Public Happiness Seung Jong Lee, 2021-11-18 We all strive for personal happiness in one way or another but what about public happiness? What does public happiness mean and what role can governments and public policies play? The current COVID 19 pandemic has highlighted the inadequacies of old governance paradigms and even before this pandemic, increasing inequalities and frustration with the old GDP centric growth paradigm have fueled dissatisfaction with and distrust of governments. This book suggests a new path towards public happiness as a potential solution. The book builds a theory of public happiness as a distinct concept from individual happiness, borrowing especially from Eastern philosophy. It provides an overview of the efforts so far to go beyond GDP, including measurement and exploration of the determinants of happiness and how these efforts have fallen short of expectation. Lastly, the book sketches out what a public happiness policy might look like and identifies the factors of a successful happiness policy.

Values of Happiness Iza Kavedžija, Harry Walker, 2017-03-15 How people conceive of happiness reveals much about who they are and the values they hold dear. Drawing on ethnographic insights from diverse field sites around the world, this book offers a unique window onto the ways in which people grapple with fundamental questions about how to live and what it means to be human. Developing a distinctly anthropological approach, concerned less with gauging how happy people are than with how happiness figures as an idea, mood and motive in everyday life, the book explores how people strive to live well within challenging or even hostile circumstances. The contributors explore how happiness intersects with dominant social values as well as an array of aims and aspirations that are potentially conflicting, demonstrating that not every kind of happiness is seen as a worthwhile aim or evaluated in positive moral terms. In tracing this link between different conceptions of happiness and their evaluations, the book engages some of the most fundamental questions concerning human happiness: What is it and how is it achieved? Is happiness everywhere a paramount value or aim in life? How does it relate to other ideas of the good? What role does happiness play in orienting people's desires and life choices? Taking these questions seriously, the book draws together considerations of meaning, values and affect while recognizing the diversity of human ends.
