Proceedings RMRS. ,2000 **Environmental Policy Analysis for Decision Making** J. Loomis,Gloria

Helfand,2006-01-09 1 ENVIRONMENTAL POLICY ANALYSIS WHAT AND WHY Why environmental policy analysis
Environmental issues are growing in visibility in local national and world arenas as a myriad of human activities leads to increased impacts on the natural world Issues such as climate change endangered species wilderness protection and energy use are regularly on the front pages of newspapers Governments at all levels are struggling with how to address these issues Environmental policy analysis is intended to present the environmental and social impacts of policies in the hope that better decisions will result when people have better information on which to base those decisions Conducting environmental policy analysis requires people who understand what it is and how to do it Interpreting it also requires those skills We hope that this book will increase the abilities both of analysts and of decision makers to understand and interpret the impacts of environmental policies Policy analysis books almost invariably begin by pointing out that policy analysis can take many forms This book is no different As you will see in Chapter 1 we consider policy analysis to be information provided for the policy process That information can take many forms from sophisticated empirical analysis to general theoretical results from summary statistics to game theoretic strategies **Wilderness Science in a Time of Change Conference: Wilderness within the context of larger systems** ,2000 **Tourism, Recreation and Regional Development** Jean-Christophe

Dissart,Jeoffrey Dehez,Jean-Bernard Marsat,2016-03-03 What factors contribute to tourism and recreation development How can we characterise stakeholder rationales and organisation modes to enhance tourism resources and foster tourism and recreation services To what extent do tourism and recreation contribute to regional development What changes are taking place in terms of new destinations stakeholders policy objectives Bringing together scholars from the fields of planning economics sociology management studies and geography this book examines cross cutting issues in tourism and recreation with the aim of developing an extended view of leisure time Focusing mainly on France with comparison to the experience of Northern and Southern European countries and North America it combines a diverse range of case studies to address issues such as contrasting rural dynamics changing public policies sustainable development imperatives evolving user behaviour and increasingly diverse recreation activities and stakeholder organisation Specific topics are highlighted such as the role of social capital or culture as factors of recreation development resort organisation from international and experience based perspectives and the usefulness of the capability approach to evaluate tourism impacts on local development Emphasising policy recommendations to help public or collective action on the issues and presenting emerging trends in the field this book should be of interest to students scholars and stakeholders in tourism recreation planning and management The International Handbook on Non-Market Environmental Valuation Jeff Bennett,2011-01-01 Non market environmental valuation NMEV is undergoing a period of increased growth in both application and development as a result of increasing

recognition of the role of economics in environmental policy issues Against this backdrop The International Handbook on Non Market Environmental Valuation brings together world leaders in the field to advance the development and application of NMEV as a tool for policymaking The expert contributors provide insights into the state of the art across the spectrum of both revealed and stated preference methods and highlight new directions being taken A sequence of topical applications demonstrate various techniques and illustrate what can be achieved using NMEV deliberately diverse case studies are drawn from Europe North America Asia and Australia with valuation targets ranging across use and non use values of the environment A number of reviews of cutting edge issues are also presented This outstanding resource will enable those interested in environmental valuation from theoretical practical or policy perspectives to bring themselves to the forefront of developments and practice As such this Handbook will prove invaluable to a wide ranging audience encompassing academics researchers students practitioners and consultants involved in environmental economics and NMEV Wilderness Science in a Time of Change Conference ,2000 *Integrated Public Lands Management* John B. Loomis,2002 *Integrated Public Lands Management* is the only book that deals with the management procedures of all the primary public land management agencies National Forests Parks Wildlife Refuges and the Bureau of Land Management in one volume This book fills the need for a unified treatment of the analytical procedures used by federal land management agencies in planning and managing their diverse lands The second edition charts the progress these agencies have made toward the management of their lands as ecosystems It includes new U S Forest Service regulations expanded coverage of Geographic Information Systems and new legislation on the U S Fish and Wildlife Service and National Wildlife Refuges Freshwater Fisheries Ecology John F. Craig,2016-01-12 Inland fisheries are vital for the livelihoods and food resources of humans worldwide but their importance is underestimated probably because large numbers of small local operators are involved *Freshwater Fisheries Ecology* defines what we have globally what we are going to lose and mitigate for and what given the right tools we can save To estimate potential production the dynamics of freshwater ecosystems rivers lakes and estuaries need to be understood These dynamics are diverse as are the earths freshwater fisheries resources from boreal to tropical regions and these influence how fisheries are both utilized and abused Three main types of fisheries are illustrated within the book artisanal commercial and recreational and the tools which have evolved for fisheries governance and management including assessment methods are described The book also covers in detail fisheries development providing information on improving fisheries through environmental and habitat evaluation enhancement and rehabilitation aquaculture genetically modified fishes and sustainability The book thoroughly reviews the negative impacts on fisheries including excessive harvesting climate change toxicology impoundments barriers and abstractions non native species and eutrophication Finally key areas of future research are outlined *Freshwater Fisheries Ecology* is truly a landmark publication containing contributions from over 100 leading experts and supported by the Fisheries Society of the British Isles The global approach makes this book essential

