Sacred Companies Organizational Aspects Of Religion And Religious Aspects Of Organizations:

Sacred Companies Nicholas Jay Demerath, 1998 Religion is intrinsically social and hence irretrievably organizational although organization is often seen as the darker side of the religious experience power routinization and bureaucracy Religion and secular organizations have long received separate scholarly scrutiny but until now their confluence has been little considered This interdisciplinary collection of mostly unpublished papers is the first volume to remedy the deficit The project grew out of a three year inquiry into religious institutions undertaken by Yale University's Program on Non Profit Organizations and sponsored by the Lilly Endowment The scholars who took part in this effort were challenged to apply new perspectives to the study of religious organizations especially that strand of contemporary secular organizational theory known as New Institutionalism The result was this groundbreaking volume which includes papers on various aspects of such topics as the historical sources and patterns of U S religious organizations contemporary patterns of denominational authority the congregation as an organization and the interface between religious and secular institutions and movements The contributors include an interdisciplinary mix of scholars from economics history law social administration and sociology

Handbook of the Sociology of Religion Michele Dillon, 2003-08-18 Table of contents Religion and Organization Theory Paul Tracey, Nelson Phillips, Michael Lounsbury, 2014-04-02 Despite the profound influence that religious organizations exert religion occupies a curiously marginal place in organization theory This volume aims to make available in one place existing knowledge on religion and organizations encouraging more organization theorists to include religion as part of their research activities and agenda **Handbook of Community Movements and Local Organizations** Ram A. Cnaan, Carl Milofsky, 2007-12-18 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life **The Oxford Handbook of International Organizations** Jacob Katz Cogan, Ian Hurd, Ian Johnstone, 2016-11-10 Virtually every important question of public policy today involves an international organization From trade to intellectual property to health policy and beyond governments interact with international organizations in almost everything they do Increasingly individual citizens are directly affected by the work of international organizations Aimed at academics students practitioners and lawyers this book gives a comprehensive overview of the world of international organizations today It emphasizes both the practical aspects of their organization and operation and the conceptual issues that arise at the junctures between nation states and international authority and between law and politics While the focus is on inter governmental organizations the book also encompasses non governmental organizations and public policy networks

With essays by the leading scholars and practitioners the book first considers the main international organizations and the kinds of problems they address This includes chapters on the organizations that relate to trade humanitarian aid peace operations and more as well as chapters on the history of international organizations The book then looks at the constituent parts and internal functioning of international organizations This addresses the internal management of the organization and includes chapters on the distribution of decision making power within the organizations the structure of their assemblies the role of Secretaries General and other heads budgets and finance and other elements of complex bureaucracies at the international level This book is essential reading for scholars practitioners and students alike **Belief and Organization**

P. Case,H. Höpfl,H. Letiche,2012-10-15 Examines the alternative belief systems which contemporary organizational actors live by and through which they seek to find meaning within the dominant neo capitalist social order This volume marks an attempt to move the study of belief forward within management and organization studies **Managing God's Business**

Malcolm Torry,2017-03-02 Religious and faith based organisations constitute a large and important group of organisations This is the first book to study systematically their characteristics and the distinctive challenges they pose to the people managing them Malcolm Torry discusses how to define religious and faith based organisations how to study them and the secular context in which they operate in Western Europe and the USA There are chapters on congregations denominations governance membership the clergy leadership and religious and faith based organisations relationship to civil society The book relies on research based literature and case studies and contains full bibliographies making it an essential tool for anyone studying this important new field Social Theory and Religion James A. Beckford,2003-08-21 Many aspects of religion are puzzling these days This book looks at ways of improving our understanding of religious change by strengthening the links between social theory and the social scientific study of religion It clarifies the social processes involved in constructing religion and non religion in public and private life Taking illustrations of the importance of these boundaries from studies of secularisation religious diversity globalisation religious movements and self identity James A Beckford reviews the current state of social scientific knowledge about religion *Religion and National Identity* Alistair Mutch,2015-03-23 What is the enduring impact of Presbyterianism on what it means to be Scottish Presbyterianism has shaped Scotland and its impact on the world Behind its beliefs lie some distinctive practices of governance which endure even when belief fades These practices place a particular emphasis on the detailed recording of decisions and what we can term a systemic form of accountability This book examines the emergence and consolidation of such practices in the 18th century Church of Scotland Using extensive archival research and detailed local case studies it contrasts them to what is termed a personal form of accountability in England in the same period The wider impact of the systemic approach to governance and accountability especially in the United States of America is explored as is the enduring impact on Scottish identity This book offers a fresh perspective on the Presbyterian legacy in contemporary Scottish historiography at the same

