### **Red Passion And Patience In The Desert:**

Red Terry Tempest Williams, 2008-12-30 In this potent collage of stories essays and testimony Williams makes a stirring case for the preservation of America's Redrock Wilderness in the canyon country of southern Utah As passionate as she is persuasive Williams the beloved author of *Refuge* is one of the country's most eloquent and imaginative writers The desert is her blood Here she writes lyrically about the desert's power and vulnerability describing wonders that range from an ancient Puebloan sash of macaw feathers found in Canyonlands National Park to the desert tortoise an animal that can teach us the slow art of revolutionary patience as it extends our notion of kinship with all life She examines the civil war being waged in the West today over public and private uses of land an issue that divides even her own family With grace humor and compassionate intelligence Williams reminds us that the preservation of wildness is not simply a political process but a spiritual one

*The Bioregional Imagination* Tom Lynch, Cheryll Glotfelty, Karla Armbruster, 2012 Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective Although bioregional ideas occur regularly in ecocritical writing until now no systematic effort has been made to outline the principles of bioregional literary criticism and to use it as a way to read write understand and teach literature The twenty-four original essays here are written by an outstanding selection of international scholars The range of bioregions covered is global and includes such diverse places as British Columbia's Meldrum Creek and Italy's Po River Valley the Arctic and the Outback There are even forays into cyberspace and outer space In their comprehensive introduction the editors map the terrain of the bioregional movement including its history and potential to inspire and invigorate place-based and environmental literary criticism Responding to bioregional tenets this volume is divided into four sections The essays in the *Reinhabiting* section narrate experiments in living in place and restoring damaged environments The *Rereading* essays practice bioregional literary criticism both by examining texts with strong ties to bioregional paradigms and by opening other less obvious texts to bioregional analysis In *Reimagining* the essays push bioregionalism to evolve by expanding its corpus of texts coupling its perspectives with other approaches or challenging its core constructs Essays in the *Renewal* section address bioregional pedagogy beginning with local habitat studies and concluding with musings about the Internet In response to the environmental crisis we must reimagine our relationship to the places we inhabit This volume shows how literature and literary studies are fundamental tools to such a reimagining

### **Environmental Awareness and the Design of Literature**

François Specq,2016-10-05 Environmental Awareness and the Design of Literature offers analyses of the diverse ways in which literature helps us escape the rigid frames of commonly assumed worldviews and modes of seeing Literary works are endowed with a capacity not only to reflect or to mediate but to resist our environment and thus to affect and transform our relation to the physical world Each essay points to the way literature shapes the human perception of environment as intellectual adventures and forays that draw upon a number of historical aesthetic philosophical and phenomenological stances *The North American West in the Twenty-First Century* Brenden W. Rensink,2022-11 In 1893 Frederick Jackson Turner famously argued that the generational process of meeting and conquering the supposedly uncivilized western frontier is what forged American identity In the late twentieth century new western historians dissected the mythologized western histories that Turner and others had long used to embody American triumph and progress While Turner s frontier is no more the West continues to present America with challenging processes to wrestle navigate and overcome *The North American West in the Twenty First Century* edited by Brenden W Rensink takes stories of the late twentieth century modern West and carefully pulls them toward the present explicitly tracing continuity with or unexpected divergence from trajectories established in the 1980s and 1990s Considering a broad range of topics including environment Indigenous peoples geography migration and politics these essays straddle multiple modern frontiers not least of which is the temporal frontier between our unsettled past and uncertain future These forays into the twenty first century West will inspire more scholars to pull histories to the present and by doing so reinsert scholarly findings into contemporary public awareness **Prairie Dog Empire** Paul A. Johnsgard,2005-01-01 For hundreds of years black tailed prairie dogs inhabited the Great Plains by the millions improving the grazing for bison and pronghorn antelope digging escape holes and homes for burrowing owls and rodents and serving as prey for badgers coyotes hawks and bobcats This book by the renowned naturalist and writer Paul A Johnsgard tells the complex biological and environmental story of the western Great Plains under the prairie dog s reign and then under a brief but devastating century of human dominion An indispensable and highly readable introduction to the ecosystem of the shortgrass prairie *Prairie Dog Empire* describes in clear and detailed terms the habitat and habits of black tailed prairie dogs their subsistence seasonal behavior and the makeup of their vast colonies and the ways in which their towns transform the surrounding terrain for better or worse Johnsgard recounts how this terrain was in turn transformed over the past century by the destruction of prairie dogs and their grassland habitats together with the removal of the bison and their replacement with domestic livestock A disturbing look at profound ecological alterations in the environment this book also offers a rare and invaluable close up view of the rich history and threatened future of the creature once considered the keystone species of the western plains Included are maps drawings and listings of more than two hundred natural grassland preserves where many of the region s native plants and animals may still be seen and studied *The Impossible*
