Reader's Guide to American History Peter J. Developing Dixie Winfred Moore, Joseph F. Tripp, Lyon G. Tyler, 1988-06-27 This collection of essays examines the development of the American South from the end of the Civil War to the end of World War II Written by both well known and emerging scholars the essays are divided into sections that address some of the major issues of that era such as race relations economic development political reform the roles of southern women the messages of folk music and the problems of the region s historians Each article offers fresh insights or new information on its subject and collectively the articles help to illuminate how the most traditional of American regions tried to cope with the forces of modernization

Origins of the New South Fifty Years Later John B. Boles, Bethany L. Johnson, 2003 Woodward s work had an enormous interpretative impact on the historical academy and encapsulated the new trend of historiography of the American South an approach that guided both black and white scholars through the civil rights movement and beyond

Jacket Subject Guide to Books in Print, 2001 Southern Enclosure John H. Cable, 2023-12-15 Historians of the American South have come to consider the mechanization and consolidation of cotton

farming the Southern enclosure movement to be a watershed event in the region's history. In the decades after World War II, this transition pushed innumerable sharecroppers, tenant farmers, and smallholders off the land, redistributing territory and resources upward to a handful of large, mainly white operators. By disproportionately displacing Black farmers, enclosure also slowed the progress of the civil rights movement and limited its impact. John Cable's *Southern Enclosure* is among the first studies to explore that process through the interpretive lens of settler colonialism. Focusing on east central Mississippi, home of the Mississippi Band of Choctaw Indians, Cable situates enclosure in the long history of dispossession that began with Indian Removal. The book follows elite white landowners and Black and Choctaw farmers from World War II to 1960, the period when the old labor-intensive farm structure collapsed. By acknowledging that this process occurred on taken land, Cable demonstrates that the records of agricultural agents, segregationist politicians, and the Bureau of Indian Affairs (BIA) are traces of ongoing colonization. The settler colonial framework rarely associated with the postwar South sheds important light on the shifting categories of race and class. It also prompts comparisons with other settler societies, states in southern and eastern Africa, for instance, whose timelines, racial regimes, and agrarian transitions were similar to those of the South. This postwar history of the South suggests ways in which the BIA's termination policy dovetailed with Southern segregationism and, at the same time, points to some of the shortcomings of the burgeoning field of settler colonial studies.

Making Schools American Cody D. Ewert, 2022-04-19 The author argues that school reformers around the turn of the twentieth century in the United States won support by highlighting the link between educational development and national success. These efforts transformed both the content of classroom lessons and perceptions of what schools could do, leaving a mixed legacy for educators and future generations of reformers.