time as informing current debates on national identity Key Features A novel focus on religion as social practice as opposed to belief or organization A strong focus on Scotland but in the context of Britain Extensive archival work in the Church of Scotland records with an emphasis on form as well as content A different focus on the Church of Scotland in the eighteenth century Offers a detailed focus on local practice in the context of national debates [The Business Turn in American Religious History](#) Amanda Porterfield, Darren E. Grem, John Corrigan, 2017 Business has received little attention in American religious history although it has profound implications for understanding the sustained popularity and ongoing transformation of religion in the United States This volume offers a wide ranging exploration of the business aspects of American religious organizations The authors analyze the financing production marketing and distribution of religious goods and services and the role of wealth and economic organization in sustaining and even shaping worship charity philanthropy institutional growth and missionary work Treating religion and business holistically their essays show that American religious life has always been informed by business practices Laying the groundwork for further investigation the authors show how American business has functioned as a domain for achieving religious goals Indeed they find that religion has historically been more powerful when interwoven with business Chapters on Mormon enterprise Jewish philanthropy Hindu gurus Native American casinos and the wedding of business wealth to conservative Catholic social teaching demonstrate the range of new studies stimulated by the business turn in American religious history Other chapters show how evangelicals joined neo liberal economic practice and right wing politics to religious fundamentalism to consolidate wealth and power and how they developed marketing campaigns and organizational strategies that transformed the American religious landscape Included are essays exposing the moral compromises religious organizations have made to succeed as centers of wealth and influence and the religious beliefs that rationalize and justify these compromises Still others examine the application of business practices as a means of sustaining religious institutions and expanding their reach and look at controversies over business practices within religious organizations and the adjustments such organizations have made in response Together the essays collected here offer new ways of conceptualizing the interdependence of religion and business in the United States establishing multiple paths for further study of their intertwined historical development **Religiously Affiliated**

Keeping Faith in Faith-Based Organizations Dean Pallant, 2012-03-05 The world's poorest people are struggling to access quality affordable health care Change is urgently required Faith based organizations deliver more than 40 percent of health services in many of the poorest places This book argues FBOs can and must deliver quality health services without sacrificing their faith in the process Dean Pallant asks an awkward question If its faith does not drive an FBO whose faith does Pallant visited Salvation Army health ministries in more than forty countries in four years and this book records his global reflections structured around a practical theological model of enquiry His goal is to identify a faithful future for hundreds of Salvation Army hospitals and clinics and thousands of congregation based health ministries Pallant finds answers in the work of Karl Polanyi John Wesley Stanley Hauerwas William Booth and Luke Bretherton among others Pallant challenges the bio medical definition of health and proposes a comprehensive appreciation of people as healthy persons the people God created us to be Pallant's proposals are bold and far reaching for the Salvation Army and other FBOs They are insightful and challenging for everyone of whatever faith committed to improve the health of

