Red God of War Chris Bellamy, 1986 **The Dynamics of Military Revolution, 1300-2050** MacGregor

Knox, Williamson Murray, 2001-08-27 The Dynamics of Military Revolution aims to bridge a major gap in the emerging literature on revolutions in military affairs suggesting that there have been two very different phenomena at work over the past centuries military revolutions which are driven by vast social and political changes and revolutions in military affairs which military institutions have directed although usually with great difficulty and ambiguous results By providing both a conceptual framework and a historical context for thinking about revolutionary changes in military affairs the work establishes a baseline for understanding the patterns of change innovation and adaptation that have marked war in the Western World since the thirteenth century beginning with Edward III s revolutionary changes in medieval warfare through the development of modern Western military institutions in seventeenth century France to the cataclysmic changes of the First World War and the German Blitzkrieg victories of 1940 This history provides a guide for thinking about military revolutions in the coming century which are as inevitable as they are difficult to predict Artillery in the Great War Paul Strong, Sanders Marble, 2011-05-18 A year by year examination of key WWI battles and how the ongoing advances in artillery shaped strategy tactics and operations includes battlefield maps World War I is often said to have been an artillery war yet the decisive role artillery played in shaping military decisions and therefor the war itself has rarely been examined Artillery in the Great War traces the development of this all important technology the differing approaches to its use the many innovations it underwent on both sides and how those approaches and innovations in turn effected key battles such as the Battle of the Somme This highly readable and informative history is perfect for any reader interested in understanding the legacy of World War I or the evolution of modern warfare World War II in Europe, Africa, and the Americas, with General Sources Loyd Lee, 1997-08-21 A broadly interdisciplinary work this handbook discusses the best and most enduring literature related to the major topics and themes of World War II Military historiography is treated in essays on the major theaters of military operations and the related themes of logistics and intelligence while political and diplomatic history is covered in chapters on international relations resistance movements and collaboration The volume analyzes themes of domestic history in essays on economic mobilization the home fronts and women in the military and civilian life The book also covers the Holocaust This handbook approaches each topic from a global viewpoint rather than focusing on individual national communities Except for nonprint material the literature research and sources surveyed are primarily those available in English The volume is aimed at both experts on the war and the general academic community and will also be useful to students and serious laymen interested in the war Infantry , 1988 *World War II* Spencer C. Stumbling Colossus David M. Glantz, 1998 Drawing on evidence never before seen in the West including combat records of early engagements David Glantz claims that in 1941 the Red Army was poorly trained inadequately equipped ineptly organized and consequently incapable of engaging in large scale military campaigns and both Hitler and Stalin knew it He provides a complete and convincing study of why the Soviets almost lost the war that summer dispelling many of the myths about the Red Army that have persisted since the war and soundly refuting Viktor Suvorov s controversial thesis that Stalin was planning a preemptive strike against Germany

the British Expeditionary Force BEF played a critical role in defeating the German army and thus winning the First World War This Hundred Days campaign August to November 1918 was the greatest series of land victories in British military history 1918 also saw the creation of the Royal Air Force the world s first independent air service from the Royal Flying Corps and the Royal Naval Air Service Until recently British histories of the First World War have tended to concentrate on the earlier battles of 1916 and 1917 and often underplayed this vitally important period Changing War fills this significant gap in our knowledge by providing in depth examinations of key aspects of the operations of the British Army the Royal Air

Force and its antecedents in the climactic year of the First World War Written by a group of established historians and emerging scholars it sheds light not only on 1918 but on the revolutionary changes in warfare that took place at that time

Tucker, 2015-07-28 This highly detailed and well illustrated single volume work documents the evolution of warfare across history through weaponry and technological change In war the weapons and technologies employed have direct effects on how battles are waged When new weapons are introduced they can dramatically alter the outcomes of warfare and consequently change the course of history itself This reference work provides a fascinating overview of the major weapon systems and military technologies that have had a major impact on world history Addressing weapons as crude as the club used by primitive man to the high tech weapons of today such as unmanned drones *Instruments of War Weapons and Technologies That Have Changed History* offers nearly 270 profusely illustrated entries that examine the key roles played by specific weapons and identify their success and failures The book begins with an introductory essay that frames the subject matter of the work and discusses the history of weapons as a whole The text is concise and accessible to general readers without extensive backgrounds in military history yet provides the detailed information necessary to convey the complexity of the evolution of warfare through technological change **A Global Chronology of Conflict** Spencer C.
