreeing on a particular time well beforehand we can iteratively work out the most convenient time and place to meet at the last possible moment on the way to the meeting or once we arrive at the destination In their early days mobile devices were primarily used for various types of emergency situations and for work In some cases the device was an essential element in various business operations or used so that overseas workers could communicate with their families The distance between a remote posting and the people back home was suddenly and dramatically reduced People began to share these devices not necessarily out of economic issues but also questions of family and interpersonal dynamics The process of sharing decisions as to who is a legitimate partner makes the nature of relationships more explicit By examining the economy of sharing we not only see how sharing mobile phones restructures social space but are also given insight into an individual s web of interactions This cutting edge book deals with modern ways of thinking about communication and human interaction it will illuminate the ways in which mobile

communication alters our experience with space and time **Engineering** ,1918 London: Business, Travel, Culture - Pocket Edition Nicolae Sfetcu, Reconstruction and Restoration of Architectural Heritage 2021 Sergey Sementsov,Alexander Leontyev,Huerta Santiago,2021-07-27 Reconstruction and Restoration of Architectural Heritage 2021 presents contributions on various aspects of the study protection and restoration of architectural monuments and on the reconstruction of major historical urban development sites Moreover various complex and problematic aspects of engineering reconstruction of monuments are discussed A wide range of issues is considered in the process of preserving historical heritage including the historical formation of buildings construction and territories the conservation reconstruction and restoration of buildings and constructions the transformation of historical spaces and areas parallels and features in the development of urban planning architecture and construction art in Russia and Spain the fate and work of Augustine Augustinovich Betancourt This collection of papers combines contributions about the history and restoration of many of the largest nature reserves estates cities and monuments It is intended for academics and professionals involved in the history and restoration of nature reserves estates cities and monuments **Reconstruction of Urban Forests** Joe R. McBride,Judith Stilgenbauer,Igor Lacan,Sheauchi Cheng,Scot Medbury,Deborah L. McBride,2021-01-16 This book will address the destruction of urban forest in nine cities by bombing during World War II and the Bosnian War and their reconstruction in the post war years After reviewing the general objectives and results of aerial bombing the book explores the effects of bombing and the reconstruction of urban forest in London Coventry Hamburg Dresden St Petersburg Stalingrad Tokyo Hiroshima and Sarajevo Sarajevo stands out among these cities because the destruction of its urban forest was the result of citizens cutting down trees for firewood during the siege of the city Most of the cities studied developed plans for reconstruction either during or after the war These plans often addressed the planning and re establishment of the urban forest that had been destroyed Urban planners often planned for infrastructure improvements such as new boulevards and parks where trees would be planted After the war many of these plans were abandoned or significantly modified Cost resistance by property owners control of reconstruction by authorities outside of the cities and the lack of planting stock were factors contributing to the failure of many of the plans Exceptions occurred in Hiroshima and Coventry where the destroyed cities became symbols of national reconstruction and every effort was made to redesign the destroyed portions of these cities as memorials to those who lost their lives and to demonstrate the rebirth of the cities In several of the cities studied individual citizens undertook on their own the replanting of street and park trees Their ingenuity hard work and dedication to trees in their cities was remarkable A common factor limiting efforts to replant street and park trees was the lack of nursery stock During and immediately after the wars nearly all nurseries that had supplied trees for city planting had been converted to vegetable gardens to produce food for the urban populations The slow return to the production of trees for urban planting was a common factor in the time required in many cities to restore their street and park trees There are

lessons to be learned by urban planner urban forester and landscape architects from this book that will be useful in the future destruction of urban forest either by natural or man made causes **London** Victoria R.
