**The Red Room** William Le Queux, 2023-07-07 Excerpt The fifteenth of January 1907 fell on a Tuesday I have good cause to remember it In this narrative of startling fact there is little that concerns myself It is mostly of the doings of others strange doings though they were and stranger still perhaps that I should be their chronicler On that Tuesday morning just after eleven o'clock I was busy taking down the engine of one of the cars at my garage in the High Road Chiswick Dick one of my men had had trouble with the forty eight while bringing home two young gentlemen from Oxford on the previous night and I was trying to locate the fault Suddenly as I looked up I saw standing at my side a man who lived a few doors from me in Bath Road Bedford Park a man who was a mystery

*Artist and Attic* Hsin Ying Chi, 1999 Artists and Attic sees the relationship between architecture and literature as a concrete reflection of nineteenth century ideology creating an iconic picture of women's position in society and literature during that period In the Victorian house the attic is hidden and neglected yet to a woman artist it is a space of her own to produce a text of her own The author presents the neglected attic as related to the neglected woman and the limited space symbolizes the confinement of woman and the woman writer yet obtaining this space of her own becomes the central concern to women and women writers This book explores the function of the attic in nineteenth century British and American women's writing as it is given meaning and life by the writers To many of the women the attic created a paradoxical image of their seclusion but also of their own poetic space for freedom in creation Many of the writers see the attic as a retreat to escape from patriarchal oppression and a place to seek social identity

### **Twin Peaks and Philosophy** Richard Greene, Rachel

Robison-Greene, 2018-08-07 2017 saw the triumphant return of the weird and haunting TV show Twin Peaks with most of the original cast after a gap of twenty five years Twin Peaks and Philosophy finally answers that puzzling question What is Twin Peaks really about Twin Peaks is about evil in various forms and poses the question What s the worst kind of evil Can the everyday evil of humans in a small mountain town ever be as evil as the evil of alien supernatural beings Or is the evil of non humans actually less threatening because it s so strange and unaccountable And does the influence of uncanny forces somehow excuse the crimes committed by regular folks Some Twin Peaks characters try to confine evil by sticking to their own moral code as in the case of Albert Rosenfeld who refuses to disguise his feelings and upsets everyone by his forthright honesty Twin Peaks is about responsibility both legal and moral Who is really responsible for the death of Laura Palmer and other murder victims Although Leland has been revealed as Laura s actual killer the show suggests that no one in town was without some responsibility And was Leland even guilty at all if he was not in control of his own mind or body Twin Peaks is about the quest for self knowledge and the dangers of that quest as Agent Cooper keeps learning something new about himself as well as about the troubled townspeople The Buddhist Cooper has to confront his own shadow side culminating in the rite of passage at the Black Lodge at the end of Season Two Twin Peaks is about madness sanity the borderline between them and the necessity of some madness to make sense of sanity The outwardly super normal if somewhat eccentric Agent Dale Cooper is the inspired deranged and dedicated shaman who seeks the truth by coming to terms with the reality of unreason partly through his dreams and partly through his existential encounters with giants logs outer space and other unexpected sources Cooper challenges official law enforcement s over reliance on science Twin Peaks is about the imagination run wild moving from metaphysics to pataphysics the discipline invented by Alfred Jarry which probes the assumption that anything can happen and discovers the laws governing events which constitute exceptions to all laws

David Lynch Swerves Martha Nochimson, 2013-03-15 Beginning with *Lost Highway* director David Lynch swerved in a new direction one in which very disorienting images of the physical world take center stage in his films Seeking to understand this unusual emphasis in his work noted Lynch scholar Martha Nochimson engaged Lynch in a long conversation of unprecedented openness during which he shared his vision of the physical world as an uncertain place that masks important universal realities He described how he derives this vision from the Holy Vedas of the Hindu religion as well as from his layman's fascination with modern physics With this deep insight Nochimson forges a startlingly original template for analyzing Lynch's later films the seemingly unlikely combination of the spiritual landscape envisioned in the Holy Vedas and the material landscape evoked by quantum mechanics and relativity In *David Lynch Swerves* Nochimson navigates the complexities of *Lost Highway* *The Straight Story* *Mulholland Drive* and *Inland Empire* with uncanny skill shedding light on the beauty of their organic compositions their thematic critiques of the immense dangers of modern materialism and their hopeful conceptions of human potential She concludes with excerpts from the wide ranging interview in which Lynch discussed his vision with her as well as an interview with Columbia University physicist David Albert who was one of Nochimson's principal tutors in the discipline of quantum physics
