Science Without Myth On Constructions Reality And Social Knowledge:

Science without Myth Sergio Sismondo, 1995-11-30 By looking at science as a social and political activity researchers have created novel accounts of scientific practice and rationality accounts that largely contradict the dominant ideologies of science Science without Myth is a philosophical introduction to and discussion of these social and political studies of science a discussion of the social construction of scientific knowledge as a product of communities and societies marked by the circumstances of its production The book argues that there are a number of important and interesting ways in which scientific knowledge can be a social construction but that it often is knowledge of the material world therefore this book is an essay on mediation or the mediatory roles of scientists between nature and knowledge By identifying and separating different senses of the construction metaphor this book displays senses in which scientists construct knowledge phenomena and even worlds It shows science as made up of thoroughly social processes and that those processes create representations of a pre existing material world Science without Myth s argument provides a counter balance to skeptical tendencies of constructivist studies of science and technology by showing that skepticism cannot cut so deeply as to deny the possibility of knowledge and representation

Science without Myth Sergio Sismondo, 1996-01-01 This philosophical introduction to and discussion of social and political studies of science argues that scientific knowledge is socially constructed Alfred Schutz,

Phenomenology, and the Renewal of Interpretive Social Science Besnik Pula, 2024-04-16 In recent decades the historical social sciences have moved away from deterministic perspectives and increasingly embraced the interpretive analysis of historical process and social and political change This shift has enriched the field but also led to a deadlock regarding the meaning and status of subjective knowledge Cultural interpretivists struggle to incorporate subjective experience and the body into their understanding of social reality In the early twentieth century philosopher Alfred Schutz grappled with this very issue Drawing on Edmund Husserl s phenomenology and Max Weber s historical sociology Schutz pioneered the interpretive analysis of social life from an embodied perspective However the recent interpretivist turn influenced by linguistic philosophies discourse theory and poststructuralism has overlooked the insights of Schutz and other phenomenologists This book revisits Schutz s phenomenology and social theory positioning them against contemporary problems in social theory and interpretive social science research The book extends Schutz s key concepts of relevance symbol relations theory of language and lifeworld meaning structures It outlines Schutz s critical approach to the social distribution of knowledge and develops his nascent sociology and political economy of knowledge This book will appeal to readers with interests in social theory phenomenology and the methods of interpretive social science including historical sociology cultural sociology science and technology studies political economy and international relations The Economics of Science: A Critical Realist Overview David Tyfield, 2012-06-12 Dramatic and controversial changes in the funding of science over the past two decades towards its increasing commercialization have stimulated a huge literature trying to set

out an economics of science Whether broadly in favour or against these changes the vast majority of these frameworks employ ahistorical analyses that cannot conceptualise let alone address the questions of why have these changes occurred and why now Nor therefore can they offer much insight into the crucial question of future trends Given the growing importance of science and innovation in an age of both a globalizing knowledge based economy itself in crisis and enormous challenges that demand scientific and technological responses these are significant gaps in our understanding of important contemporary social processes This book argues that the fundamental underlying problem in all cases is the ontological shallowness of these theories which can only be remedied by attention to ontological presuppositions Conversely a critical realist approach affords the integration of a realist political economy into the analysis of the economics of science that does afford explicit attention to these crucial questions a cultural political economy of research and innovation CPERI Accordingly the book sets out an introduction to the existing literature on the economics of science together with novel discussion of the field from a critical realist perspective In arguing thus across levels of abstraction however the book also explores how concerted engagement with substantive social enquiry and theoretical debate develops and strengthens critical realism as a philosophical project rather than simply applying it While the first of these two volumes argues how mainstream economics is inadequate to the task of an explanatory and critical economics of science the challenge in this second volume is to examine the strengths and weaknesses of disciplines offering more promising starting points Two social scientific disciplines are particularly promising candidates starting from economy or science namely heterodox political economy and science technology studies respectively Synthesising these into an economics of science however still encounters considerable hurdles in that there remain some fundamental and mutual philosophical incompatibilities Formulating an economics of science thus demands that both economics and science be redefined The book explores how a critical realist approach affords some common ground upon which this productive synthesis may be pursued in the form of a cultural political economy of research and innovation CPERI

