

Recovered and False Memories

2 sides to the debate:

1. Evidence that memories can be repressed and later recovered. Is it possible for people to have experienced traumatic events, for which they have no conscious recollection for years, then recall them through therapy?
2. Evidence that false memories can be implanted. Can a person have a false memory implanted which becomes as strong as a real memory?

traumatic experience festers until the next eruption just as dissociative defenses segmentally protect and exaggerate traumatic experience in the individual case The Scharffs review Kramer s Mahlerian approach McDougall s insights into the silence of the psyche and the words of the soma and Anzieu s elaboration of the body ego They resuscitate Freud s seduction hypothesis and the traumatic basis of the repetition compulsion They compare and contrast the concepts of re **Treating Dissociative Identity Disorder** Sarah Y.
