Russia and Eastern Europe, 1789-1985 Raymond Pearson, 1989 **The Cossack Struggle Against Communism, 1917-1945** Brent Mueggenberg, 2020-01-17 The downfall of tsarism in 1917 left the peoples of Russia facing an uncertain future Nowhere were those anxieties felt more than among the Cossacks The steppe horsemen had famously guarded the

empire's frontiers stampeded demonstrators in its cities suppressed peasant revolts in the countryside and served as bodyguards to its rulers. Their way of life intricately bound to the old order seemed imperiled by the revolution and especially by the Bolshevik seizure of power. Many Cossacks took up arms against the Soviet regime providing the anticommunist cause with some of its best warriors as well as its most notorious bandits. This book chronicles their decades-long campaign against the Bolsheviks from the tumultuous days of the Russian Civil War through the doldrums of foreign exile and finally to their fateful collaboration with the Third Reich.

Russia Philip Longworth, 2024-06-04 Through the centuries Russia has swung sharply between successful expansionism, catastrophic collapse and spectacular recovery. This illuminating history traces these dramatic cycles of boom and bust from the late Neolithic age to Ivan the Terrible and from the height of Communism to the truncated Russia of today. Philip Longworth explores the dynamics of Russia's past through time and space from the nameless adventurers who first penetrated this vast inhospitable terrain to a cast of dynamic characters that includes Ivan the Terrible, Catherine the Great and Stalin. His narrative takes in the magnificent historic cities of Kiev, Moscow and St Petersburg; it stretches to Alaska in the east to the Black Sea and the Ottoman Empire to the south to the Baltic in the west and to Archangel and the Arctic Ocean to the north. Who are the Russians and what is the source of their imperialistic culture? Why was Russia so driven to colonize and conquer? From Kievan Rus, the first ever Russian state which collapsed with the invasion of the Mongols in the thirteenth century to ruthless Muscovy, the Russian Empire of the eighteenth century and finally the Soviet period, this groundbreaking study analyses the growth and dissolution of each vast empire as it gives way to the next. Refreshing in its insight and drawing on a vast range of scholarship, this book also explicitly addresses the question of what the future holds for Russia and her neighbors and asks whether her sphere of influence is growing.

The Industrialisation of Soviet Russia 3: The Soviet Economy in Turmoil 1929-1930 R. W. Davies, 1989-05-05 In 1929-30 the spinal year of the first five-year plan, a vast investment programme began the transformation of the Soviet Union from a peasant country into a great industrial power. This book, the third part of *The Industrialisation of Soviet Russia*, re-examines the breakdown of the mixed economy. In those days of heroism and enthusiasm, hunger and repression, crucial Soviet economic and political institutions were established and are only now being effectively challenged by Gorbachev's revolution. While complementing the previous two volumes of this author's work, the book is designed to be read independently. It sheds new light on a dramatic moment in Soviet history and in the formation of the Soviet system.

The Industrialisation of Soviet Russia Volume 4: Crisis and Progress in the Soviet Economy, 1931-1933 R. W. Davies, 2016-07-27 The profound economic crisis of 1931-33 undermined the process of industrialisation and the stability of the regime. In spite of feverish efforts to achieve the over-ambitious first five-year plan, the great industrial projects lagged far behind schedule. These were years of inflation, economic disorder and of terrible famine in 1933. In response to the crisis, policies and systems changed significantly. Greater realism prevailed; more moderate plans reduced investment; strict monetary controls and more emphasis on economic

incentives and the role of the market The reforms failed to prevent the terrible famine of 1933 in which millions of peasants died But the last months of 1933 saw the first signs of an industrial boom the outcome of the huge investments of previous years Using the previously secret archives of the Politburo and the Council of People s Commissars the author shows how during these formative years the economic system acquired the shape which it retained until the collapse of the Soviet Union in 1991

Digital Atlas of Economic Plants in Archaeology Reinder Neef,René T. J. Cappers,Renée M. Bekker,2012 The third part of the Digital Plant Atlas presents illustrations of subfossil remains of plants with economic value These plant remains mainly derive from excavations in the Old World Europe Western Asia and North Africa that the Deutsches Arch ologisches Institut DAI Berlin and the Groningen Institute of Archaeology GIA have conducted or participated in Plant material is usually very perishable but can nevertheless be preserved in archaeological sites if the biological decay of the material is blocked Many plant remains are discovered during excavations in carbonized form where despite having been in contact with fire they have not been completely reduced to ash Extremely dry climatic conditions like those in Egypt can also preserve plant material in a completely dessicated condition Most of the economically valuable plants illustrated here have been carbonized or desiccated So this atlas links up very well with the Digital Atlas of Economic Plants Like the other atlases this atlas is a combination of a book and a website The Book Just as in part two of the series this part will not only include illustrations of seeds and fruits but also of other plant parts The resulting variety in seed and fruit forms will be illustrated by examples from different excavations To support their identification and determination also pictures of recent plants and relevant plant parts have been included The Website To supplement the photographs the website will also include morphometric measurements of the subfossil seeds and fruits These measurements can be compared with own measurements of the plant taxa in question Summary Plant families 56 Plant species Taxa 191 Photographs 773 photographs of subfossil plant parts 1137 photographs of recent plants and plant parts Languages English and 15 indices scientific plant name pharmaceutical plant name English German French Dutch Spanish Arab Arab in transliteration Turkish Chinese Pinyin Chinese in transliteration Hindi Sanskrit and Malayalam Purchase of the
