Red Dwarf I Vol 1:

Red Dwarf: Discovering the TV Series Tom Salinsky, 2024-11-30 Explores the unique journey of the long running British sitcom detailing its creation cast changes and enduring legacy through critical analysis and behind the scenes insights Red Dwarf is virtually unique among British sitcoms It began in 1988 and was still releasing new episodes in 2020 making it one of the longest running sitcoms of all time but the core cast has remained largely unchanged And its science fiction flavor contrasts strongly with the drawing rooms and sofas which were the norm when it launched and the fast cut mockumentary style which is popular today And yet this is a show which nobody wanted to make and which only barely made it to our screens at all In this work Tom Salinsky will look at exactly how it came to be who was considered for the cast but didn't make it how it was radically reinvented for the third sixth seventh ninth and tenth seasons how it survived the breakup of its key creative partnership the loss of the original spaceship models BBC strikes the departure of a major cast member and the seemingly self defeating rules which the writers imposed on themselves But this isn't just a behind the scenes account It's also a detailed critical analysis examining why the best episodes succeed and why the less impressive episodes struggle while also finding time to ask just how a hologram made of light can smell burning camphor wood why a creature evolved from a cat is familiar with Wilma Flintstone or just how long Lister and Kochanski were dating for How can all this possibly be contained in one book It can't Volume I will cover the first six series and Volume II will conclude the story of Red Dwarf on television as well as looking at the novels comic strips computer games and more *Selected Papers, Volume 1*

Subrahmanyan Chandrasekhar, 1989-04-28 This is the first of six volumes collecting significant papers of the distinguished astrophysicist and Nobel laureate S Chandrasekhar His work is notable for its breadth as well as for its brilliance his practice has been to change his focus from time to time to pursue new areas of research The result has been a prolific career full of discoveries and insights some of which are only now being fully appreciated Chandrasekhar has selected papers that trace the development of his ideas and that present aspects of his work not fully covered in the books he has periodically published to summarize his research in each area Volume 1 Stellar Structure and Stellar Atmospheres covers primarily the period 1930-40 and includes early papers on the theory of white dwarfs In the Preface Chandrasekhar explains the criteria for selection and provides historical background Each subsequent volume will include a foreword by an authority on the topics covered
