John Claudius Loudon

Red Dwarf Iii Part 1 Backwards:

Time-Travel Television Sherry Ginn, Gillian I. Leitch, 2015-10-08 Stories of time travel have been part of science fiction since H G Wells sent his nameless hero hurtling into Earth's distant future in *The Time Machine*. Time travel enables the storyteller to depict alternate realities, bring fictional characters face to face with historical figures and depict moral and ethical dilemmas in which millions of lives or the world as we know it are at stake. From *Doctor Who* and *Quantum Leap* to the multiple incarnations of *Star Trek*, time travel has been a staple of science fiction television for more than fifty years. *Time Travel Television: The Past from the Present, the Future from the Past* surveys the whole range of time travel stories on the small screen. The essays in this collection explore time travel series both familiar (*Babylon 5*, *Stargate SG-1*) and forgotten (*The Time Tunnel*, *Voyagers*) as well as time travel themed episodes and arcs in series where it is not central such as *Red Dwarf*, *Lost* and *Heroes*. Contributors to this volume consider some of the classic themes of time travel stories: the promise and peril of fixing the past, the chance to experience and choose possible futures, and the potential for small changes to have great effects. Exploring time travel as a teaching tool, as a vehicle for moral lessons, and as a background for high adventure, this book offers new perspectives on many familiar programs and the first serious study of several unjustly neglected ones. *Time Travel Television* is essential reading for science fiction scholars and fans and for anyone interested in the many ways that television brings the fantastic into viewers' living rooms. *The New Yorker* Harold Wallace Ross, William Shawn, Tina Brown, David Remnick, Katharine Sergeant Angell White, Rea Irvin, Roger Angell, 1993-10

Bowker's Complete Video Directory, 1992

[Red Dwarf: Discovering the TV Series](#) Tom Salinsky, 2024-11-30 Explores the unique journey of the long running British sitcom detailing its creation, cast changes and enduring legacy through critical analysis and behind the scenes insights. *Red Dwarf* is virtually unique among British sitcoms. It began in 1988 and was still releasing new episodes in 2020, making it one of the longest running sitcoms of all time, but the core cast has remained largely unchanged. And its science fiction flavor contrasts strongly with the drawing rooms and sofas which were the norm when it launched and the fast cut mockumentary style which is popular today. And yet this is a show which nobody wanted to make and which only barely made it to our screens at all. In this work Tom Salinsky will look at exactly how it came to be, who was considered for the cast but didn't make it, how it was radically reinvented for the third, sixth, seventh, ninth and tenth seasons, how it survived the breakup of its key creative partnership, the loss of the original spaceship models, BBC strikes, the departure of a major cast member and the seemingly self-defeating rules which the writers imposed on themselves. But this isn't just a behind the scenes account. It's also a detailed critical analysis examining why the best episodes succeed and why the less impressive episodes struggle, while also finding time to ask just how a hologram made of light can smell burning camphor wood, why a creature evolved from a cat is familiar with Wilma Flintstone or just how long Lister and Kochanski were dating for. How can all this possibly be contained in one book? It can't. Volume I will cover the first six series and Volume II will conclude the story.