Farm Communities at the Crossroads University of Regina. Canadian Plains Research Center, 2003 This book is an outgrowth of a conference that analyzed transformations in farming farm communities and discussed what might be done to achieve a more socially responsible development It contains papers that address the pace of change in work rural society which has proceeded so rapidly that every new development appears to be a cross roads in which something precious is in danger of being left behind but something valuable may be gained by taking the right route Topics of the papers include the importance of work the family farm community building knowledge skills in the farm community coping with the farm crisis land reform short line railways farm co operatives agricultural chemicals agribusiness sustainable alternatives for agriculture game farming co operative intervention in the farm machinery sector conservation tillage globalization agricultural policy agrarian radicalism on the prairies and farm income support systems Includes index

The Power of Paradox: Impossible Conversations Markus Locker, 2019-05-07 This book argues that all

truths systems include paradoxes Paradoxes such as found in the sciences philosophy and religion offer themselves as mutually shared partners in a dialogue of arguably incommensurable truths on the basis of their underlying truth Paradoxes leap beyond the epistemic border of individual truth claims A dialogue of truths grounded in paradox reaches before and at the same time past singular truths A paradox based dialogue of truths elevates the communication of disciplines such as the sciences and religion to a meta discourse level from which differences are not perceived as obstacles for dialogue but as complementary aspects of a deeper and fuller truth in which all truths are grounded *Meaningful Technologies* Eric Chown, Fernando Nascimento, 2023-01-09 As smartphones mediate more of our activities they are changing our relationship with meaning To a teenager for example a conversation is just as likely to refer to an exchange of text messages as it is a face to face discussion Meanwhile Facebook has redefined what friendship means Snapchat what a memory means etc The kinds of changes smartphones bring are happening at rapid pace TikTok reached a billion users in just over three years whereas it took the telephone 75 years to reach a tenth of that number of people *Meaningful Technologies How Digital Metaphors Change the Way We Think and Live* by Eric Chown and Fernando Nascimento offers systematic reconsideration of the ways in which digital technologies impact our lives both individually and collectively Metaphors aren't just a clever way to describe technology they are also changing the way we think When we click on a picture of a shopping cart it connects a complex set of technologies to represent a simple idea that we're all familiar with A heart icon under a photo is understood as an easy way to express appreciation We aren't required to understand how technology works just how we interact with it The ambiguity of metaphors and the complexity of technology can also hide important realities about what is being described The cloud for example actually consists of very real data centers which consume huge amounts of natural resources to keep running Meanwhile pressing that heart icon on a photo is a signal to the artificial intelligences running in your app that you want to see more things like that photo and that it should adjust what it knows about you accordingly There is a constant feedback loop between us and the digital technologies we use We are constantly using them and they are changing us through their usage *Meaningful Technologies* focuses on this loop from the perspectives of hermeneutic philosophy and cognitive science Through the former the authors examine meaning and how it changes over time Through the latter they gain understanding of how this feedback loop impacts individuals especially in terms of learning and attention Chown and Nascimento argue that on the one hand apps have a kind of agency never before possible in a technology but also that armed with a critical framework for examining such apps we can regain some of our own agency This book will appeal to scholars of digital media digital and computational studies and those interested in issues related to ethical impacts of digital technologies

