The Quiet Hero Nelson Price, 2015-03-06 In 1985 the eyes of the world turned to the Hoosier State and the attempt by a thirteen year old Kokomo Indiana teenager to do what seemed to be a simple task join his fellow classmates at Western Middle School in Russiaville the school to which his Kokomo neighborhood was assigned The teenager Ryan White however had been diagnosed with Acquired Immune Deficiency Syndrome from contaminated blood based products used to treat his hemophilia It was my decision White said to live a normal life go to school be with friends and enjoying day to day activities It was not going to be easy White s words were an understatement to say the least His wish to return to school was met with panic by parents and some school officials The controversy about White and the quiet

courage he and his mother Jeanne displayed in their battle to have him join his classmates is explored in the eleventh volume in the Indiana Historical Society Press's Youth Biography Series *A Quiet Hero* is written by Nelson Price who wrote about White's odyssey during his days as a reporter and columnist for the Indianapolis News. Price goes behind the scenes and brings to light stories and individuals who might have been lost in the media spotlight. After a nine-month court battle, White won the right to return to school but with concessions. These were not enough for parents of twenty children who responded by starting their own school. At school, White became the target of slurs and lies and his locker was vandalized. Although the White family received support from citizens and celebrities around the world, particularly rock singer Elton John, the situation grew so controversial in Kokomo that they moved to Cicero, Indiana, a community that greeted them much differently. In Price's book, White, who succumbed to his disease in 1990, comes across as a normal teenager who met an impossible situation with uncommon grace, courage, and wisdom. It was difficult at times to handle, but I tried to ignore the injustice because I knew the people were wrong. White said, "My family and I held no hatred for those people because we realized they were victims of their own ignorance."

HIV/AIDS in U.S. Communities of Color Valerie Stone, Bisola Ojikutu, M. Keith Rawlings, Kimberly Y. Smith, 2009-05-28. More people in communities of color are contracting, living with, and being treated for HIV/AIDS than ever before. In 2005, 71% of new AIDS cases were diagnosed in people of color. The rate of HIV infection in the African American community alone has increased from 25% of total cases diagnosed in 1985 to 50% in 2005. Latinos similarly comprise a disproportionate segment of the AIDS epidemic though they make up only 14% of the U.S. population. 20% of AIDS cases diagnosed in 2004 were Latino. Although the number of racial and ethnic minority HIV/AIDS cases continues to grow, the health care community has been unable to adequately meet the unique medical needs of these populations. African American, Latino, and other patients of color are less likely to seek medical care, have sufficient access to the health care system, or receive the drugs they need for as long as they need them. *HIV/AIDS in Minority Communities* acknowledges the prevalence of HIV/AIDS within minority communities in the U.S. and strives to educate physicians about the barriers to treatment that exist for minority patients. By analyzing the main causes of treatment failure and promoting respect for individual and cultural values, this book effectively teaches readers to provide responsive, patient-centered care and devise preventive strategies for minority communities. Comprehensive chapters contributed by physicians with extensive experience dealing with HIV/AIDS in minority communities cover issues as far-reaching as anti-retroviral therapy, dermatologic manifestations and co-morbidities of the disease in patients of color, unique risks to women and MSMs of color, participation of minority cases in HIV research, and substance abuse and mental health issues.
