## **Recreational Fisheries:**

**Marine Recreational Fisheries** ,1984      **Recreational Fisheries in the U.S.** Ellen K. Parker,2016 Recreational fishing is a traditional American pastime integral to social cultural and economic life in coastal communities across the nation This time honored activity allows millions access to America s great outdoors each year while generating billions of dollars in economic activity Traditionally shaped by commercial forces demographic market and ecological shifts are changing the nature of U S fisheries Our nation s expansive coastal and ocean resources face increasing pressure as coastal populations grow and more people pursue recreational opportunities in ecologically important marine and estuarine areas The purpose of this book is to provide guidance for Agency consideration in its deliberations pertaining to development and maintenance of enduring and sustainable high quality saltwater recreational fisheries This policy identifies goals and guiding principles to be integrated into NOAA s National Marine Fisheries Service s NMFS planning budgeting decision making and activities and includes examples of implementation concepts and strategies supported by NMFS Moreover this book provides a detailed overview of the operating structure of the average Northeast for hire head boat and charter boat and estimates the economic activity that for hire businesses contribute to the Northeast s economy as measured by total employment labor income and sales Lastly this book examines challenges that have been identified with the NMFS data collection efforts for managing marine recreational fisheries and steps the agency has taken to improve data collection and challenges that remain

*Fisheries USA* U.S. Fish and Wildlife Service,1990      National Recreational Fisheries Policy ,1988      *Review of Recreational Fisheries Survey Methods* National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on the Review of Recreational Fisheries Survey Methods,2006-08-13 Recreational fishing in the United States is an important social and economic component of many marine fisheries with an estimated 14 million anglers making almost 82 million fishing trips in 2004 Although each individual angler typically harvests a small number of fish collectively these sport fisheries can take a significant fraction of the yearly catch in some cases more than commercial fisheries For example in 1999 recreational fishing accounted for 94% of the total catch of spotted sea trout 76% of striped bass and sheephead and 60 percent of king mackerel It is important that systems used to monitor fishing catch are adequate for timely management of recreational fisheries However the large number of anglers and access points makes monitoring recreational fishing much more difficult than monitoring commercial fishing This report reviews the types of survey methods used to estimate catch in recreational fisheries including state federal cooperative programs The report finds that both telephone survey and onsite access components of the current monitoring systems have serious flaws in design or implementation There are also several areas of miscommunication and mismatched criteria among designers of surveys data collectors and recreational fisheries The report recommends that a comprehensive universal sampling frame with national coverage should be established and that improvements should be made in statistical analysis of the data collected and in the ways the data

are communicated A permanent and independent research group should be established and funded to evaluate the statistical design and adequacy of recreational fishery surveys and to guide necessary modifications or new initiatives *A Heritage of Fishing* United States.