reading for fish biologists fisheries scientists and ecologists and upper level students in these disciplines Libraries in all universities and research establishments where biological and fisheries sciences are studied and taught should have multiple copies of this hugely valuable resource About the Editor John Craig is Editor in Chief of the Journal of Fish Biology and has an enormous range of expertise and a wealth of knowledge of freshwater fishes and their ecology having studied them around the globe including in Asia North America Africa the Middle East and Europe His particular interests have been in population dynamics and life history strategies He is a Fellow of the Linnean Society of London and the Royal Society of Biology

Determining the Economic Value of Water Robert A. Young, John B. Loomis, 2014-07-23 Water provides benefits as a commodity for agriculture industry and households and as a public good such as fisheries habitat water quality and recreational use To aid in cost benefit analysis under conditions where market determined price signals are usually unavailable economists have developed a range of alternative valuation methods for measuring economic benefits This volume provides the most comprehensive exposition to date of the application of economic valuation methods to proposed water resources investments and policies It provides a conceptual framework for valuation of both commodity and public good uses of water addressing non market valuation techniques appropriate to measuring public benefits including water quality improvement recreation and fish habitat enhancement The book describes the various measurement methods illustrates how they are applied in practice and discusses their strengths limitations and appropriate roles In this second edition all chapters have been thoroughly updated and in particular the coverage of water markets and valuation of ecosystem services from water has been expanded Robert Young author of the 2005 edition has been joined for this new edition by John Loomis who brings additional expertise on ecosystem services and the environmental economics of water for recreational and other public good uses of water

Updated Outdoor Recreation Use Values on National Forests and Other Public Lands John B. Loomis, 2005 This report summarizes more than 30 years of the literature on net economic value of outdoor recreation on public lands The report provides average net willingness to pay or consumer surplus per day for 30 recreation activities at the national level Values per day by recreation activity are also presented by census region of the United States Detailed tables provide the average value per day as well as the standard error for calculating confidence intervals Guidance for using these values in performing benefit transfer to unstudied sites is also provided The report provides a link to a Web site where the spreadsheet that underlies the averages calculated in this report is available

European Forest Recreation and Tourism Simon Bell, Murray Simpson, 2009-05-07 In an increasingly urbanised world more and more people are turning to our forests and woodland for recreation and tourism Based on a study of forest recreation from across Europe the editors bring together the expertise of more than 80 leading professionals and academics to provide a clear and concise guide to best practice

Economics and Contemporary Land Use Policy Robert J. Johnston, Stephen K. Swallow, 2010-09-30 As external forces increase the demand for land conversion communities are

increasingly open to policies that encourage conservation of farm and forest lands This interest in conservation notwithstanding the consequences of land use policy and the drivers of land conversions are often unclear One of the first books to deal exclusively with the economics of rural urban sprawl *Economics and Contemporary Land Use Policy* explores the causes and consequences of rapidly accelerating land conversions in urban fringe areas as well as implications for effective policy responses This book emphasizes the critical role of both spatial and economic ecological interactions in contemporary land use and the importance of a practical policy oriented perspective Chapters illustrate an interaction of conceptual theoretical and empirical approaches to land use policy and highlight advances in policy oriented economics associated with the conservation and development of urban fringe land Issues addressed include 1 the appropriate role of economics in land use policy 2 forecasting and management of land conversion 3 interactions among land use property values and local taxes and 4 relationships among rural amenities rural character and urban fringe land use policy *Economics and Contemporary Land Use Policy* is a timely and relevant contribution to the land use policy debate and will prove an essential reference for policymakers at the local state and federal levels It will also be of interest to students academics and anyone with an interest in the practical application of economics to land use issues **Applied Welfare Economics**

