

A close-up photograph of a person wearing a white lab coat and blue nitrile gloves. They are holding a clear plastic multi-well plate with both hands. The plate contains a grid of small wells, some of which are filled with a red liquid, while others are empty or contain a clear liquid. The background is blurred, showing a laboratory setting with various equipment and containers. The overall lighting is bright and clinical.

Scientific Fraud:

Scientific Fraud United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Oversight and Investigations, 1992 *Fraud in the Lab* Nicolas Chevassus-au-Louis, 2019-08-13 From a journalist and former lab researcher a penetrating investigation of the explosion in cases of scientific fraud and the factors behind it In the 1970s a scientific scandal about painted mice hit the headlines A cancer researcher was found to have deliberately falsified his experiments by coloring transplanted mouse skin with ink This widely publicized case of scientific misconduct marked the beginning of an epidemic of fraud that plagues the scientific community today From manipulated results and made up data to retouched illustrations and plagiarism cases of scientific fraud have skyrocketed in the past two decades especially in the biomedical sciences *Fraud in the Lab* examines cases of scientific misconduct around the world and asks why this behavior is so pervasive Nicolas Chevassus au Louis points to large scale trends that have led to an environment of heightened competition extreme self interest and emphasis on short term payoffs Because of the move toward highly specialized research fewer experts are qualified to verify experimental findings And the pace of journal publishing has exacerbated the scientific rewards system publish or perish holds sway more than ever Even when instances of misconduct are discovered researchers often face few consequences and falsified data may continue to circulate after an article has been retracted Sharp and damning this expos details the circumstances that have allowed scientific standards to decline *Fraud in the Lab* reveals the intense social pressures that lead to fraud documents the lasting impact it has had on the scientific community and highlights recent initiatives and proposals to reduce the extent of misconduct in the future **Scientific Fraud and Misconduct and the Federal Response**

United States. Congress. House. Committee on Government Operations. On Fact and Fraud David Goodstein, 2010-02-01 Fascinating case studies of scientific controversies and misconduct with valuable insights on how to identify avoid and prevent fraud Leonardo In David Goodstein's varied experience as a physicist and educator and as vice provost at Caltech a job in which he was responsible for investigating all allegations of scientific misconduct a deceptively simple question has come up time and again What constitutes fraud in science Here Goodstein takes us on a tour of real controversies from the front lines of science and helps readers determine for themselves whether or not fraud occurred Cases include among others those of Robert A Millikan whose historic measurement of the electron's charge has been maligned by accusations of fraud Martin Fleischmann and Stanley Pons and their discovery of cold fusion Victor Ninov and the supposed discovery of element 118 Jan Hendrik Schön from Bell Labs and his work in semiconductors and J Georg Bednorz and Karl Müller's discovery of high temperature superconductivity a seemingly impossible accomplishment that turned out to be real Fraud in science is not as easy to identify as one might think When accusations of scientific misconduct occur truth can be elusive and the cause of a scientist's ethical misstep isn't always clear On Fact and Fraud looks at actual cases in which fraud was committed or alleged explaining what constitutes scientific misconduct and what doesn't and providing readers with the ethical foundations needed to discern and avoid fraud wherever it may arise Superb It will be the definitive book on the subject Richard A Muller University of California Berkeley

The Economics of Scientific Misconduct James R. Wible, 2022-08-18 The Economics of Scientific Misconduct explores episodes of misconduct in the natural and biomedical sciences and replication failure in economics and psychology over the past half century Here scientific misconduct is considered from the perspective of a single discipline such as economics likely for the first time in intellectual history Research misconduct has become an important concern across many natural medical and social sciences including economics over the past half century Initially a mainstream economic approach to science and scientific misconduct draws from conventional microeconomics and the theories of Becker Ehrlich and C S Peirce's economy of research Then the works of Peirce and Thorstein Veblen from the 19th century point toward contemporary debates over statistical inference in econometrics and the failure of recent macroeconomic models In more contemporary economics clashes regarding discrimination and harassment have led to a Code of Professional Conduct from the American Economic Association and a Code of Ethics from one of its members The last chapter considers research ethics matters related to the COVID 19 pandemic There has been an explosion of research and some retractions More generally a concern with research ethics contributes to scientific progress by making some of its most difficult problems more transparent and understandable and thus possibly more surmountable This book offers valuable insights for students and scholars of research ethics across the sciences philosophy of science and social science and economic theory

University Responsibility for the Adjudication of Research Misconduct Stefan Franzen, 2021-05-12 This book offers a scientific whistleblower's perspective on current implementation of federal research misconduct regulations It provides a narrative of general interest that relates current

cases of research ethics to philosophical historical and sociological accounts of fraud in scientific research The evidence presented suggests that the problems of falsification and fabrication remain as great as ever but hidden because the current system puts universities in charge of investigations and permits them to use confidentiality regulations to hide the outcomes of investigations The book documents the significant conflict of interest that arises because federal regulation gives universities the responsibility to conduct investigations of their own faculty with severely limited oversight The book is intended for young research scientists or anyone who wishes to understand the challenges faced by scientists in the workplace today The central thread in the book is an exclusive account of an experienced research scientist who was the first to expose the facts that led to the longest running research misconduct investigation in the history of the National Science Foundation

Scientific Deception Lesley Grayson,1997 This text provides an overview of the subject of scientific deception examining the entire range of possible misconduct in this area from the most blatant fraud to relatively innocent self deception The author explores the reasons for such behaviour and discusses responses and policy implications drawing on material from the USA Australia and Europe Pressure is mounting for more concerted action especially in the field of medicine and for the setting up of an independent investigatory body This is the 1997 update of the 1995 text

Fraud and Misconduct in Research Nachman Ben-Yehuda,Amalya Oliver-Lumerman,Amalya Oliver,2017-10-05 A clear eyed examination of research misconduct and how efforts to expose and prevent it affect scientists and universities