Research Design and Proposal Writing in Spatial Science Jay D. Gatrell, Gregory D. Bierly, Ryan R. Jensen, 2011-11-25 The complex interactions between human and physical systems confronting social scientists and policymakers pose unique conceptual methodological and practical complications when doing research Graduate students in

a broad range of related fields need to learn how to tackle the discipline specific issues of space place and scale as they propose and perform research in the spatial sciences This practical textbook and overview blends plenty of concrete examples of spatial research and case studies to familiarize readers with the research process as it demystifies and exemplifies how to really do it The appendix contains both completed and in progress proposals for MA and PhD theses and dissertations Emphasizing research as a learning and experiential process while providing students with the encouragement and skills needed for success in proposal writing Research Design and Proposal Writing in Spatial Science can serve as a textbook for graduate level research design courses as well as for undergraduate level project based spatial science courses

pronouncements that the end of the millenium represents the end of nature as well Remaking Reality brings together contributors from across the human sciences who argue that a notion of social nature provides great hope for the future Applying a variety of theoretical approaches to social nature and engaging with debates in politics science technology and social movements surrounding race gender and class the contributors explore important and emerging sites where nature is now being remade with considerable social and ecological consequences The essays are organised around two themes capitalising and envisioning nature and actors networks and the politics of hybridity An afterword by Neil Smith reflects on the problems and possibilities of future names For critics and activists alike Remaking Reality provides essential theoretical and political tools to rethink environmentalism and progressive social natures for the twenty first century **Claiming**

Sacred Ground Adrian J. Ivakhiv,2001-07-26 Claiming Sacred Ground Pilgrims and Politics at Glastonbury and Sedona

Adrian J Ivakhiv A study of people and politics at two New Age spiritual sites In this richly textured account Adrian Ivakhiv focuses on the activities of pilgrim migrants to Glastonbury England and Sedona Arizona He discusses their efforts to encounter and experience the spirit or energy of the land and to mark out its significance by investing it with sacred meanings Their endeavors are presented against a broad canvas of cultural and environmental struggles associated with the incorporation of such geographically marginal places into an expanding global cultural economy Ivakhiv sees these contested and heterotopic landscapes as the nexus of a complex web of interestes and longings from millennial anxieties and nostalgic re imaginings of history and prehistory to real estate power grabs contending religious visions and the free play of ideas from science pseudo science and popular culture Looming over all this is the nonhuman life of these landscapes anotherness that alternately reveals and conceals itself behind a pagenant of beliefs images and place myths A significant contribution to scholarship on alternative spirituality sacred space and the politics of natural landscapes Claiming Sacred Ground will interest scholars and students of environmental and cultural studies and the sociology of religious movements and pilgrimage

Inherent and Instrumental Values G. John M. Abbarno,2014-12-10 The essays in this book range broadly over different aspects of value theory and include contributions by Nicholas Rescher Frances Kamm Barry Smith and Jan Narveson Portions examine the theoretical foundations of values and valuation exploring the rational groundwork for judgments Other aspects appealing to value distinctions of inherent intrinsic and instrumental drawn most notably by C I Lewis bring to light matters of aesthetic social political ethical and ontological issues Throughout Inherent and Instrumental Values the authors address questions assessing the intrinsic worth of utility of actions and whether manual or professional labor can hold an equal value rating and the implications of this assessment In other portions of the anthology authors explore the extent to which such value categories above help clarify and assess moral issues we encounter in everyday life Among some analyzed in this book are racism and affirmative action abortion euthanasia homelessness care and friendship The theme of the nature of value and the role of valuation we encounter in the days of our life provide a basis for examining other aspects of axiology that lie beyond the scope of this work

The Truth Society Noelle Molé Liston,2020-11-15 Noelle Mol Liston s The Truth Society seeks to understand how a period of Italian political spectacle which regularly blurred fact and fiction has shaped how people understand truth mass mediated information scientific knowledge and forms of governance Liston scrutinizes Italy s late twentieth century political culture particularly the impact of the former prime minister and media mogul Silvio Berlusconi By doing so she examines how this truth bending political era made science logic and rationality into ideas that needed saving With the prevalence of fake news and our seeming lack of shared reality in the post truth world many people struggle to figure out where this new normal came from Liston argues that seemingly disparate events and practices that have unfolded in Italy are historical reactions to mediatized political forms and particular cultivated ways of knowing Politics then is always sutured to how knowledge is structured circulated and processed The Truth Society offers Italy as a case study for understanding the remaking of politics in an era of disinformation
