the two views is correct here Contrary to these opposing views and other ideas as will be discussed in the book history in relation to both universality and relativity is neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe Of course this challenge to the opposing views about history does not suggest that the study of history is controversial at best or that those fields related to the study of history like political science economics military studies anthropology sociology psychology philosophy theology literature ethics and so on should be rejected too Needless to say neither of these extreme views is reasonable Rather this book offers an alternative better way to understand the future of history especially in the dialectic context of universality and relativity while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other Instead this book offers a new theory that is the multifold theory of history to go beyond the existing approaches in a novel way If successful this seminal project is to fundamentally change the way that we think about history from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate
