**Journalism's Roving Eye** John Maxwell Hamilton,2011-08-15 In all of journalism nowhere are the stakes higher than in foreign news gathering For media owners it is the most difficult type of reporting to finance for editors the hardest to oversee Correspondents roaming large swaths of the planet must acquire expertise that home based reporters take for granted facility with the local language for instance or an understanding of local cultures Adding further to the challenges they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs a task made all the more daunting because of the consequence to national security In *Journalism's Roving Eye* John Maxwell Hamilton a historian and former foreign correspondent provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the cavalcade of colorful personalities who shaped readers perceptions of the world across two centuries From the colonial era when newspaper printers hustled down to wharfs to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War Hamilton explores journalism's constant and not always successful efforts at dishing the foreign news as James Gordon Bennett put it in the mid nineteenth century to describe his approach in the *New York Herald* He details the highly partisan coverage of the French Revolution the early emergence of special correspondents and the challenges of organizing their efforts the profound impact of the non yellow press in the run up to the Spanish American War the increasingly sophisticated machinery of propaganda and censorship that

surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe. From the Nazi intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the Vietnam War, Hamilton covers every aspect of delivering foreign news to American doorsteps. Along the way, Hamilton singles out a fascinating cast of characters among them Victor Lawson, the overlooked proprietor of the Chicago Daily News who pioneered the concept of a foreign news service geared to American interests; Henry Morton Stanley, one of the first reporters to generate news on his own with his 1871 expedition to East Africa to find Livingstone; and Jack Belden, a forgotten brooding figure who exemplified the best in combat reporting. Hamilton details the experiences of correspondents, editors, owners, publishers, and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it. Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering. Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry, many fear that foreign reporting will soon no longer exist. But as Hamilton shows in this magisterial work, traditional correspondence survives alongside a new type of reporting.

*Journalism's Roving Eye* offers a keen understanding of the vicissitudes in foreign news, an understanding imperative to better seeing what lies ahead. *The Undeclared War between Journalism and Fiction*. D. Underwood, 2013-09-25. In this volume, Doug Underwood asks whether much of what is now called literary journalism is in fact literary and whether it should rank with the great novels by such journalist-literary figures as Twain, Cather, and Hemingway, who believed that fiction was the better place for a realistic writer to express the important truths of life.

**Journalism and Truth in an Age of Social Media** James Everett Katz, Kate K. Mays, 2019. Truth qualities of journalism are under intense scrutiny in today's world. Journalistic scandals have eroded public confidence in mainstream media while pioneering news media compete to satisfy the public's appetite for news. Still worse is the specter of fake news that looms over media and political systems that underpin everything from social stability to global governance. This volume aims to illuminate the contentious media landscape to help journalism students, scholars, and professionals understand contemporary conditions and arm them to deal with a spectrum of new developments ranging from technology and politics to best practices. Fake news is among the greatest of these concerns and can encompass everything from sarcastic or ironic humor to bot-generated made-up stories. It can also include the pernicious transmission of selected biased facts, the use of incomplete or misleadingly selective framing of stories, and photographs that editorially convey certain characteristics. This edited volume contextualizes the current fake news problem. Yet it also offers a larger perspective on what seems to be uniquely modern, computer-driven problems. We must remember that we have lived with the problem of people having to identify, characterize, and communicate the truth about the world around them for millennia. Rather than identify a single culprit for disseminating misinformation, this volume examines how

news is perceived and identified how news is presented to the public and how the public responds to news It considers social media s effect on the craft of journalism as well as the growing role of algorithms big data and automatic content production regimes As an edited collection this volume gathers leading scholars in the fields of journalism and communication studies philosophy and the social sciences to address critical questions of how we should understand journalism s changing landscape as it relates to fundamental questions about the role of truth and information in society **The Penguin Modern Classics Book** Henry Eliot, 2021-11-18 The essential guide to twentieth century literature around the world For six decades the Penguin Modern Classics series has been an era defining ever evolving series of books encompassing works by modernist pioneers avant garde iconoclasts radical visionaries and timeless storytellers This reader s companion showcases every title published in the series so far with more than 1 800 books and 600 authors from Achebe and Adonis to Zamyatin and Zweig It is the essential guide to twentieth century literature around the world and the companion volume to The Penguin Classics Book Bursting with lively descriptions surprising reading lists key literary movements and over two thousand cover images The Penguin Modern Classics Book is an invitation to dive in and explore the greatest literature of the last hundred years
