Advances in Modelling and Control of Non-integer-Order Systems Krzysztof J. Latawiec, Marian Łukaniszyn, Rafał Stanisławski, 2014-08-16 This volume presents selected aspects of non integer or fractional order systems whose analysis synthesis and applications have increasingly become a real challenge for various research communities ranging from science

to engineering The spectrum of applications of the fractional order calculus has incredibly expanded in fact it would be hard to find a science engineering related subject area where the fractional calculus had not been incorporated The content of the fractional calculus is ranged from pure mathematics to engineering implementations and so is the content of this volume The volume is subdivided into six parts reflecting particular aspects of the fractional order calculus The first part contains a single invited paper on a new formulation of fractional order descriptor observers for fractional order descriptor continuous LTI systems The second part provides new elements to the mathematical theory of fractional order systems In the third part of this volume a bunch of new results in approximation modeling and simulations of fractional order systems is given The fourth part presents new solutions to some problems in controllability and control of non integer order systems in particular fractional PID like control The fifth part analyzes the stability of non integer order systems and some new results are offered in this important respect in particular for discrete time systems The final sixth part of this volume presents a spectrum of applications of the noninteger order calculus ranging from bi fractional filtering in particular of electromyographic signals through the thermal diffusion and advection diffusion processes to the SIEMENS platform implementation This volume's papers were all subjected to stimulating comments and discussions from the active audience of the RRNR 2014 the 6th Conference on Non integer Order Calculus and Its Applications that was organized by the Department of Electrical Control and Computer Engineering Opole University of Technology Opole Poland *United States Code* United States, 2007