the poorest people **Faith-Based Social Services** Stephanie C. Boddie, Ram A. Cnaan, 2012-11-12 Read the latest studies on the effectiveness of religious based services and the problems revealed in the assessment The Charitable Choice provision and the Bush Administration's National Faith Based Initiative have broadened the scope of social services delivered through faith based organizations There are expectations that these faith based social service providers will be more effective but how should that effectiveness be measured Faith Based Social Services Measures Assessments and Effectiveness explains the nature and quality of religion based social service delivery while serving as a point of reference for future research and work This unique source tackles the important complex issue of measuring the effectiveness of faith based social services in comparison to secular services while providing analysis of the latest available studies Faith Based Social Services Measures Assessments and Effectiveness provides a conceptual analysis of FBOs faith based organizations that reflects the need to gather detailed studies to assess social service effectiveness while reviewing the crucial issues challenging public policy The latest empirical research is detailed including the problems found when comparing secular and faith based social service providers their organizational structures and the types of services offered Analysis is included of the data from a three state evaluation of welfare to work programs a study of four types of faith based services found in four cities and an assessment of a church based program for teenage drop outs Topics in Faith Based Social Services Measures Assessments and Effectiveness include discussion on how social science research shunned faith based services and how this neglect affected effectiveness problems inherent in efficacy assessment making funding priorities decisions the causes of outcome differences a model of evaluation based on randomized controlled clinical trials using measurement practices currently used by the nonprofit sector comparative case studies in transitional housing parent education and residential substance abuse treatment programs latest analysis of research involving faith based organizations and the provided services efficacy much more Faith Based Social Services Measures Assessments and Effectiveness is illuminating reading perfect for social work professionals students educators sociologists religious leaders and seminary educators *Bridging the Gaps* Tara Hefferan, Julie Adkins, Laurie A. Occhipinti, 2009-01-01 This edited collection provides an in depth study of faith based development organizations in Latin America and the Caribbean With both analytical rigor and ethnographic awareness the essays explore faith based organizations as a possible model for economic development **Tearfund and the Quest for Faith-Based Development** Dena Freeman, 2019-08-19 This book gives an in depth analysis of the role of faith in the work of Tearfund a leading evangelical relief and development NGO that works in over 50 countries worldwide The study traces the changing ways that faith has shaped and influenced Tearfund's work over the organisation's 50 year history It shows how Tearfund has consciously grappled with the role of faith in its work and has invested considerable time and energy in developing an intentionally faith based approach to relief and development that in several ways is quite different to the approaches of secular relief and development NGOs The book charts the different perspectives and possibilities that were not taken and the

internal discussions about theology development practices and humanitarian standards that took place as Tearfund worked out for itself what it meant to be a faith based relief and development organisation There is a growing academic literature about religion and development as well as increasing interest from development ministries of many Northern governments in understanding the role of religion in development and the specific challenges and benefits involved in working with faith based organisations However there are very few studies of actual faith based organisations and no book length detailed studies showing how such an organisation operates in practice and how it integrates its faith into its work In documenting the story of Tearfund the book provides important insights into the practice and ethos of faith based organisations which will be of interest to other FBOs and to researchers of religion and development **The Shared Parish** Brett C.

Hoover,2014-08-15 As faith communities in the United States grow increasingly more diverse many churches are turning to the shared parish a single church facility shared by distinct cultural groups who retain their own worship and ministries The fastest growing and most common of these are Catholic parishes shared by Latinos and white Catholics Shared parishes remain one of the few institutions in American society that allows cultural groups to maintain their own language and customs while still engaging in regular intercultural negotiations over the shared space This book explores the shared parish through an in depth ethnographic study of a Roman Catholic parish in a small Midwestern city demographically transformed by Mexican immigration in recent decades Through its depiction of shared parish life the book argues for new ways of imagining the U S Catholic parish as an organization The parish argues Brett C Hoover must be conceived as both a congregation and part of a centralized system and as one piece in a complex social ecology The Shared Parish also posits that the search for identity and adequate intercultural practice in such parishes might call for new approaches to cultural diversity in U S society beyond assimilation or multiculturalism We must imagine a religious organization that accommodates both the need for safe space within distinct groups and for social networks that connect these groups as they struggle to respectfully co exist
