The State against Society Grzegorz Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse

Problems of Democratic Transition and Consolidation Juan J. Linz, Alfred Stepan, 1996-08-22 Since their classic volume *The Breakdown of Democratic Regimes* was published in 1978 Juan J Linz and Alfred Stepan have increasingly focused on the questions of how in the modern world nondemocratic regimes can be eroded and democratic regimes crafted In *Problems of Democratic Transition and Consolidation* they break new ground in numerous areas They reconceptualize the major types of modern nondemocratic regimes and point out for each type the available paths to democratic transition and

the tasks of democratic consolidation They argue that although nation state and democracy often have conflicting logics multiple and complementary political identities are feasible under a common roof of state guaranteed rights They also illustrate how without an effective state there can be neither effective citizenship nor successful privatization Further they provide criteria and evidence for politicians and scholars alike to distinguish between democratic consolidation and pseudo democratization and they present conceptually driven survey data for the fourteen countries studied Problems of Democratic Transition and Consolidation contains the first systematic comparative analysis of the process of democratic consolidation in southern Europe and the southern cone of South America and it is the first book to ground post Communist Europe within the literature of comparative politics and democratic theory This is an important volume by two major scholars on a central topic one of broad interest to people in comparative politics to those interested in democracy and to regional specialists on Southern Latin America and on Central and Eastern Europe The book will unquestionably be a major contribution to the literature on constructing democratic governance Abraham F Lowenthal University of Southern California

Bagration

1944 Prit Buttar,2025-03-13 A fascinating history of the great summer offensive launched by the Red Army in 1944 which turned the tide of the war Throughout the war on the Eastern Front there were two consistent trends The Red Army battled to learn how to fight and win while involved in a struggle for its very survival But by 1944 it had a leadership that was able to wield it with lethal effect and with far more effective equipment than before By contrast the Wehrmacht had commenced a slow process of decline after the invasion of the Soviet Union Hitler became increasingly unwilling to delegate decision making to commanders in the field which had been crucial to earlier success The long years of fighting had also taken a heavy toll Thousands of irreplaceable junior officers and NCOs were dead wounded or prisoners Renowned Eastern Front expert Prit Buttar expertly brings these contrasting fortunes to life trends which culminated in the huge battles of Bagration As this masterful study conclusively shows in 1944 the Red Army finally put together a campaign that utterly destroyed the German Army Group Centre The Wehrmacht suffered the loss of over 300 000 men killed wounded or taken prisoner and the Red Army rolled forward across Belarus to the outskirts of Warsaw The end of the war was still many months away and the Germans managed to reconstruct their line on the Eastern Front but final victory for the Soviet Union was now only a matter of time as a direct consequence of Bagration