Massimo Florio, 2014-02-05 What is the effect of a new infrastructure on the well being of a local community Is a tax reform desirable Does the privatization of a telecommunication provider increase social welfare To answer these questions governments and their policy advisors should have in mind an operative definition of social welfare and cannot rely on simple official statistics such as GDP The price we observe are often misleading as welfare signals and costs and benefits for the society should be based on shadow prices revealing the social opportunity costs of goods and of changes of the world This book explains how to apply these welfare economics ideas to the real world After a theoretical discussion of the concept of social welfare a critical analysis of the traditional doctrine of welfare economics embodied in the Two Fundamental Theorems and a presentation of social cost benefit analysis the book introduce the readers to an applied framework This includes the empirical estimation of shadow prices of goods of the social cost of labour and capital the assessment of risk This book also includes the state of the art of international experience with CBA including ex post evaluation of major projects economic rates of return in different sectors and a case study on privatisation is presented This book offers a unique and original blend of theory empirics and experience The theoretical discussion clarifies why shadow prices are not virtual market equilibrium prices as they arise as the solution of a planning problem often with governments and economic agents constrained in their information and powers The empirical chapters show how to compute proxies of the shadow prices in simple ways The experience chapters draw from first hand research gained by the Author and his collaborators over many years of advisory work for the European Commission and other international and national institutions **Economics of River Flows** Bharat Jhunjunwala, 2010 *Tourism and Protected Areas* Robyn Bushell, Paul F. J. Eagles, 2007 Bringing together the diverse

experiences of park agencies and managers conservation NGO s and international agencies this book examines the role of tourism in protected area management Using case studies from around the world it provides examples of successful partnerships between community public and private sectors It also explores how tourism can be used as a management tool for financing protected areas It concludes by summarizing the lessons learnt and the challenges facing protected areas in the future **General Technical Report PNW-GTR ,1987**

Forestry Economics John E. Wagner,2011-07-26 Forestry Economics introduces students and practitioners to all aspects of the management and economics of forestry The book adopts the approach of managerial economics textbooks and applies this to the unique processes and problems faced by managers of forests While most forestry economics books are written by economists for future economists what many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions John E Wagner draws on his twenty years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers There are three unique features of this book The first is its organization The material is organized around two common economic models used in forest and natural resources management decision making The second is the use of case studies from various disciplines Outdoor and Commercial Recreation Wood Products Engineering Forest Products and Forestry The purpose of these case studies is to provide students with applications of the concepts being discussed within the text The third is revisiting the question of how to use economic information to make better business decisions at the end of each chapter This ties each chapter to the preceding ones and reinforces the hypothesis that a solid working knowledge of these economic models and the information they contain are necessary for making better business decisions This textbook is an invaluable source of clear and accessible information on forestry economics and management for not only economics students but for students of other disciplines and those already working in forestry and natural resources *Forests in Sustainable Mountain Development* Martin F.

Price,Nathalie Butt,2000 Written by leading international authors this book presents a comprehensive review of forests in mountain regions and their sustainable development Based on a report prepared by the IUFRO Task Force in Sustainable Mountain Development for the IUFRO Congress to be held in August 2000 The book addresses current issues and initiatives and defines research needs Key global issues and addressed is in general articles while specific regional topics are described and highlighted within each chapter in shorter case studies Case studies are drawn from all continents examples including Mexico Central Europe Cameroon Tanzania Chile Korea New Zealand and many others Contributions have been included from nearly 100 world experts making this volume the definitive state of the art review of its subject *Managing Protected Areas* Michael Lockwood,Graeme Worboys,Ashish Kothari,2012-05-04 This handbook produced by world renowned experts from the World Conservation Union IUCN spans the full terrain of protected area management and is the international

benchmark for the field The book employs dozens of detailed international cases studies hundreds of concise topical snapshots maps tables illustrations and a colour plate section as well as evaluation tools checklists and numerous appendices to cover all aspects of park management from biodiversity to natural heritage to financial management The book establishes a conceptual underpinning for protected area management presents guiding principles for the 21st century reflects recent work on international best practice and provides an assessment of skills required by professionals As the most authoritative guide ever compiled to the principles and practice of protected area management this volume is essential for all professionals and students in all countries and contexts **International Handbook on the Economics of Tourism** L.

Dwyer,2007-09-24 Tourism economics is a rapidly expanding field of research and interest in the subject has been growing steadily over the past decade As a field of study it is one of the small band of areas such as energy and transport economics that draws on and applies developments in general economics This highly accessible and comprehensive Handbook presents a cutting edge discussion of the state of tourism economics and its likely directions in future research Leading researchers in the field explore a wide range of topics including demand and forecasting supply transport taxation and infrastructure evaluation and application for policy making Each chapter includes a discussion of its relevance and importance to the tourism economics literature an overview of its main contributions and themes a critical evaluation of existing literature and an outline of issues for further conceptual and applied research Larry Dwyer and Peter Forsyth have assembled a fascinating Handbook that will be an invaluable and much welcomed reference book for tourism economics scholars and researchers at all levels of academe General economics scholars will also find much to engage them within the book
