recorren el marco temporal de referencia comprendido entre la promulgación de la Ley 135 de 1961 primera propuesta de reforma agraria surgida en el Frente Nacional y la convergencia de la apertura económica con la inserción de Colombia en la economía del narcotráfico. Propuesto este periodo de estudio el autor plantea sus referentes conceptuales centrados en la comprensión de los procesos de construcción social del espacio. La secuencia nos conduce a una caracterización del panorama actual de la agricultura colombiana sus tendencias y las condiciones del reparto agrario temas que tienen luego desarrollo en la búsqueda de sus relaciones con los distintos alcances de las políticas planteadas por los sucesivos gobiernos. El análisis se alca como el afianzamiento del sector empresarial en el marco de las políticas generadas por su acentuada representación en el Estado genera cambios profundos en las condiciones de acceso a la tierra de las distintas comunidades campesinas. Estos procesos asociados de manera persistente al ejercicio de la violencia profundizan los desequilibrios sociales y políticos que afectan a las poblaciones rurales y el marginamiento al que estas son sometidas no encuentra compensación en los sucesos del reparto agrario. A su vez los desequilibrios generados se transformaron en la cuna de un nuevo factor de conflicto representado en la incorporación de Colombia en la economía del narcotráfico. La expansión de la agricultura comercial en los marcos de la apropiación monopólica de la tierra y la exclusión de los campesinos y demás trabajadores agrarios se convierte en motor del destierro masivo de las poblaciones rurales. El destino de los desposeídos es sumarse a una oferta de mano de obra que no encuentra posibilidades en los mercados de trabajo urbano y engrosar el creciente mundo de la pobreza y la indigencia. Este recorrido por el avasallador modelo agrario en marcha concluye con un conjunto de propuestas encaminadas a buscarle un rumbo diferente al país orientado a construir el bienestar de la población colombiana su seguridad y soberanía alimentarias la generación de empleos e ingresos la estabilidad de las comunidades y la protección del patrimonio ambiental en condiciones democráticas y de respeto a los derechos humanos. *Diario Oficial Colombia*, 1982, Ecología

Guillermo Briceño, 2023-02-17. HACE mucho que los problemas ecológicos han alcanzado una dimensión global la contaminación de la atmósfera y de las entidades hídricas la destrucción de la capa de ozono el efecto invernadero el cambio climático la sobrepesca en los océanos la superpoblación humana y un largo etcétera. Entonces por qué centrarse ahora en el neotrópico. Sencillamente porque es uno de los últimos bastiones de ecosistemas y de biodiversidad que queda en pie tras la codicia del extractivismo mundial. *Ecotones Between Forest and Grassland* Randall W. Myer, 2012-07-10. Ecotones are dynamic overlapping boundary areas where major terrestrial biomes meet. As past studies have shown and as the chapters in this book will illustrate their structure size and scope have changed considerably over the millennia expanding and shrinking as climate and/or other driving conditions also changed. Today however many of them are changing at a rate not seen for a long time perhaps largely due to climate change and other human induced factors. Indeed ecotones are more sensitive to climate change than the biomes on either side and thus may serve as critical early indicators of future climate change. As ecotones change they also redefine the limits of the biomes on either side by altering their distributions of species because in addition

to their own endemic species any ecotone will also have species from both adjoining biomes Consequently they may also be places of high levels of species interaction serving as active evolutionary laboratories which generate new species that then migrate back into adjacent biomes Ecotones Between Forest and Grassland explores how these ecotones have changed in the past how they are changing today and how they are likely to change in the future The book includes chapters from around the world with a special focus on South American and Neotropical ecotones Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales, 2005 Un pasado vivo Varios Autores, 2017-07-01 En la actualidad hemos reconocido el peso de la acción humana en la transformación reciente del planeta lo que hemos llamado cambio climático y el Antropoceno por lo tanto resulta fundamental tener una visión de la historia que reconozca que el pasado humano está entremezclado con el devenir del mundo natural Un pasado vivo Dos siglos de historia ambiental latinoamericana recogen los avances hechos en ese sentido para entender los acelerados cambios producidos en los últimos dos siglos en América Latina y el Caribe Cada capítulo presenta una visión general desde un ángulo ambiental de la historia de algunas partes regiones y biomas como México el Caribe las selvas y las ciudades o sobre temas transversales a toda la región como la minería la ganadería la conservación de la naturaleza y la ciencia Sus autores son trece de los más reconocidos investigadores en este campo Además esta obra cuenta con una introducción que propone cuatro grandes temas de la historia ambiental de la región y un contrapunto final que la ubica en el contexto global Un pasado vivo es indicativo de la madurez que ha alcanzado esta rama de la historia y servir de base para estudios futuros Colombia de lo imaginario a lo complejo Julio Carrizosa, 2003
