G. Walsh, Thomas Teo, Angelina Baydala, 2014-03-20 In line with the British Psychological Society's recent recommendations for teaching the history of psychology this comprehensive undergraduate textbook emphasizes the philosophical cultural and social elements that influenced psychology's development The authors demonstrate that psychology is both a human i.e psychoanalytic or phenomenological and natural i.e cognitive science exploring broad social historical and philosophical themes such as the role of diverse cultures and women in psychology and the complex relationship between objectivity and subjectivity in the development of psychological knowledge The result is a fresh and balanced perspective on what has traditionally been viewed as the collected achievements of a few great men With a variety of learning features including case studies study questions thought experiments and a glossary this new textbook encourages students to critically engage with chapter material and analyze themes and topics within a social historical and philosophical framework Between Mind and Nature Roger Smith, 2013-06-01 From William James to Ivan Pavlov John Dewey to Sigmund Freud the W rzburg School to the Chicago School psychology has spanned centuries and continents Today the word is an all encompassing name for a bewildering range of beliefs about what psychologists know and do and this intrinsic interest in knowing how our own and other's minds work has a story as fascinating and complex as humankind itself In *Between Mind and Nature* Roger Smith explores the history of psychology and its relation to religion politics the arts social life the natural sciences and technology Considering the big questions bound up in the history of psychology Smith investigates what human nature is whether psychology can provide answers to human problems and whether the notion of being an individual depends on social and historical conditions He also asks whether a method of rational thinking exists outside the realm of natural science Posing important questions about the value and direction of psychology today *Between Mind and Nature* is a cogently written book for those wishing to know more about the quest for knowledge of the mind *History of Higher Education Annual* Roger Geiger, 1987-01-01 *Science in the Early Twentieth Century* Jacob Darwin Hamblin, 2005-03-08 The first A Z resource on the history of science from 1900 to 1950 examining the dynamic between science and the social political and cultural forces of the era Though many books have highlighted the great scientific discoveries of the early 1900s few have tackled the wider context in which these milestones were achieved *Science in the Early Twentieth Century* covers everything from quantum physics to penicillin and more including all the major scientific developments of the period detailing not only the scientists

The Soul's Economy Jeffrey Sklansky, 2003-10-16 Tracing a seismic shift in American social thought Jeffrey Sklansky offers a new synthesis of the intellectual transformation entailed in the rise of industrial capitalism For a century after Independence the dominant American understanding of selfhood and society came from the tradition of political economy which defined freedom and equality in terms of ownership of the means of self employment However the gradual demise of the household economy rendered proprietary independence an increasingly embattled ideal Large landowners and industrialists claimed the right to rule as a privilege of their growing monopoly over productive resources while dispossessed farmers and workers charged that a propertyless populace was incompatible with true liberty and democracy Amid the widening class divide nineteenth century social theorists devised a new science of American society that came to be called social psychology The change Sklansky charts begins among Romantic writers such as Ralph Waldo Emerson and Margaret Fuller continues through the polemics of political economists such as Henry George and William Graham Sumner and culminates with the pioneers of modern American psychology and sociology such as William James and Charles Horton Cooley Together these writers reconceived freedom in terms of psychic self expression instead of economic self interest and they redefined democracy in terms of cultural kinship rather than social compact

Catholic Converts Patrick Allitt, 2018-08-06 From the early nineteenth to the mid twentieth century an impressive group of English speaking intellectuals converted to Catholicism Outspoken and gifted they intended to show the fallacies of

religious skeptics and place Catholicism once again at the center of western intellectual life The lives of individual converts such as John Henry Newman G K Chesterton Thomas Merton and Dorothy Day have been well documented but Patrick Allitt has written the first account of converts collective impact on Catholic intellectual life His book is also the first to characterize the distinctive style of Catholicism they helped to create and the first to investigate the extensive contacts among Catholic convert writers in the United States and Britain Allitt explains how despite the Church s dogmatic style and hierarchical structure converts working in the areas of history science literature and philosophy maintained that Catholicism was intellectually liberating British and American converts followed each other s progress closely visiting each other and sending work back and forth across the Atlantic The outcome of their labors was not what the converts had hoped Although they influenced the Catholic Church for three or four generations they were unable to restore it to the central place in Western intellectual life that it had enjoyed before the Reformation

Johanningmeier, 2008-01-01 Educational Research The National Agenda and Educational Reform examines the origins history nature purposes and status of educational research by focusing on the relationships among educational research the national agenda educational reform and the social and behavioral sciences Its major claim is that the history of educational research is embedded in the nation s social political intellectual and economic histories Attention is given to three significant periods the Progressive Era when modern educational research began to assume its present form the Post World War II Era when educators and educational researchers were directed to return to or turn to the academic disciplines and the Civil Rights Era after the Supreme Court in Brown ended legal racial segregation and raised questions about equality of educational opportunity that are still with us These were significant periods when there was a clear national agenda shaped by both public and private agencies Educators and educational researchers adopted policies and strategies in response to concerns and interests expressed by the public by government officials and by philanthropies Researchers responses have had long term consequences as seen in the reaction to The Coleman Report debates about the merits of quantitative research as opposed to qualitative research the ongoing discussion about the merits of No Child Left Behind the achievement gap the creation of the Institute of Education Sciences and the emphasis now placed on scientifically based research The origins of the common school the work of the philosopher Johann Friedrich Herbart and his followers and the revolution in scientific method brought about by Charles Darwin s work are included because they serve as the foundation for educational research Educational researchers identification with and interest in individual performance and ability and their measurement is related to the close relationship educational researchers have had with psychology a discipline that typically does not focus on social context The significance of educational researchers borrowing from the behavioral sciences especially psychology is examined through a discussion of the mental hygiene movement as supported by private philanthropy and through consideration of contributors such as G Stanley Hall Arnold Gesell Lewis M Terman Daniel Starch and Stuart A Courtis *Surmounting All Odds - Vol. 1* Carol Camp Yeakey, Ronald D.
